

Connecting to University Wi-Fi

eduroam (education roaming) is a secure, international wireless service available to all staff and students at The University of Manchester.

Before you start

All eduroam usernames start with your IT account name and finish with **@manchester.ac.uk**

When setting up eduroam, you **must** enter the username in the format:

*itaccount***@manchester.ac.uk**

Where "itaccount" is your IT account name; the same one you use to log into My Manchester, University PCs and other services.

For example, if your IT account name is *v12345ab*, your eduroam username would be *v12345ab@manchester.ac.uk*.

To set up eduroam on a laptop, iPhone or iPad

1. Visit **cat.eduroam.org**
2. Follow the instructions to download the eduroam installer, ensuring that **The University of Manchester** is selected as your institution
3. Download and run the eduroam installer, following the on-screen instructions

Android users should download the **eduroam CAT** app from Google Play instead.
