

Looking Forward: Nuclear Energy Issues and Opportunities

Tuesday 24 January 2017, 1pm - 2.15pm

Room F41 Sackville Street Building (Building Number 1 on campus map)

Director General, Nuclear Energy Agency (NEA) William D. Magwood IV

William D. Magwood, IV, Director General of the Nuclear Energy Agency, will provide his views on several areas of interest regarding nuclear technology-related issues. He will present an overview of the NEA and its many areas of work. He will discuss the lessons learned from the accident at the Fukushima Daiichi plant in Japan and how NEA member countries have applied those lessons to assure high levels of nuclear safety around

the world. He will also highlight what the NEA has termed the "human aspects" of nuclear safety such as safety culture and stakeholder engagement and he will review efforts to address nuclear waste and highlight the international efforts underway to address long-term nuclear science and technology challenges, as well as present the NEA's new initiative on Education Skills & Technology (NEST).
