Synthetic Biology

based on standard parts

Join the first ever Manchester iGEM team!

Candidates wanted to participate in the **International Genetically Engineered Machine** competition 2013. An exciting inter-disciplinary summer project which is great for your CV.

any subject!

Are you an Undergraduate or MSc student?
Do you want to do world-class research during the summer months?

You will have fun, meet lots of people from all over the world, compete with some of the most creative young minds in science, get to create new biological systems that people never thought of...

The best European teams will go to Boston, USA, for the iGEM world championship, to compete with about 50 teams from all over the world.
