CARD Faculty Research Staff Development Programme

CARD CPD opportunities

The Research Staff Development Programme provides you with intermediate and advanced level training to help you maximise your research outputs and impact and supports you as you develop independent research careers.

The programme provides training in five key areas:

- Research
- Service and Leadership
- Teaching and Learning
- Academic Enterprise and Knowledge Transfer
- Career Management

The Centre for Academic Research and Development (CARD) offer courses that provide personal and professional development to external partners.

The broad range of practical and engaging courses are suitable for all those interested in developing their careers and research. The courses span from, for example, conducting socially responsible research to improving academic writing and topics covered include:

- Teaching & learning practice
- Research capabilities
- Personal & professional development
- Leadership & management

**Key contacts:** Holly Dewsnip, CARD Administrator, ([acadresdev@manchester.ac.uk](mailto:acadresdev@manchester.ac.uk))

**Further details:** <http://www.mahsc.ac.uk/events/>

**Integrated Clinical Academic Training (ICAT): ACFs and AFPs**

**CARD CPD opportunities for NHS**

The Manchester Academic Health Science Centre ([MAHSC](#)) hosts the Manchester Integrated Clinical Academic Training ([ICAT](#)) programme.

The aim of the ICAT programme is to facilitate and support the academic development of both undergraduate and postgraduate clinical trainees who aspire to follow a clinical academic career path.

To achieve this aim, the ICAT programme is managed as a partnership between The University of Manchester and [Health Education North West](#) and in close liaison with the NIHR Trainees Coordinating Centre ([NIHR TCC](#)), which oversees 'Integrated Academic Training' nationally and is responsible for the allocation of funding to support programmes.

Through the ICAT programme, clinical trainees have extensive opportunities to conduct cutting-edge research within world-class facilities that cover the full healthcare continuum from basic biomedical research to experimental medicine and healthcare service research.

Academic training is provided through a broad range of flexible postgraduate degree programmes as well as bespoke training options that are designed and delivered by the Faculty of Biology, Medicine and Health (FBMH) training team and through the MAHSC Clinical Research Facilities.

For those who wish to join the Manchester ICAT programme, see details about the posts and funding opportunities available.  
Enquiries: From both current and aspiring clinical academic trainees, the [ICAT Management Team](#) welcome enquiries about all aspects of the programme.

The Centre for Academic Research and Development (CARD) offer courses at a reduced fee to enable all MAHSC partner staff to access training courses to aid their personal and professional development.

The broad range of practical and engaging courses are suitable for all those interested in developing their careers and research. The courses span from, for example, conducting socially responsible research to improving academic writing and topics covered include:

- Teaching & learning practice
- Research capabilities
- Personal & professional development
- Leadership & management

**Key contacts:** Laura Jammeh, ICAT Administrator, ([ICATadmin@manchester.ac.uk](mailto:ICATadmin@manchester.ac.uk))

The Faculty Fellowship Academy helps researchers to realise their ambition to obtain an externally funded fellowship.

There are various ways that you can access the

- Bespoke Advice
- Peer Review
- Pump-prime Funding
  - The Dean's Prize: Early Career Researcher Development Award
  - The Dean's Prize for Clinicians

#### [Fellowship Academy Clinics](#)

Planning a fellowship application? Is your CV good enough? Which is the most relevant funder? Come and meet a senior researcher who has 'been there, done that' in a one-to-one meeting. The majority of the sessions are run by senior academics who sit / have sat on externally funded fellowship panels, or have chaired them. Because of this, you will be getting the advice of someone who has interviewed for these posts, and get an insight into how candidates are selected and what criteria are deemed to be important for selection. Please be mindful that this is the opinion of one person from the perspective of a funder and panel member, and not someone who is necessarily in your scientific area. The Academy works in parallel with the support and advice mechanisms that are available within Schools and you should seek assistance from both.

**Key contacts:** Katy Boyle, Fellowship Academy Manager

### CARD Teaching Opportunities for Researchers

### CARD Doctoral Academy Training Programme

Our goal is to create an environment that allows you to excel and reach your full potential.

Offering access to first-class facilities and strong links with regional health-service providers, our postgraduate research degree programmes are designed to meet the diverse needs of all our students.

Research topics span all areas of biomedical research, ranging from molecular biology to experimental medicine to dental science and health service research. While subject areas are broad, our postgraduate programmes have three principal aims:

to develop research skills through your execution of a research project under the supervision of a highly qualified member of staff and with the guidance of an adviser;

to enhance your education within the field you have chosen. Whether you are a graduate or have a clinical background, training is tailored to meet your specific needs;

to develop key transferable skills which you can take with you into your chosen career whether it be in academia, industry, healthcare or beyond.

As a research student in the Doctoral Academy you are expected to take responsibility for your programme, within a supportive environment that fosters your development and helps prepare you for your future career.

**Key contacts:** [acadresdev@manchester.ac.uk](mailto:acadresdev@manchester.ac.uk), [leap.cpd@manchester.ac.uk](mailto:leap.cpd@manchester.ac.uk),

**Further detail:** <https://www.bmh.manchester.ac.uk/doctorsal-academy/training/>

Our training programme provides foundation and intermediate level training at key stages of your postgraduate research degree to ensure timely completion, generic skills development and increased future employability.

The Doctoral Academy Training Programme provides training in nine key areas:

- Doctoral essentials
- Academic writing
- Presenting research
- Research methods
- Research foundations
- Teaching and engagement
- Personal effectiveness
- Career management
- Steps to independence

**Key contacts:** Holly Dewsnip, CARD Administrator ([acadresdev@manchester.ac.uk](mailto:acadresdev@manchester.ac.uk))

CARD New Academics Programme (NAP)

CARD Careers Support

The Faculty of Biology, Medicine and Health New Academics Programme (NAP) is part of a University wide approach to support new academics and fellows with the skills they need to carry out their research and teaching and learning duties at the highest level.

The programme is designed to be flexible and provides training in three key development areas.

- Inspirational Teaching
- Research Excellence
- Personal and Professional Development

The NAP is also accredited by the Higher Education Academy (HEA) and successful completion of the programme will entitle you to become a Fellow of the HEA.

The College of Experts at the Faculty of Biology, Medicine and Health aims to enhance the quality of research grant applications to major funders by promoting a stronger culture of peer support and peer learning among our research staff.

Advice and support for these applications will be impartial and provided by College members who sit on external funding panels and have an established research track record.

The College of Experts has three main remits:

- High quality peer review for high value (~£1m+) prestigious and strategic applications (including cross-faculty initiatives);
- Peer support for shortlisted applications that require interview support;
- Horizon scanning of major funding initiatives via our College members.
