BNurs work times

To be completed by all candidates.

Bachelor of Nursing (Hons)

Candidates are reminded that the School of Health Sciences, Faculty of Biology, Medicine and Health reserves the right to rescind at any time an offer of a place on the course during and following any of the selection processes adopted by the University if any information is revealed to us by any professional organisation that would make this application void. NMC Fitness to Practice regulations apply to this course and all offers are subject to successful completion of the Disclosure and Barring Service and Occupational Health checks.

Whilst every effort is made to offer students appropriate clinical placements, the University reserves the right to place students where necessary to meet the module outcomes of the course. There will be community clinical placements as well as hospital placements.

Due to the BNURS/MNURS programme being regulated by the NMC, we do not follow the standard university calendar. Holidays are non-negotiable and set for specific periods, students should check programme dates with the admissions or programme teams.

I understand that as a student nurse, I will be expected to work shift patterns that may involve weekends, starting or finishing work early in the morning, for example 07:15hr or late at night, for example after 21:00hr.

The start date for the course is:

September 2027

I have read and accepted the above conditions of my application and any offer I receive.
