

Central Power Services Limited

We have supplied generators and the fuel and services for them for the University.

In their own words, Central Power Services Limited explains how they are demonstrating the positive impact they are making:

“ Guarantee suppliers a payment date

Guaranteeing suppliers a date of payment builds trust across the supply chain as suppliers feel they will suffer less financial risk.

All our suppliers are guaranteed a payment date. We also try and pay small local businesses earlier if possible.

Adapt processes to prevent wasting natural resources

We are currently trialing a rainwater harvesting system for vehicle washing.

Being part of wider schemes in the local area.

We sponsored Cloughton in Bloom this year, which is the local village to our head office. We received a beautiful thank you card from the organisers

Provide short-term work placements

We have recently started two young local engineers and an admin assistant in the office. They are all making good progress. We always try to promote opportunities for young people.
