/officialuom
@OfficialUoM
www.manchester.ac.uk/student-made

Is Manchester the place for you? Come and see for yourself.

At an open day
Meet our people, explore our campus, ask questions and get a sense of what it’s like to study here at one of our postgraduate open days.

www.manchester.ac.uk/opendays

Overseas
If you live abroad and cannot visit Manchester, we attend various events worldwide throughout the year.

www.manchester.ac.uk/overseasevents

At a time to suit you
Take an independent look around our campus. Start at our University Giftshop in University Place, where you can pick up a map and get information. Open Monday to Friday, 9am to 5pm.

www.manchester.ac.uk/visit-us

Book onto a guided tour. Held throughout the year, these give you a chance to meet current students and discover the highlights of our campus first-hand.

www.manchester.ac.uk/guidedvisits

www.manchester.ac.uk

Our location:
Manchester Museum is one of our inspiring cultural institutions – read more on p40.
CONTENTS
1 Our cover stars – meet our people and hear their stories
4 WANDER THROUGH KNOWLEDGE
6 Choose Manchester – where education is a force for change
8 Follow in their footsteps – brilliant minds from our history
10 Research beacons – how our research helps the world
14 Pioneering research – why our students chose Manchester
18 Your doorway to the world – gain international employability
20 CREATE YOUR OWN PATH
22 Make a difference – give back to society
24 Studies to suit you – fit postgraduate learning into your life
26 Notes from a graduate – hear from an inspiring alumna
28 Plot your career path – giving you opportunities to develop your skills
30 Access our support – services to help you be your best
32 Value your well-being – first-class sports and well-being
34 GET YOUR BEARINGS
36 Explore Manchester – the best of brilliant Manchester
40 Culture on campus – lose yourself in our culture and heritage
44 Get to know our campus – landmarks, facilities and favourites

134 City map
136 Campus map
You're here because you have a dream: to advance or change your career, to immerse yourself in a subject you love, to meet future mentors, colleagues and friends. At The University of Manchester you’ll find an incredible range of opportunities to take these next steps. You’ll see your dreams take shape and become real.

Let’s start exploring.
At The University of Manchester, the next revolution is never far away.

This is a place where education is a force for change. Since 1824 our doors have been open to the working classes of Manchester, a city characterised by industrial progress and radical spirit.

Here, women fought for equality. Scientists split the atom. A wartime codebreaker shaped the digital lives we now take for granted. Two researchers brought graphene – the wonder material that is one atom thick, but 200 times stronger than steel – to the world.

People provide the revolutionary spark that drives us. Our researchers find solutions to the world’s most pressing challenges, from creating sustainable energy to alleviating poverty. Our students and staff strive to make a difference to society. Our alumni become informed global citizens and leaders in their fields.

Here, ideas become actions – and those actions change lives. We’re a truly international institution, welcoming and influencing thousands of people, communities and organisations across the world, and we enjoy a global reputation for pioneering research and innovation.

www.manchester.ac.uk/postgraduate
1904
Catherine Chisholm becomes the first woman to graduate in Medicine from Manchester Medical School. She helped set up the Manchester Hospital for Babies.

1906
Christabel Pankhurst, who would become a leading figure in the suffragette movement, become the first woman to graduate from the University in Law.

1915
William Bragg, while still a research student, becomes the youngest ever winner of the Nobel Prize in Physics.

1917
Ernest Rutherford becomes the first person to create an artificial nuclear reaction in a laboratory, ushering in a new era of nuclear research.

1919
Marie Stopes, who had been the first female lecturer in the Faculty of Science, founds the pioneering Mothers’ Clinic for Birth Control in London.

1921
Ernest Rutherford becomes the first person to create an artificial nuclear reaction in a laboratory, ushering in a new era of nuclear research.

1921
Freddie Williams and Tom Kilburn create the world’s first digital stored-program computer, ‘the Baby’.

1929
Arthur Lewis, having already become Britain’s first black professor when he joined us, becomes the first black winner of a Nobel Prize in Economic Sciences.

1948
Freddie Williams and Tom Kilburn create the world’s first digital stored-program computer, ‘the Baby’.

1948
Alan Turing, one of the WWII codebreakers, completes pioneering work in machine intelligence at Manchester, paving the way for artificial intelligence.

1957
Bernard Lovell completes the Lovell Telescope, the world’s largest steerable radio telescope at the time, at Jodrell Bank.

1968
Michael Smith, a Manchester PhD graduate, receives the Nobel Prize in Chemistry for his work on DNA engineering.

1968
Bernard Lovell completes the Lovell Telescope, the world’s largest steerable radio telescope at the time, at Jodrell Bank.

1979
Arthur Lewis, having already become Britain’s first black professor when he joined us, becomes the first black winner of a Nobel Prize in Economic Sciences.

1985
Andre Geim and Kostya Novoselov are awarded the Nobel Prize in Physics for their isolation of graphene’s potentially world-changing properties.

www.manchester.ac.uk/heritage

Join a community of global innovators and pioneers whose achievements have helped shape the modern world – a place where 25 Nobel Prize winners have worked or studied.

You’ll study in an academic environment that helps brilliant thinkers turn inspiration into reality, encouraging innovation, experimentation and creative thinking.

Here are just a few highlights from our history.
World-class research lies at the heart of everything we do at Manchester. It informs our courses, unites our disciplines, brings innovation to industry and transforms lives across the globe. Study with us and you’ll learn at the frontier of knowledge, where breakthroughs happen.

We take full advantage of our size and breadth, bringing the best minds together from diverse disciplines and cross-sector partnerships to forge new ways forward in multiple fields. Manchester’s research beacons are exemplars of this collaborative ethos, pioneering innovative solutions to some of the biggest challenges facing the planet today.
1. 1.2 billion people worldwide struggle to access clean drinking water. We’re creating affordable desalination technologies to bring fresh water to everyone.

2. Breast cancer is women’s most common cancer. We introduced the world’s number-one endocrine treatment.

3. To mitigate climate change we need affordable low-carbon energy. We’re creating new designs and technologies for cheaper nuclear reactor construction.

4. One in ten people live below the international poverty line. We’re influencing policies and practices that work to reduce persistent poverty.

5. There’s no test for Parkinson’s disease, which makes treatment hard and a cure impossible. Our biomarker breakthrough may enable early diagnosis, helping to save lives on a global scale.

www.manchester.ac.uk/beacons
Professor Danielle George chats to PhD students Beatriz Costa Gomes (PhD Neuroscience and Mathematics) and David Buil Gil (PhD Criminology and Social Statistics) about the research culture at Manchester.

Danielle: So what brought you both to Manchester?

David: My criminology supervisor’s excellent reputation brought me to Manchester. Having another supervisor from social statistics was also essential, as my work crosses both disciplines.

Beatriz: Manchester had the interdisciplinary approach that I wanted, too – and the prestige. I’ve helped organise a University-wide conference with presentations from all three Faculties; we learned so much from each other. We also do outreach work with the Museum of Science and Industry, and with local schools, making our research easy to explain to kids.

At Manchester we see our students as partners. We need that partnership for both research and teaching to grow.

Professor Danielle George
Professor of Radio Frequency Engineering

Postgraduates often worry about what we’ll do after our PhDs, so working in industry is a great experience for us.

Beatriz Costa Gomes
PhD Neuroscience and Mathematics

My criminology supervisor’s excellent reputation brought me to Manchester.

David Buil Gil
PhD Criminology and Social Statistics

WANDER THROUGH KNOWLEDGE
Danielle: Yes, there’s so much collaboration here; you can work with partners across all three of the University’s Faculties. They bring very different perspectives to the same problem.

David: On one of our programmes, students work with prisoners on a course unit on imprisonment. It’s so cool to learn from the real-life experiences of prisoners – and they in turn learn theories that can help them understand their experiences.

Danielle: I agree. Our research has huge impact in so many areas. We’re truly a local university with a global reach.

David: We also work closely with Greater Manchester Police. Before choosing a research area, we met with them and asked what they needed. Our results will help their work.

Beatriz: That’s good – you’ll work with these kinds of organisations after graduation. I had a three-month internship with IBM. Postgraduates often worry about what we’ll do after our PhDs, so working in industry is a great experience for us.

Danielle: We have links with big FTSE 100 companies, who sponsor much of our research – and with SMEs, who are statistically more likely to employ students. And we’re great at entrepreneurship; students are getting involved in spin-out companies, gaining business acumen.

Beatriz: The best part is that we can leave our comfort zones while staying in a safe area. We can do all these things – outreach, conferences, going into new environments – but the University always has our backs.

Danielle: At Manchester we see our students as partners. We need that partnership for both research and teaching to grow.

David: That makes us feel part of the University!

Danielle: And it doesn’t end. You'll always be Manchester alumni, wherever you go.
Manchester is a truly global university and city. You’ll meet students and staff from near and far, discovering new cultures and perspectives. You’ll leave with broader horizons, international employability and connections across the globe.

Learn a new language – or improve an existing one – on the University Language Centre’s language programme. These may be studied for academic credit or on a non-credit basis.

Support for international students
If you’re coming to Manchester from overseas, your international adventure starts here. You’ll find extra dedicated support to help you feel at home, including:

- pre-departure webinars and face-to-face briefings in several countries;
- advice on immigration and visas;
- a guarantee place in University accommodation throughout your study;**
- a comprehensive orientation and welcome programme;
- a free shuttle service for new students arriving at Manchester Airport;
- 80 student societies dedicated to people and interests from diverse nations, including our welcoming International Society;
- specialised careers support, including international careers fairs and work experience.

www.manchester.ac.uk/international

International numbers
- 40,000 students from 172 countries
- 380,000+ alumni across the world
- Ranked 38th in the world
  (Academic Ranking of World Universities 2017)

- 200 languages spoken in one of the UK’s most multicultural cities

* Ranked 23rd in the QS Best Student Cities 2017
** Subject to meeting certain criteria

Godfrey Shirima
MSc Computer Science
Equity and Merit Scholar from Tanzania

Coming to Manchester has really broadened my perspective on life. Making friends from China, Saudi Arabia, the UK and more, I’ve found that I’ve so much to share with others. I can have a conversation about my experiences and people find it interesting, even inspiring.
A postgraduate degree requires focus – but your life demands balance. At Manchester you can choose a study path that supports your professional and personal development, as well as your well-being. Discover new passions, build industry insight and make a positive difference to the lives of others while gaining skills to help you achieve your brightest ambitions.
MAKING A DIFFERENCE

Social responsibility is embedded in our strategy and culture at Manchester, uniting us in a commitment to have a positive impact in everything we do. Discover what you can contribute to communities and challenges across the globe.

Work with impact – learn about, and contribute to, work that is changing lives for the better across the globe. Take part in public and policy engagement, developing your own ideas while benefiting others. www.manchester.ac.uk/pg-social-responsibility

Volunteer locally and globally – make a valuable difference to communities and environments through hundreds of volunteering opportunities, learning new skills and making community contacts. www.manchester.ac.uk/volunteers

Lead by example – set up a social enterprise with expert support from our intellectual property organisation UMI3, Alliance Manchester Business School and our Venture Further competition. umi3.com

Improve the local environment – take part in our environmental sustainability initiatives. www.manchester.ac.uk/sustainability

Inspire other students – become a student mentor, help teach undergraduate students, or meet and advise local disadvantaged schoolchildren hoping for a brighter future. www.manchester.ac.uk/socialresponsibility

Farhana Choudhury
MEd Psychology of Education
Raising educational aspirations for local students

Working with the Student’s Union and the University’s Widening Participation team, we’re recruiting volunteers from our Islamic Society to help promote higher education in Manchester secondary schools, especially to BAME students. What first made me want to make a difference was acknowledging how others have made a difference to me. Now I never want to stop.

Astrid Weston
PhD Graphene NOWNANO CDT
Bringing sustainable practices to rural communities in India

Through the School of Materials’ Live in Labs project, I helped to build a biogas unit in a village in Karnataka. I loved working with people who really want to have a sustainable country. I also go into schools to teach them about research and how they can get involved. It feels good, as though I’m making a positive difference.

STELLIFY

Postgraduate taught students can also undertake our Stellify activities, offering you even more ways to do more and be more at Manchester. Experience true personal and professional growth, and consider how you can make a difference to others.

www.manchester.ac.uk/stellify

Learn without boundaries

Make a difference

Step up and lead
I've worked in genetics for a few years now, but never had any training in the subject. This course has helped me to understand aspects of my job a lot better – and has been very interesting personally, too. Everyone teaching is really open to students contacting them outside of the course to discuss things; there's a lot of support across the board.

I've discovered how much I love learning. I'd like to do a PhD next; I'm applying for it this year at Manchester.

Stuart Ingram
MSc Genomic Medicine (part-time)
Research manager, husband and father

Studying part-time
Having extra work, family, or financial commitments doesn’t mean you have to give up on your goals. We offer most of our postgraduate research programmes on a full-time and part-time basis, and it may also be possible to study some of our taught postgraduate courses part-time. Check the course listings in this prospectus to see if your preferred programme is available to study part-time (PT).

International applicants from non-EU countries: Please note that terms of entry into the UK normally prevent you from studying a postgraduate taught or research programme on a part-time basis.

Learning from afar
It’s a shame to miss out on living in our incredible city – but sometimes it’s simply not possible to relocate. That’s why some of our postgraduate taught courses and a few of our postgraduate research programmes are available to study off-site as online and blended programmes.

We invest heavily in online and interactive technologies at Manchester to allow our distance learners to connect with staff and fellow students, and enjoy the same support that you would get on campus. We also have international centres in Dubai, Hong Kong, São Paulo, Shanghai and Singapore, enabling us to build strong transnational partnerships and deliver an education designed for today’s executives.

Check the course listings in this prospectus to see if your preferred programme is available via distance, online or blended learning (DL).
Who better to guide you on the journey that lies ahead than somebody who’s studied here before? Winnie Nassolo came from Uganda to study an MSc in Medical and Diagnostic Virology at Manchester, helped by our Equity and Merit Scholarship. After graduating in 2010, she returned home, where she continued her work as a dental surgeon and later became Division Medical Officer. She’s currently a research scholar at Case Western Reserve University in Ohio.

Manchester contributed hugely to the person I am today, helping me to further my career and become a leader in my community. I was very laidback before I went to the UK; Manchester helped me become more focused and ready to accomplish whatever I set my mind to.

I have reason to believe that many epidemics back home in Uganda are due to simple treatable or avoidable organisms that thrive due to our lack of infection control measures – especially in our public hospitals and clinics. An infection from one patient can sweep through whole hospitals, which hold overwhelming numbers of patients.

Once I graduated, I introduced infection control protocols that I learnt at Manchester to the Ugandan clinic where I worked – and then extended this at a community level, covering various clinics and hospitals. This is how we save lives.

Among the many valuable elements of studying at Manchester, one aspect stands out for me: the teamwork spirit. We were constantly encouraged to look out for each other. After I graduated I brought this spirit home with me, helping to build and mentor teams in my workplace that enabled us to meet targets and enjoy great outputs. As a result, I was promoted twice in offices of leadership and recognised as a successful team builder and leader.

My advice to you would be to buckle up and get ready for a rollercoaster ride of intensive study and hard work. You’ll need determination and perseverance in order to achieve your dreams. You’ll get it all from this university.
A postgraduate student you may already have a career path in mind, but we’ll do all we can to help you get there. We’ll give you the opportunities to develop your skills and networks, and support tailored to your needs.

Here are just a few ways you can begin to plan for future success.

**A first-class careers service**

**Professional consultants** – enjoy tailored advice via face-to-face appointments, phone and email.

**An Academic Career** – decide whether your long-term future lies in academia with our award-winning website: [www.manchester.ac.uk/academiccareer](http://www.manchester.ac.uk/academiccareer)

**Manchester Gold and the Manchester Network** – learn from a mentor from among our expansive network of alumni, recruiters and academics.

**Postgrad Essentials** – attend careers workshops to help you with your job search and set yourself apart.

---

**For postgraduate taught students**

**Access to employers** – meet with recruiters – more than 600 visit our campus and recruitment fairs each year.

**Expand your study** – apply your skills by volunteering, make a difference to yourself and to others, or communicate your passion for your subject via our public engagement programmes.

---

**For postgraduate research students**

**Pathways: career options for PhDs** – talk to people in a range of academic and non-academic careers at this annual event.

**Researcher development training** – gain the skills, attributes and knowledge to thrive as an independent researcher and professional.

---

www.manchester.ac.uk/careers @manunicareers

---

www.manchester.ac.uk/stellify

---

**STELLIFY**

Postgraduate taught students can also take advantage of countless opportunities for professional growth through our Stellify activities. Find out more:

- Create your future
- Step up and lead

www.manchester.ac.uk/stellify
We want you to enjoy Manchester postgraduate life to the full. That’s why we offer you experienced, specialist support services to boost your academic and personal development.

You’ll always find a sympathetic ear if you’re worried about any issues relating to your studies, money, health, or well-being.

- **Support staff** in your academic School
- **Student Support and Advice Team** in University Place
- **Students’ Union independent professional advisers**
- **Trained University counsellors**
- **Nightline – an anonymous telephone helpline run by students for students**
- **ResLife teams** in University-managed accommodation

**Disability support**

If you have additional needs arising from a medical condition, physical or sensory disability, specific learning disability such as dyslexia, or mental health difficulty that affects your studies, we can support you. Get in touch with our Disability Advisory and Support Service – you can find out more at:

[www.manchester.ac.uk/dass](http://www.manchester.ac.uk/dass)

**Personal safety**

We have security services, systems and practical safety advice to help keep you and your property safe. You’ll benefit from:

- CCTV and 24/7 security services across campus and University accommodation;
- practical safety advice and support from University staff and Greater Manchester Police.

[www.manchester.ac.uk/securityservices](http://www.manchester.ac.uk/securityservices)

**Immigration advice**

Our Student Immigration Team can offer you UK and Schengen visa-related advice while at Manchester, including information on working in the UK.

Email: [visa@manchester.ac.uk](mailto:visa@manchester.ac.uk)

**Childcare**

Studying while caring for dependents can be a challenge. It’s good to know you’ve got local support.

- **Two nurseries near campus** for children aged between six months and five years – get in touch early to join a waiting list
- **A parents’ and carers’ network** run by the Students’ Union, who can also offer advice and support

**Religious support**

If you want to find out about local faith organisations, explore issues of faith, or discuss a problem with a member of your faith, our diverse community can help.

- **Chaplaincy centres on campus** for Anglican, Baptist, Jewish, Methodist, Roman Catholic and United Reformed Church worship, and prayer facilities for Muslim students
- **Links to more chaplaincies for other faiths, and multifaith areas for quiet prayer and reflection**
- **Student societies for most major religions at our Students’ Union**

[www.manchester.ac.uk/student-support](http://www.manchester.ac.uk/student-support)

**Equality, diversity and inclusion**

You should enjoy a positive learning environment that is free from any discrimination, bullying, harassment, or victimisation; where you’ll be treated with respect and dignity irrespective of your age, disability, ethnicity, gender identity, marital status, nationality, religion or belief (including lack of belief), or sexual orientation.

Find out about our support, and how you can get involved, in equality, diversity and inclusion at Manchester:

[www.manchester.ac.uk/equalityanddiversity](http://www.manchester.ac.uk/equalityanddiversity)

**We belong**

Watch a short film celebrating equality, diversity and inclusion at Manchester:

[www.manchester.ac.uk/we-belong-film](http://www.manchester.ac.uk/we-belong-film)
Investing in your body and mind is particularly important during the mental challenges of postgraduate study. Clear your head, meet new people and gain a healthy work-life balance.

**COMMITTED SPORTSPEOPLE**

43 sports clubs across 39 sports – weekly training with great coaches and matches in the British Universities and College Sports (BUCS) leagues

Sports Scholarships – support for elite athletes at junior international level

www.manchester.ac.uk/elite-sport

**CASUAL PLAYERS**

357 teams in campus leagues – weekly competitions across six sports (including the country’s largest soccer league at Wythenshawe Sports Ground)

SU sport – 60+ sports societies in our Students’ Union

**HARMONIOUS HEALTH-SEEKERS**

Well-being activities – from mindfulness to yoga

Sporticipate – 50+ hours of free weekly activities on campus and in halls

80+ casual classes – from aerobics to Zumba

www.manchester.ac.uk/sport

**WORLD-CLASS FACILITIES**

Make the most of access to one of the UK’s biggest and best swimming facilities, floodlit football pitches, fully equipped fitness suites, various indoor halls and outdoor courts, well-being studios, and much more.

www.manchester.ac.uk/sport-facilities

**JOIN OUR SPORT VOLUNTEER SCHEME**

Gain valuable experience, coaching qualifications, personal skills and new friends.

www.manchester.ac.uk/sport-volunteering

It’s a nice change of environment. During the day you’re focused on your studies, then during training you get to escape, keep your mind on other things. And it’s a great way to meet other people.

**Jason Hui**
PhD Materials  
University Badminton Club

As a Focus Sport Scholar at Manchester I get extra support with strength and conditioning, nutrition, physiotherapy, psychological help and funding.

**Olivia Wimpenny**
MA International Business Management  
GB Lacrosse player and University Lacrosse Team Captain

Olivia Wimpenny

www.manchester.ac.uk/elite-sport
Before you start to explore, it’s good to get to know your surroundings. Get a head start by taking a look at our inspiring city, welcoming campus and breadth of accommodation options. The deeper you dig, the more you’ll discover.
EXPLORE MANCHESTER

Discover the creative, cosmopolitan city that has led global revolutions in industry, politics, sport, technology and music – yet still finds the time to relax and unwind.

Head out of town
Manchester is surrounded by some of Britain’s most beautiful countryside. Head for the hills of the Peak District and Lake District, or the beaches of North Wales.

Buzzing
Manchester’s official symbol, the busy bee represents the hive of industry in which the city formed, and the hard-work ethic and thriving community that endures today.

Hanlin’s pick: afternoon tea
My introduction to British tea was truly memorable. Sitting on comfy sofas with friends, enjoying finger sandwiches, macaroons and puddings, surrounded by people talking gently and intimately to each other – it was wonderful.

Hanlin Wang
MA International Fashion Retailing (Multichannel Marketing)

Museum of Science and Industry
On the site of the world’s first inter-city railway, MSI explores ideas and technologies that changed the world.

Top locations for a great night out
Mackie Mayor
Fabulous food from independent traders in a Grade II-listed hall.
HOME
A creative hub for contemporary art, theatre, film and food.
Deansgate Locks
Six bars and a comedy club at this bustling canal side spot.
Real Junk Food Manchester
‘Pay as you feel’ for good food that would otherwise have gone to waste.
All Star Lanes
Go bowling US style.
“Enjoy cheap student tickets and cracking theatre performances at HOME, the Royal Exchange and the Lowry.”

Bury Market is a proper traditional affair selling cheap vegetables, interesting bric-a-brac and the famous Bury black pudding.

Bridgewater Canal offers 41 miles (66 km) of uninterrupted waterside walkways, perfect for peaceful walks, running, cycling and spotting the occasional heron.

Bridgewater Hall
International concerts and world-famous orchestras.

Manchester Arena
The UK’s largest indoor venue for global bands and artists.

Northern Quarter
The city’s indie district, home to boutique bars, cool cafes, guerrilla art, quirky fashion trends and creative entrepreneurs.

Manchester is synonymous with football, home to international giants Manchester United and Manchester City, non-league and grassroots teams, and the National Football Museum.

Explore Greater Manchester via the Metrolink. My highlights are Heaton Park, the trendy suburb of Chorlton, Altrincham ice rink, and the old docks at Salford Quays.

Sounds of the city
Manchester Academy
Three musical venues at our Students’ Union.

Piccadilly Records
Independent record store selling sounds since 1978.

Parklife
Hugely popular weekend festival held in Heaton Park.

Discover more at:
www.manchester.ac.uk/manchester
CULTURE ON CAMPUS

Explore multiple histories, be inspired by diverse artistic talents and lose yourself in absorbing classic and contemporary performances, courtesy of our many cultural offerings around campus.

Manchester Museum
Bringing ancient worlds to life on our campus, with a rotating programme of exhibitions.

Arthur’s pick: The John Ryland’s Library
My favourite part of John Ryland’s Library is the Historic Reading Room – its astonishing Gothic interior houses a wonderful collection of books, and the alcoves are filled with antique furniture and warm study spaces. The entire library is filled with vintage colours and symmetrical lines; it’s an architectural photographer’s dream. Staff are welcoming and informative too!

Arthur Yushi
PhD Neuroscience

Jodrell Bank Discovery Centre
A short trip into the neighbouring Cheshire countryside brings you to the iconic site of the Lovell Telescope.

Martin Harris Centre for Music and Drama
Concerts, theatre and literary performances at the heart of campus.

bluedot
Every summer at Jodrell Bank the stars of music, art and science collide in this intergalactic festival.

www.discoverthebluedot.com

www.manchester.ac.uk/attractions
Manchester was the UNESCO City of Literature in 2018, and the incredible Manchester Literature Festival (MLF) showcases the best of our literary heritage and contemporary talent. The University hosts and supports many MLF events each year. Come along and widen your world.

www.manchesterliteraturefestival.co.uk

Our University’s heritage and history tours reveal why Manchester is the incredible place it is today. Seeing beneath the skin of contemporary Manchester and sensing that history will make you feel closer to the city.

www.manchester.ac.uk/heritage

In Conversation with Jeanette Winterson
In Conversation is a series of readings and discussions with distinguished guests at the invitation of Professor Jeanette Winterson.

Previous In Conversation events have included guest authors Lynne Truss, Audrey Niffenegger, and AL Kennedy.

“The University of Manchester”

Lemn’s Cultural Manchester
University Chancellor and world-famous poet Lemn Sissay shares his favourite cultural aspects of our city.

In Conversation with Jeanette Winterson
In Conversation is a series of readings and discussions with distinguished guests at the invitation of Professor Jeanette Winterson.

Previous In Conversation events have included guest authors Lynne Truss, Audrey Niffenegger, and AL Kennedy.

The Whitworth
View international exhibitions at the Whitworth, the University’s own art gallery.

www.manchester.ac.uk/whitworth

“See a show at Contact Theatre. Brilliant radical youth theatre at the top of its game, here on our campus. contactmcr.com

Rusholme and Chinatown: these are major arteries of cultural Manchester. Try the food – look to see where the locals eat. Truly top notch.”
GET TO KNOW OUR CAMPUS

Our friendly, self-contained campus is not just a place of game-changing academic discoveries – it’s a place for exploration and inspiration in its own right.

The Old Quad
Completed in 1902, this quiet quadrangle is the focal point of our campus, surrounded by some of the most iconic of our historic Gothic buildings. www.manchester.ac.uk/historic-buildings

Fizza’s campus
I loved the campus from the first moment; I love its amazing blend of modern and historic buildings.

There’s a lot of study space available around campus. I love the fact that we have PC clusters open through the night, 24/7, so a night owl like me can be productive when it suits me.

The Learning Commons is very fancy – and popular with all the students.

Fizza Akbar
PhD Genomic Medicine

Campus landmarks
Whitworth Hall
You’ll graduate at this Grade II-listed Victorian building.

Alan Gilbert Learning Commons
Open 24/7 in term-time, this is the ultimate student learning space.

University Place
A hub for University events and student support.

The University of Manchester Library
One of only five National Research Libraries in the country.

National Graphene Institute
Our world-leading facility for graphene research features state-of-the-art cleanrooms, laboratories and a sustainable rooftop garden.
Exercise is a great way to unwind, and the University has some excellent facilities and activities. I play in the campus netball league at the Sugden Sports Centre—the leagues have an amazing social aspect too.

“Jodrell Bank is such a peaceful and productive place to work. To have those iconic telescopes standing just outside your window is something really special. The gardens are just a short walk away, and every time you visit you notice something new.”

My go-to place for lunch or coffee is the Greenhouse vegetarian cafe in the George Kenyon Building. There’s a wide range of vegan options, and outdoor seating that’s lovely in the sunshine.

I do most of my work in an open-plan office in the Alan Turing Building. There’s always someone around whose brain you can pick. Proximity to a coffee maker is a bonus!

Emma’s Campus

Astrophysics research student Emma Alexander describes her favourite places to work and relax on campus.
or most of you, Manchester won’t just be your next stage of education; it’ll be your new home for a year or more. You’ll find a range of accommodation options for postgraduate students, from contemporary and traditional halls of residence to a specialist advice service for those interested in private letting.

**University accommodation**

From the moment you arrive, you’ll be able to access support to help you make the most of your time in University accommodation. Our ResLife team will settle you into an inclusive and supportive community, where you’ll meet people from around the world. ResLife advisers are on hand in every hall, so you’ll find advice on your doorstep whenever you need it.

Each hall is a self-contained community with their own residents’ associations or common rooms where you can make friends and enjoy various social activities. Some also have their own bars. Your options include:

- postgraduate-only accommodation;
- single or mixed-gender accommodation (subject to availability);
- catered or self-catered facilities;
- en-suite or shared bathroom facilities;
- specially adapted rooms for students with disabilities;*
- a limited supply of accommodation for families and couples.*

*Please contact our Accommodation Office before you arrive to discuss your needs.

**Costs**

Your rent includes all utility bills, insurance and Internet (either WiFi or a wired Ethernet point), and you’ll find options to suit all budgets.

- Single self-catering room with shared facilities – from £112 a week (Whitworth Park, 51-week let)
- Single self-catering room with en-suite facilities – £131 a week (Weston Hall, 51-week let)
- Single room with shared facilities in a catered hall – £123 a week (Ashburne, 51-week let)
- Single room with shared facilities in a catered hall – £123 a week (Ashburne, 51-week let)

Costs are based on 2018/19 prices and may be subject to change; they may also vary depending on facilities. Accommodation contract lengths may vary depending on your residence.

**Accommodation guarantee for international students**

If you’re based outside the EU, we can guarantee you a place in a hall of residence for the full duration of your course, provided you:

- come to university alone;
- firmly accept a place to study here by 31 August of your year of entry;
- apply for accommodation by 31 August;
- re-apply for accommodation in subsequent years by the deadline and for the full academic year.

If you do not meet the conditions of our guarantee, you may still apply for University accommodation, but we may not be able to offer you a room immediately.

---

Oishee Kundu
PhD Science, Technology and Innovation Policy
ResLife Adviser at Oak House

University accommodation is a really easy way to move into a new country or a new place. It’s comfortable, you don’t have to worry about bills, and for postgraduates in particular it ensures you meet people who are doing different things to you. It’s a nice world to live in.

Becoming a ResLife adviser gave me the chance to explore a different dimension of myself. It’s given me responsibility, a side project away from my studies, and a better social life. I’ve had great conversations with some of the undergraduates, learning more about the UK and a way of life I’ve never known.

---

GET YOUR BEARINGS
Private accommodation

If you prefer not to live in halls, contact Manchester Student Homes – the best source of information and advice on privately rented student accommodation in Manchester.

Living at home

If you decide to live at home while you study at Manchester, you’ll still have plenty of opportunities to get involved in student life. Our Students’ Union services for students living off-campus include:

- Students Living at Home Society;  
- a transport buddy system;  
- day trips and networking events;  
- the Mature Students’ Society.

**manchesterstudentsunion.com/livingathome**

Where you’ll be based

Our accommodation is set across three main areas, all within easy reach of the campus, the city and amenities. Each area offers something different but all offer a great place to live and study.

- **City (seven sites)**
  Our city accommodation is located close to the city centre and at the heart of our teaching campus.
  **Average journey to campus:**
  - 10 minutes on foot
  - 7 minutes by bike
  - 5 minutes by bus

- **Victoria Park (eight sites)**
  Leafy and tranquil, Victoria Park is just a brisk walk or a short bike ride away from campus.
  **Average journey to campus:**
  - 18 minutes on foot
  - 5 minutes by bike
  - 6 minutes by bus

- **Fallowfield (seven sites)**
  A vibrant, mixed residential suburb, Fallowfield offers plenty of amenities. It’s also within easy reach of the city centre.
  **Average journey to campus:**
  - 30 minutes on foot
  - 8 minutes by bike
  - 15 minutes by bus

**www.manchester.ac.uk/maps**

Entry requirements

The following pages list all our postgraduate degree courses, arranged under broad subject areas.

For entry requirements, please see p124, or for specific programmes, see the directory at the back of this prospectus. For details of how to apply, see the guide enclosed in the front cover.

For the most up-to-date programme information

This prospectus was printed in June 2018 for the purposes of the 2019 intake. It has therefore been printed in advance of programme starting dates. For this reason, information (in relation to programme content, module availability etc) may be amended prior to your applying for a place on a programme of study.

There are a number of reasons why changes to programme information and/or published term dates may need to be made prior to your applying for a place on a programme. These may include, but are not limited to, the following: the need to make reasonable changes to the content and teaching offered in relation to any programme for operational and/or academic reasons; the withdrawal of programmes due to insufficient cohort numbers; a programme not receiving the relevant accreditation required; and/or interruption or loss of key services due to circumstances beyond our control, including fire, flood or other operational issues.

Prospective students are therefore reminded that they are responsible for ensuring, prior to applying to study on a programme of study at The University of Manchester, that they review up-to-date information by searching for the relevant programme at:

- www.manchester.ac.uk/pt-programmes
- www.manchester.ac.uk/pg-programmes

Further information describing the teaching, examination, assessment and other educational services offered by The University of Manchester is available at:

- www.manchester.ac.uk/postgraduate

In this prospectus you will find an overview of the University’s pastoral and student support services; further information is available from each service’s website.

Prospective applicants should therefore familiarise themselves with this information prior to applying to study on a programme of study at The University of Manchester.

www.manchester.ac.uk/study
AEROSPACE ENGINEERING

Discover more www.manchester.ac.uk/mace

Gain a thorough understanding of engineering principles, coupled with excellent practical and personal transferable skills, with a postgraduate degree in Aerospace Engineering at Manchester.

Our graduates are held in high regard by industry and find rewarding work in all sectors of engineering.

Our research areas include aerodynamics, acoustics, autonomous systems, and engineering design and optimisation. In close collaboration with the aerospace industry, we undertake cutting-edge research of practical importance, using both experimental and computational approaches.

Our MSc courses are fully accredited. Graduates are recognised by the IMechE and the Royal Aeronautical Society as having the academic qualifications required for the status of Chartered Engineer.

You'll have the opportunity to apply the theory and concepts you'll learn during your programme to the practical design of aerospace vehicles.

Each of our PhD students has a dedicated place in our research village, sharing space with other PhD students working on similar topics. The village offers individual study areas, computer spaces, meeting rooms, a kitchen, and much more. ‘Village reps’ regularly meet with our Director of Graduate Studies to discuss relevant issues and organise social events.

RESEARCH PROGRAMMES
Aerospace Engineering MPhil/PhD

You might also be interested in: Chemical Engineering and Analytical Science; Civil Engineering; Electrical and Electronic Engineering; Environmental Engineering; Mechanical Engineering.

FUNDING
A number of funding opportunities are available for UK and international students. For more information, including details on our President’s Doctoral Scholar Award and external funding schemes, please visit www.manchester.ac.uk/mace/study/postgraduate-research/funding

CAREERS
Our graduates go on to pursue exciting and interesting careers in airframe manufacturing, gas turbine and aircraft systems industries, defence laboratories, consultancy and management, and academic research.

WHY MANCHESTER?
World-leading in many research areas, from computational fluid dynamics to how engineering impacts public policy, with 100% of our impact case studies graded as "internationally excellent" or "world-leading" (REF 2014).

More than 200 years’ expertise in teaching engineering.

Strong industrial links with Airbus, Rolls-Royce, EADS, Dstl, MBDA and ESTEC/ESA, and a preferred academic partner for BAE Systems in experimental aerodynamics and dynamic loads.

ALLIANCE MANCHESTER BUSINESS SCHOOL

Discover more on taught at www.mbs.ac.uk/masters

Our doctoral programme is one of the most highly respected across the globe and attracts outstanding students. You'll join our community of more than 300 specialist academic and research staff.

We adopt an international perspective across all our programmes, giving you the opportunity to experience different cultures. Our links with more than 35 international institutions offer opportunities to study overseas, and you'll study alongside students from 68 different countries.

Some of our master’s courses are accredited by professional bodies, such as the Chartered Institute of Personnel and Development, and the British Psychological Society. The Chartered Financial Analyst Institute has also awarded partnership status to our MSc Accounting and Finance and MSc Finance courses.

We became Alliance Manchester Business School in September 2015 following a landmark £15 million donation from Lord Alliance of Manchester and his trustees, in recognition of his longstanding relationship with our School and University. The donation is being invested in the School’s new building, due to open in late 2018, and is driving our research agenda forward. Together, this will enhance the learning experience for all students.

Alliance Manchester Business School (AMBS) has a global reputation for innovative and influential teaching and research that impacts business on a local, national and international level. We call this ‘Original Thinking Applied’.

Our specialist master’s courses combine academic excellence with a focus on real-world business and management practice. Our courses provide you with the knowledge and ability to excel in today’s business environment.

The Manchester MBA offers the experience of a lifetime that will change the way you do business. With full-time and part-time study options, our MBA programmes attract high-calibre students from prestigious companies around the world.

WHY MANCHESTER?
One of the UK’s first business schools established in 1965, and one of the largest campus-based business and management schools in the UK.

Ranked 4th in the UK, 10th in Europe and 36th globally, climbing the rankings to cement our position in the world elite (Financial Times Global MBA Ranking 2018).

Dedicated Alliance MBS Postgraduate Careers Service

One of only 1% of triple-accredited business schools in the world (AMBA – Association of MBAs, and EQUIS).

Rated second in the UK for research power (REF 2014).

FUNDING

Our master’s students are typically supported by the student loans system, sponsored by their employers or by external funding agencies, or they are self-funding. Architecture PhD students may be eligible for a studentship from the Arts and Humanities Research Council (AHRC).

CAREERS

Our MArch is recognised as a Part 2 qualification by the Architects Registration Board and the Royal Institute of British Architects.

The MA in Architecture and Urbanism will equip you with the skills to research how global, cultural and economic forces influence contemporary cities and explore the design, functioning and future of urban situations towards the development of sustainable cities.

WHY MANCHESTER?

Manchester School of Architecture is ranked seventh in the world and second in the UK (QS World University Rankings 2018)
New architecture studios, workshop and model-making spaces, plus industry-standard computer-aided design software
Strong links with leading architectural practices, who attend our end-of-year shows.

NEW ARCHITECTURE STUDIOS, WORKSHOP AND MODEL-MAKING SPACES, PLUS INDUSTRY-STANDARD COMPUTER-AIDED DESIGN SOFTWARE

Manchester School of Architecture is an innovative collaboration between Manchester Metropolitan University and The University of Manchester. You’ll have access to the facilities and resources of both universities.
**ART HISTORY AND VISUAL STUDIES**

Study with us and join a team of art historians, critics and theorists working at the forefront of the discipline. We’re noted for research strengths in: medieval England and Italy; Italian and Northern Renaissance; Renaissance print culture; history of architecture; history of gardens; art and science; British art in the 18th and 19th centuries; Romanticism and its reception; modernism and the historical and neo-avant-gardes; surrealism, contemporary art and art theory; art and sexuality; art and magic; art and psychoanalysis; poststructuralism; history and theory of photography and film; and experimental art-writing.

Our award-winning, University-owned cultural resources include: the Whitworth, our outstanding art gallery in the park; John Rylands Library; a spectacular neo-Gothic building housing one of the world’s finest collections of medieval illuminated manuscripts and rare books; and Manchester Museum, which holds outstanding collections of archeological, ethnographic and classical artefacts.

Our Whitworth Studies programme supports interdisciplinary research projects between our students, the Whitworth, artists, curators, and visiting researchers from other universities.

As well as providing purpose-built resources, our Graduate School delivers training, workshop sessions and programmes, each designed to foster the continual professional development of our postgraduates. We have close connections with the University’s Centre for Museology, and our Centre for Interdisciplinary Research in Arts and Languages supports cross-disciplinary activities and exchanges within the School of Arts, Languages and Cultures, and beyond.

One of the fastest-growing creative hubs in the UK, Manchester is globally renowned for its art and culture. It’s home to major galleries and cultural institutions: The Lowry, Manchester Art Gallery and The Centre for Chinese Contemporary Art, alongside the BBC at Salford, Manchester International Festival and HOME, the largest combined arts centre outside London.

As a postgraduate student in our School of Arts, Languages and Cultures, you’ll have access to our dedicated graduate school, which provides purpose-built resources and delivers training, workshop sessions and programmes designed to foster your continual professional development.

**FUNDING**

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: [www.manchester.ac.uk/alc-funding](http://www.manchester.ac.uk/alc-funding)

**WHY MANCHESTER?**

- **Join one of the UK’s top three art history departments, as ranked in the most recent Research Excellence Framework (REF 2014).**
- **Enjoy exclusive access to our award-winning cultural resources, including the Whitworth and Manchester Museum.**
- **Benefit from our strong working relationships with many museums and galleries across the region and beyond, including TATE Britain and TATE Modern.**

**RESEARCH PROGRAMMES**

- **Art History and Visual Studies PhD**

**You may also be interested in:** Arts Management and Cultural Policy; Museology for Museology, and our Centre for Interdisciplinary Research in Arts and Languages supports cross-disciplinary activities and exchanges within the School of Arts, Languages and Cultures, and beyond.

**TAUGHT COURSES**

You may also be interested in: Arts History and Visual Studies; Drama; Heritage Studies; Languages and Cultures; Museology; Music.

**ARTS MANAGEMENT AND CULTURAL POLICY**

Manchester’s Institute for Cultural Practices provides leading teaching, knowledge exchange and research training for arts and cultural managers. Our practice-based master’s courses have a vocational emphasis, building a bridge between education and professional life.

Our MA in Arts Management, Policy and Practice brings together history, theory and practice in diverse areas, including: production and programming; strategic management and leadership; finance; marketing; audience development; engagement and participation; and education. It combines practical, hands-on work with a solid theoretical grounding, exploring cultural policy and encouraging critical engagement, informing contemporary arts and cultural management practice. The course serves as an entry-level qualification for recent graduates, while also offering professional development for early and mid-career practitioners.

Our staff are active in academic research, professional development training and consultancy. Research specialists encompass: health care, performance and activism; understanding participation and engagement; culture, place-making and regeneration; digital heritage and digital media for curation, interpretation and learning; the politics of cultural policy; past and present; the theory and practice of the art market; and interdisciplinary exhibition-making.

**FUNDING**

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: [www.manchester.ac.uk/alc-funding](http://www.manchester.ac.uk/alc-funding)

**WHY MANCHESTER?**

- **Benefit from more than 50 active partnerships with arts and cultural organisations, venues and programmes.**
- **Enjoy access to award-winning cultural resources on campus, including the Whitworth and Manchester Museum, as well as Jodrell Bank Discovery Centre, which hosts the bluedot festival.**
- **Study in a city internationally renowned for its arts and cultural scene, home to numerous galleries, theatres and music venues, including Manchester International Festival and HOME, the largest combined arts centre outside of London.**

**CAREERS**

As well as further research, our postgraduates pursue successful careers as managers, administrators, policymakers, and practitioners in various branches of the arts, cultural and creative industries. Working locally, our students gain skills that are applicable internationally, and our growing alumni network stretches across the globe.

**TAUGHT COURSES**

WHY MANCHESTER?

Be part of a university whose research influences, underpins, and delivers improved services in international health care and education. 88% of our research is rated “internationally excellent” or “world-leading” (3* or 4*) (REF 2014).

Our multidisciplinary research team includes professionals in audiology, hearing therapy, deaf education and medicine, psychoacoustics, electrophysiology, and neural imaging.

Gain valuable practical experience via close links with colleagues in clinical psychology and psychology, and professionals in local health services.

Postgraduate research students enjoy excellent training opportunities and support through our Doctoral Academy.

Our MSc in Audiology is ideal for science graduates who want to develop their knowledge and understanding of audiology, learning from international experts at the Manchester Centre for Audiology and Deafness. You’ll focus on the theoretical, practical and clinical basis of the science of audiology, including the identification, assessment, rehabilitation and management of adults and children with audiological and vestibular dysfunction. The course includes two short clinical placements – one in an NHS audiology department and one in the independent sector.

To be registered as a qualified audiologist you will require further clinical training after the MSc; Manchester offers you this through our Certificate of Clinical Competence programme with integrated teaching certificate. Complete single units for CPD purposes, 60 credits for a PGCert, 120 credits for a PGDip, or 120 credits plus a dissertation for the MSc.

AUDIOLOGY

Discover more www.manchester.ac.uk/bmh/study/masters www.manchester.ac.uk/bmh/study/research

Our postgraduate opportunities span all fields of life sciences, from the molecule in a cell, to the whole organism and environment. We offer more than 28,000m² of research space for the biological sciences, and we proudly foster a scientific culture in which there are no traditional barriers between research disciplines. Shared expertise and the development of new technologies enable us to approach important bioscience problems using novel and innovative methods.

BIOLOGICAL SCIENCES

Discover more www.manchester.ac.uk/bmh/study/masters www.manchester.ac.uk/bmh/study/research

Our MSc in Audiology helps practising audiologists and other health care professionals prepare for advanced roles in clinical management, clinical practice, teaching and research. Wide-ranging units include Paediatric Audiology, Vestibular Assessment and Management, Adult Auditory Assessment and Management, Developing Deaf Child for Paediatric Audiologists, and Language Acquisition – all accredited by the British Academy of Audiology.

### CHEMICAL ENGINEERING AND ANALYTICAL SCIENCE

Discover more [www.manchester.ac.uk/ceas](http://www.manchester.ac.uk/ceas)

As one of a small group of elite chemical engineering departments in the UK, our success capitalises on the synergies between chemical engineering and bioscience, chemistry, mathematics, and analytical and measurement science.

Our broad research base enables us to study the design, operation and integration of different complex systems – particularly industrial, biological and instrumentation – and to apply chemical engineering in a 21st-century context.

Explore our virtual open day to find out more about Chemical Engineering and Analytical Science, and what being a student at Manchester is all about:

[http://epasssets.manchester.ac.uk/live/chem_eng/vod](http://epasssets.manchester.ac.uk/live/chem_eng/vod)

---

### FUNDING

We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships. These include the Biotechnology and Biological Sciences Research Council, Medical Research Council, Engineering and Physical Sciences Research Council, Wellcome Trust and a PhD programme at ASTAR Singapore. We also offer a number of scholarships and awards for outstanding international students, as well as a unique International PhD programme with integrated teaching certificate.

### CAREERS

Our graduates get excellent jobs. Chemical engineers are among the highest-paid professionals in the engineering field.

Our postgraduate degrees meet the needs of employers by helping to develop skills required for a successful career, such as design, problem solving, numeracy, analysis, communication and teamwork. Thanks to our excellent international reputation, a postgraduate qualification from Manchester will significantly boost your global career opportunities.

---

### FUNDING

You’ll find a number of funded PhD studentships linked to specific research projects. Eligible students can apply and awards will be based on the merit of your application against the applications of other candidates.

---

### WHY MANCHESTER?

Come to the birthplace of chemical engineering – a discipline created by George E Davis at Manchester Technical School in 1887, who wrote the first chemical engineering textbook.

Discover some of the best research facilities of any chemical engineering school in the UK, including a large and well-equipped pilot scale area.

Join one of the top four places in the UK to study chemical engineering (QS Rankings 2016).

Our Athena SWAN Silver award recognises our commitment to advancing the careers of women in science, engineering and technology in higher education.

90% of our research is described as "internationally excellent" or "world-leading" (3* or 4*) (REF 2014).

---

WHY MANCHESTER?

Distinguished history of chemical innovation, from John Dalton and the birth of modern chemistry, to Nobel laureates and Manchester graduates John Polanyi and Michael Smith.

Ranked 5th in the UK, 7th in Europe and 38th worldwide for Chemistry (QS World University Rankings 2016).

Study at a multicultural university in a modern and diverse city with a large international community; each year we welcome students from up to 50 countries around the world to our School.

One of the largest research schools in the UK, and the premier institution for chemistry in the north of England.

Our Athena SWAN Silver award demonstrates our commitment to tackling gender inequality and unequal representation of women in science.

92% of research described as “internationally excellent” or “world-leading” (3* or 4*) (REF 2014).

FUNDING

We offer a number of funded studentships for postgraduate study. Our current students are funded by the Medical Research Council, Biotechnology and Biological Sciences Research Council, and Engineering and Physical Sciences Research Council, to name but a few. Find opportunities online:

www.manchester.ac.uk/chemistry/our-research/studentships

CAREERS

You’ll develop both transferrable and specific skills needed for different careers, giving you excellent employment prospects. Many of our master’s students progress to PhD study. Several of our PhD graduates have taken up postdoctoral research positions in the UK or overseas; others have chosen careers in academia or moved into industries such as GlaxoSmithKline, AstraZeneca and NNL.

CIVIL ENGINEERING

We offer comprehensive academic coverage across the chemical sciences and in all core sub-disciplines of chemistry. You’ll benefit from our strong research links with more than 80 companies and more than 150 overseas universities and research institutes.

We partner with the University’s Manchester Institute of Biotechnology, Dalton Nuclear Institute, Photon Science Institute and National Graphene Institute. Supported by industry, these institutes unite research communities across chemistry, biosciences, materials, engineering and mathematics, making Manchester a powerhouse of innovative interdisciplinary research and technology.

Our researchers enjoy world-class facilities and a broad range of research centres, including the Centre of Excellence for Biocatalysis, EPSRC National Facility and Service for EPR, Dalton Cumbrian Facility, Organic Materials Innovation Centre, Centre for Radiochemistry Research, Centre for Nanoporous Materials, and Michael Barber Centre for Mass Spectrometry.

WHY MANCHESTER?

Long-established large-scale experimental facilities include laboratories for materials testing, heavy structures, fire testing, geotechnics, hydraulics and wind tunnels.

Our programmes within the management of projects field specialise in conflict and dispute resolution, people, organisations and culture, risk management, and performance management and evaluation.

Strong teaching and research links with more than 300 companies, including industrial links with EDF, GL-Garrad Hassan, Alstom Renewables (Tidal Generation Limited), Offshore Design Engineering and Tecnalia.

100% of our impact case studies were graded as ‘internationally excellent’ or ‘world-leading’ (3* or 4*) in the last Research Excellence Framework (REF 2014).

FUNDING

You’ll find a number of funding opportunities available for UK and international students. For details, including on our President’s Doctoral Scholarship Award and other external funding schemes, visit:

www.manchester.ac.uk/mace/study/postgraduate-research/funding

CAREERS

Our postgraduates pursue a wide range of careers in theoretical and applied research, project appraisal, implementation and management, as well as civil/structural design and analysis.
ANCIENT HISTORY

Our MA in Classics and Ancient History is flexible and wide-ranging. It reflects the broad, multidisciplinary nature of the subject, which includes Latin and Greek language, the history of Greek and Roman antiquity from archaic times to the beginning of the Middle Ages, and Greek and Roman literature, philosophy and culture.

Our extensive collection of specialist research includes many diverse topics: Greek social history; history of slavery; war and the commoration of war; ancient epistemology; papyrology and epigraphy; gender, family, and the household; comparative mythology; classical philology and linguistics; Attic oratory; Roman national identity and imperial ideology; Graeco-Arabic tradition; Greek and Roman philosophy and Hellenistic poetry.

We are proud to be able to offer you a comprehensive and balanced coverage of Greek and Roman history (social, cultural, and intellectual, as well as political, economic, and military), and of Greek and Latin languages and literature, both prose and verse, from Homer to Late Latin texts.

As a master’s student, you’ll learn Greek or Latin as part of your course – prior knowledge of which isn’t essential.

As a master’s student, you’ll learn Greek or Latin as part of your course – prior knowledge of which isn’t essential.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. Find out more online:

TAUGHT COURSES

Our PhD training also includes specialist language support, including lesser-known ancient languages, as well as technical skills such as papyrology and paleography.

RESEARCH PROGRAMMES

Our extensive collection of specialist research areas includes many diverse topics: Greek social history; history of slavery; war and the commoration of war; ancient epistemology; papyrology and epigraphy; gender, family, and the household; comparative mythology; classical philology and linguistics; Attic oratory; Roman national identity and imperial ideology; Graeco-Arabic tradition; Greek and Roman philosophy and Hellenistic poetry.

We are proud to be able to offer you a comprehensive and balanced coverage of Greek and Roman history (social, cultural, and intellectual, as well as political, economic, and military), and of Greek and Latin languages and literature, both prose and verse, from Homer to Late Latin texts.

As a master’s student, you’ll learn Greek or Latin as part of your course – prior knowledge of which isn’t essential.

CAREERS

Recent PhD graduates have gone on to research fellowships and academic positions in UK and overseas universities including Oxford, UCL, Exeter, Leeds and Manchester. Our master’s students have progressed to PhD study, as well as to careers in teaching, research and local and central government.

WHEN MANCHESTER?

Ranked in the top 5% in the UK for “research quality” in the most recent Research Excellence Framework, which also confirmed that we offer the best environment in the UK for computer science and informatics research (REF 2014)

Pioneering research includes new brain-like computer architectures, low-power chip design, medical imaging techniques and new technologies to exploit the power of the web

Opportunities to showcase your own research and to network and contribute to international conferences and journals

First-rate facilities with world-class training and support

FUNDING

We have invested in a range of MSc and PhD studentships for home and international students, which are awarded on a competitive basis. Find out more online:

Join our prestigious Centre for New Writing, which brings together the biggest names in contemporary literature to teach you how to write novels, short stories, poems and screenplays. Here, talented writers and critics meet to exchange ideas and opinions, founded on the simple but important principle that good writing and good reading go together.

You’ll enjoy: seminars with Jeanette Winterson; workshops in fiction and poetry led by award-winning writers; one-to-one instruction from writers-in-residence; Literature Live, a fortnightly reading series featuring the best contemporary novelists and poets; skills-related sessions by professionals in the publishing industry; and regular visits from literary agents and editors.

We work with talented, committed students in every style and genre, and we pride ourselves on giving detailed, individual feedback both in writing and face-to-face. Our PhD supervision currently includes work on historical fiction, representations of disability, the long poem, fairy tales, narratology and the Bildungsroman.

Our MA Screenwritings is a highly selective, vocationally oriented course that trains exceptional writing talent to enter the UK film and television industries. You’ll gain hands-on industry experience through a four-week summer internship at a leading UK film production company. The course advisory board includes major names such as Tony Garnett, Russell T Davies and Abi Morgan.

Our MA Screenwriting is a highly selective, vocationally oriented course that trains exceptional writing talent to enter the UK film and television industries. You’ll gain hands-on industry experience through a four-week summer internship at a leading UK film production company. The course advisory board includes major names such as Tony Garnett, Russell T Davies and Abi Morgan.

You might also be interested in: Drama; English Literature and American Studies; Linguistics and English Language; Modern Languages and Cultures.

Our MSc/PGDip Deaf Education course will help you to train as a Teacher of the Deaf if you’re a qualified teacher, or develop research skills that can be applied to this field, helping deaf children across the world reach their full potential.

We offer bespoke training to meet your individual learning needs, which may be required for some learners moving from mainstream teaching. You’ll learn theoretical and practical skills that will help you provide quality support to deaf children and their families.

You’ll undertake two placements, each lasting four weeks; these may be in a school, resource base, or with a periaptatic service. You’ll also study six course units: Language Acquisition, Curricular Access, Developing Child, Audiological Management, Language Assessment, and Policy and Practice.

Research into radio aids, complex needs, theory of mind, remote placement supervision and Auditory Neuropathy Spectrum disorder all add to our rich training opportunities.
Our wide range of courses offers you the flexibility to further your skills and knowledge in a research capacity (MPhil/PhD), or through a one-year full-time, two-year part-time, or three-year full-time clinically taught course. If you wish to combine clinical work with research, we offer a four-year clinical PhD.

As a student on a taught course, you’ll benefit from a large degree of clinical hands-on experience in small groups that ensure optimal staff-to-student interaction.

We have a well-established history of providing quality taught dental courses, with long-standing courses in Endodontics, Fixed and Removable Prosthodontics, Oral and Maxillofacial Surgery, Dental Implantology and Orthodontics and, more recently, courses in Periodontology, Dental Public Health (distance learning) and Restorative and Aesthetic Dentistry (distance learning, collaborative course). We also launched a distance-learning course in Evidence-Based Health Care in 2016.

WHY MANCHESTER?

- Consistent high performances in league tables and student satisfaction surveys
- 88% of our research is rated “internationally excellent” or “world-leading” (3* or 4*) (REF 2014)
- Our internationally recognised four-year clinical PhD allows you to maintain and develop clinical skills while completing doctoral research, and can be tailored to accommodate your research and clinical specialty interests.
- Postgraduate research students benefit from training opportunities and support through our Doctoral Academy.

DRAMA

Discover more
www.manchester.ac.uk/drama

At Manchester we consider drama to be a cultural process as well as a practice. Our research is structured around three key areas: applied theatre and performance, theatre historiographies, and film and screen studies. We critique accepted norms, from new critical examination of popular theatre forms overlooked by scholarship and re-appraising forgotten performances and practitioners, to engaging with contemporary work and practices.

Social engagement is a strong theme across our postgraduate study options; our master’s students and researchers are actively making a difference to the lives of communities both overseas and closer to home. We consider the impact of global concerns on local context, such as theatrical responses to climate change, and support of refugee theatre in the Manchester area.

We have a long history of developing and collaborating in new platforms for public research and knowledge exchange, such as our Humanitarian and Conflict Response Institute and the biannual Insight Film Festival, which supports young people in making films exploring inter-faith dialogue and community cohesion.

Founded on the belief that the arts have the power to change people’s lives, our University-based Theatre in Prisons and Probation Centre provides a regional and national focus for a breadth of creative arts projects in criminal justice settings. Our In Place of War project has researched performance from sites of armed conflict and by artists and communities displaced by war, from the Democratic Republic of Congo to Kosovo.

As a student here you’ll explore how the intersection of multidisciplinary themes in theatre, film, performance and screen can be explored for the benefit of wider society – from the use of film as a tool for community engagement to anthropological approaches and applied theatre.

WHY MANCHESTER?

Work with highly regarded scholars in one of the UK’s leading drama research centres – Manchester ranked second nationally among UK drama departments in the last Research Excellence Framework (REF 2014). Engage with Manchester’s vibrant cultural life directly through work placement opportunities and research collaborations with cultural sector partners such as Contact Theatre, HOME, the Royal Exchange Theatre and the Theatre in Prisons and Probation Centre.

TAUGHT COURSES

Film Studies MA

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

Drama at Manchester has a worldwide reputation. Our graduates pursue careers in the creative industries as practitioners, artists, producers and filmmakers. Some enter associated fields such as arts education, while others pursue research or successful academic careers.

EARTH AND ENVIRONMENTAL SCIENCES

Discover more
www.manchester.ac.uk/sees

Earth and environmental sciences involves the study of the past, current and predicted future state of our planet, including the context of the solar system as a whole. One of our key research areas focuses on understanding processes from nano-/molecular scales to planetary scales, with expertise covering the geosphere, biosphere, hydrosphere and atmosphere.

Our high-impact research has implications for climate change, food security, oil, gas and mineral exploration and exploitation, protecting people from environmental hazards – both physical and chemical – and improving the sustainable use of the inorganic, organic and living resources of our planet.

WHY MANCHESTER?

Described as “internationally excellent” and “world-leading”, we ranked in the top five schools in the UK in the latest Research Excellence Framework (REF 2014).

Recently strengthened by the expansion of the School to include Environmental Ecology and Evolutionary Biology research groups.

World-class research facilities, including: our own aircraft for atmospheric studies; high-performance computers for modelling and simulation; laboratories to handle geochemical and microbial samples for chemical, isotopic, mineralogical and microbiological analysis; and new greenhouse facilities for plant and soil biology research.

Innovative and internationally recognised taught courses led by experienced academics, with a strong network of industrial links.

Our graduates pursue careers as environmental and geological consultants, research scientists, environmental managers, teachers, lecturers, PhD students and postdoctoral research scientists. Others pursue research or successful academic careers.
EARTH AND ENVIRONMENTAL SCIENCES

RESEARCH PROGRAMMES CONTINUED

Plant Science MPhil/PhD
Structural and Petrological Geoscience MPhil/MSc by Research/PhD

You might also be interested in: Geography; Planning and Environmental Management.

Our broad range of postgraduate research opportunities includes atmospheric science, planetary and earth science, ecology, evolutionary biology and molecular environmental science. You’ll have the opportunity to work alongside some of the best scientists in their fields in our large, vibrant graduate school. Many of our MPhil, MSc by Research and PhD projects are linked with academic collaborators from other Schools or institutions, or with industrial collaborators.

Cross-disciplinary centres include the Centre for Atmospheric Science, Williamson Research Centre for Molecular Environmental Science, Research Centre for Radioactive Waste Disposal and Interdisciplinary Centre for Ancient Life. We also offer taught MSc courses in Pollution and Environmental Control (MPEC), which has run since 1978, and in Petroleum Geoscience, which has very close links with the petroleum industry.

FUNDING

We typically have around 20 funded NERC DTP, STFC DTP, BBSRC DTP and EPSRC PhD scholarships available each year for eligible UK or EU applicants. Exceptional international candidates may be eligible for other competitive funding opportunities. Strong links with industry mean that we have a large number of industrially funded research projects that offer part or full scholarships throughout the year.

CAREERS

Our postgraduates collectively pursue a wide range of careers in academia, the petroleum industry and the environmental sector (including radioactive waste disposal), as well as a range of broader careers requiring the generic and technical skills developed through our research and taught postgraduate programmes.

ECONOMICS

Discover more www.manchester.ac.uk/economics

Economics at Manchester has a long and rich history dating back to the 19th century; when the mathematical method was introduced into economics. Distinguished scholars who have held positions at Manchester include William S Jevons and Nobel laureates John R Hicks (1972), Arthur Lewis (1979) and Joseph E Stiglitz (2001). The latest Research Excellence Framework (REF 2014) ranked Manchester seventh out of 28 economics departments in terms of research power in the UK, with 75% of our activity rated as “world-leading” or “Internationally excellent”. More than 50 full-time academic members conduct research on a diverse range of topics.

Our graduate courses are specialist and, with a combined annual intake of only 100 students, they are small in size, for a more intensive learning experience. We also offer the option to undertake research for a PhD/MRes. Many students on the MA or MSc progress to a PhD at Manchester or elsewhere; while others find jobs with high-profile employers around the world.

Our PhD/MRes in Economics is a new graduate programme with an American-style structure, designed to offer world-class training in modern economics. Faculty members involved in PhD supervision specialise in the following research areas: behavioural economics; development economics; econometrics and applied economics; economic theory and mathematical economics; environmental economics; financial economics; macroeconomics; monetary economics; and political economy.

Our PhD/MRes is structured as a ‘2+2’ training period, with dedicated postgraduate research courses in Year 2 and the possibility to extend training by a further writing-up year. All our MSc courses have ESRC recognition and allow for entry into Year 2 of the PhD programme.

FUNDING

Applications to our PhD/MRes programmes are evaluated in three different rounds during the academic year. Please see our website for up-to-date information. Our department typically offers around ten scholarships covering the tuition fee and an annual stipend similar to the ESRC, and a research training support budget of £1,000. Several teaching assistantships are also available. For details of funding opportunities, visit our website: www.manchester.ac.uk/socialsciences/study/masters/fees-and-funding

www.manchester.ac.uk/socialsciences/study/postgraduate-research/funding

CAREERS

Employability is high among our postgraduate alumni. Economics graduates have, for example, gone on to work in local government / civil service, within banks and financial institutions, and for charities. Others have gone on to further study.

TAUGHT COURSES

Economics MA/MSc
Financial Economics MSc

RESEARCH PROGRAMMES

Economics PhD/MRes (2+2)

Why Manchester?

One of Europe’s leading centres for economics research and research-led teaching
Internationally renowned for postgraduate training with a range of master’s courses and exposure to state-of-the-art research and tools
Equips graduates with the intellectual apparatus and practical skills necessary for a professional economist
Doctoral programme with funding possibilities

At Manchester we seek to enable positive, evidence-informed change in educational settings throughout the world. We examine how policy and practice in the context of wider challenges of poverty can become more equitable for those educationally disadvantaged.

Our international research expertise crosses diverse areas, including: educational policy and leadership; critical pedagogies and maths education; special educational and additional needs; and equity, disadvantage and poverty.

We are ranked as the best university provider of initial teacher training in the north of England (The Good Teacher Training Guide 2017). Our PGCEs offer you a postgraduate qualification and qualified teacher status, and we also offer the School Direct route into teaching.

WHY MANCHESTER?

- Large graduate educational research community – more than 1,000 postgraduate education students choose Manchester every year
- Strong international student community drawn from educational contexts all over the world
- PGCEs rated “outstanding” by Ofsted

TAUGHT COURSES

- Digital Technologies, Communication and Education MA
- Education (International) MA
- Educational Leadership MA
- Intercultural Communication MA (taught in conjunction with the School of Arts, Languages and Cultures)
- Psychology of Education MEd
- Research Methods with Education MSc
- TESOL MA

ELECTRICAL AND ELECTRONIC ENGINEERING

Electrical and electronic engineering has an impact on virtually everyone in the world. From the basics of providing heat and light, through to the advanced electrical and electronic systems associated with global positioning systems, space exploration or advances in medical science, the subject is indispensable, adding intelligence to many systems.

The world relies on the ingenuity of electrical and electronic engineers so it can continue to progress and enable life to be more sustainable – and fun! The range of activities associated with the subject is immense and includes the development of new materials for electronic electronics and photovoltaics, the implementation of graphene in sensor systems and the design of the power system networks needed to effectively harness energy from a range of generation technologies.

Our contribution to these advances is evidenced by our impressive result in REF 2014, the national audit of university research excellence. We were ranked in the top three UK institutions in our discipline – a clear indication of the importance and relevance of our research.

Our research contact:
+44 (0)161 306 4701  pgt-eee@manchester.ac.uk
+44 (0)161 306 4800  pgr-eee@manchester.ac.uk

TAUGHT COURSES
Advanced Control and Systems Engineering MSc
Communications and Signal Processing MSc
Electrical Power Systems Engineering MSc
Advanced Electrical Power Systems Engineering (two-year / 240 credits) MSc
Renewable Energy and Clean Technology MSc

RESEARCH PROGRAMMES
Electrical and Electronic Engineering MPhil/PhD
Power Networks CDT PhD

You might also be interested in: Aerospace Engineering; Chemical Engineering and Analytical Science; Civil Engineering; Computer Science.

FUNDING
We attract industrial and research council funding, enabling us to fully fund a number of outstanding research students each year.

WHY MANCHESTER?

Research activities crossing six key areas: control systems; electrical energy and power systems; microelectronics and nanostructures; microwave and communication systems; power conversion; sensing, imaging and signal processing.

93% of our research ranked as “world-leading” or “internationally excellent” in the last Research Excellence Framework (REF 2014)

We host the Centre for Doctoral Training in Power Networks, funded by the Engineering and Physical Sciences Research Council (EPSRC).

TAUGHT COURSES

Discover a thriving, creative environment with a vibrant research culture, close links to our Centre for New Writing, involvement in the Manchester Literature Festival and access to the world-class John Rylands Library.

Our MA in English and American Studies covers a range of different periods, genres and approaches, combining recent theoretical developments with a varied selection of literary and cultural sources. The MA encourages and seeks to develop your intellectual range and flexibility.

Our interdisciplinary MA in Gender, Sexuality and Culture examines feminist and queer theory and history, and the intersections between different social categories such as gender, sexuality, race, class and trans. You can take options from across the arts and social sciences, including sociology, history, literature and film. You could also take part in our annual Sexuality Summer School: a week of debates and cultural events with leading feminist and queer academics in dialogue with activists, writers and filmmakers.

Our MA in Modern and Contemporary Literature prepares you for research in post-1900 literature and its contexts, and is also popular with those who wish to further their critical engagement with the period. It draws on the expertise of more than 30 academic staff, as well as resources in 20th and 21st-century literature, culture and theory.

Our current research profile includes both traditional and new fields and methods across the chronological span and the theoretical range of the subject. Areas of international research excellence include Medieval and Renaissance Literature, Romanticism, Victorian Literature and Culture, Modernism, American Studies, Gender and Sexuality Studies and Cultural Theory.

FUNDING
Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

WHY MANCHESTER?

75% of our research is rated “world-leading” (4*) or “internationally excellent” (3*) (REF 2014)

Our stimulating research environment includes seminars, masterclasses, public lectures, symposia and reading groups, as well as class time.

Our Literature Live reading series attracts an impressive line-up of speakers, such as Anne Enright, Martin Amis, Eleanor Catton, Seamus Heaney, Hilary Mantel, Eimear McBride, Audrey Niffenegger, and Patrick Marber.

Association with UNESCO Manchester City of Literature.

Within our multidisciplinary team, you’ll study alongside leading academics in environmental engineering. Drawing on expertise in bioenergy and biomass, sustainable nuclear energy, low-carbon transport, renewable energy socio-economics, and carbon capture and storage, we develop practical solutions to some of society’s most pressing environmental challenges.

You’ll gain a thorough understanding of engineering principles, coupled with excellent practical and personal transferable skills. Our stimulating research environment enables you to develop skills in whole systems, sustainability appraisal and emissions accounting, and to engage with a world-leading interdisciplinary research team.

Research programmes are supported by induction courses, regular research seminars and career development programmes. We encourage and support international engagement, and collaborate extensively with industry, councils, government organisations and international partners.

State-of-the-art computational and experimental facilities will support your research. Every PhD student has a dedicated place in our research village, alongside other PhD students working on similar topics. The village offers individual study areas, computer spaces, meeting rooms, a kitchen, and much more. ‘Village reps’ regularly meet with our Director of Graduate Studies to discuss relevant issues and organise social events.

You’ll find a number of funding opportunities available for UK and international students. For more details, including on our President’s Doctoral Scholar Award and external funding schemes, visit our website: www.manchester.ac.uk/mace/study/postgraduate-research/funding

You’ll find extensive career opportunities across environmental engineering, including academic careers, engineering and environmental consultancies, policy development roles and other influential and strategic positions.

Graduates leave us with a breadth of strong technical and interpersonal skills and expertise far beyond their particular degree specialism. They progress into a wide variety of careers within engineering (eg consulting engineers, R&D companies, construction sector), academia, public services (eg civil service, policy change) and commerce (eg IT, finance).

Our PhD provides significant career acceleration and facilitates entry into positions with greater responsibility and diverse opportunities. Furthermore, it increasingly provides entrepreneurial opportunities, exploiting skills and knowledge acquired during the programme.

You might also be interested in: Civil Engineering; Planning and Environmental Management.

Research contact:
+44 (0)161 275 4345
pgr-mace@manchester.ac.uk

Why Manchester?
Close links with our world-leading research centres, including the Tyndall Centre for Climate Change Research, Dalton Nuclear Institute, Sustainable Consumption Institute, Manchester Energy and SUPERGEN Bioenergy Hub

Strong teaching and research links with industry, influence on climate policy

More than 200% of recent graduates are employed within their degree specialism

100% of our impact case studies were graded as “internationally excellent” or “world-leading” (3* or 4*) in the last Research Excellence Framework (REF 2014)

You may also be interested in: Earth and Environmental Science; Humanitarianism, Conflict Response, Disaster Management and Peacebuilding; Planning and Environmental Management

Funding
We offer a number of postgraduate taught scholarships and merit awards to outstanding applicants. We also usually fund up to ten new PhD students each year through studentships equivalent to those provided by the Economic and Social Research Council.

CAREERS
Our programmes will equip you with the skills necessary to take up specialist positions in government agencies, NGOs, environmental industries and consultancies, or to go on to further research and academic careers.

Ranked fourth in the UK for geography (The Guardian University Guide 2018)

Custom-built geography laboratories and cutting-edge GIS computer software

Excellent opportunities for work placements and international fieldwork

Health Data Science

WHY MANCHESTER?

- Learn how to work within a team to collect and interpret health data and use it to help solve health care delivery challenges
- Experience key technical skills and software for working with and manipulating health data
- Access sophisticated research and teaching facilities at the Medical Research Council’s Health eResearch Centre (HeRC)
- Open up a world of career opportunities in the NHS, industry and academia – an estimated 52,000 data scientists are needed in the UK alone

You can also study individual units of the MSc course for CPD purposes, or combine units for a PG Diploma or Certificate.

Our postgraduate courses in health data science are embedded in a world-leading research environment that hosts the Connected Health Cities programme, funded by The Department of Health – and is integral to the NIHR Greater Manchester Patient Safety Translational Research Centre and the Manchester Biomedical Research Centre.

FUNDING

We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships, including the Medical Research Council and National Institute for Health Research. We also offer a number of scholarships and awards for outstanding international students, as well as a unique International PhD programme with integrated teaching certificate.

www.manchester.ac.uk/bmh/study/research/funded-programmes

www.manchester.ac.uk/bmh/study/research/financial-support

CAREERS

Those studying health data science have a wealth of career opportunities in the health care sector, industry (e.g. biopharma, IT and academia). Previous Manchester alumni have been clinicians and healthcare professionals in the NHS, or have continued to study for a PhD.

Heritage Studies

WHY MANCHESTER?

- Practice-based courses with a vocational emphasis
- Strong working relationships with heritage organisations throughout Britain and overseas
- Opportunities to design and participate in live projects with heritage organisations in Manchester – eg designing heritage management plans, developing exhibitions, producing heritage events and working on creative collaborative projects

You might also be interested in: Arts Management and Cultural Policy; Museology.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit:

www.manchester.ac.uk/alc-funding

CAREERS

Our ICP alumni have gone on to pursue successful careers in the heritage and cultural sectors at home and overseas. Destinations include: Project Officer at Sheffield Cathedral; Architectural Investigator at English Heritage; and Exhibition Researcher at Imperial War Museum North.
Manchester offers you world-class expertise in a department that stands out for its chronological, geographical and methodological range. As part of our vibrant research community, you’ll have the opportunity to participate in departmental research seminars, workshops and masterclasses with international scholars. You’ll also benefit from access to the city’s abundant research resources, including Chetham’s Library, the oldest public library in the English-speaking world.

We offer one of the broadest MA courses in the country, encompassing cultural, economic, political and social history, and covering the Americas, Africa, China, India and Russia, as well as Europe and the UK. You’ll personalise your MA by choosing from core units including: Medieval and Early Modern; Modern British; Transnational; Post-Colonial; History of Capitalism; War; Conflict and Culture. You’ll also select from one of the largest collections of dedicated optional courses in the UK, with topics ranging from the history of Manchester to the study of cultural theory.

You can choose whether to exploit the vocational aspects of your course, including our film-making course, or to focus on research training for future doctoral work.

WHY MANCHESTER?

Work with internationally acclaimed academics in a department at the cutting edge of historical research – the most recent Research Excellence Framework ranked History at Manchester fourth in the UK for quality of publications (REF 2014).

Draw on the rich library and archive holdings of Greater Manchester, including the world-famous special collections of our own John Rylands Library.

Boost your employability by studying at a university that encourages outward-facing research and social engagement.

Medieval and Early Modern Studies MA ⚫ ⚫

RESEARCH PROGRAMMES

History MPhil/PhD ⚫ ⚫

You may also be interested in: Archaeology; Art History and Visual Studies; Classics and Ancient History.

Our Medieval and Early Modern Studies MA enables you to pursue your interest in the literatures, histories and cultures of the European Middle Ages and Early Modern periods, with classes conducted at the University’s historic John Rylands Library – home to one of the world’s finest collections of rare books and manuscripts.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

Our master’s students can enhance their employability and learn about history in practice through our dedicated work placement scheme, featuring city-wide partner institutions such as Manchester Histories Festival and the People’s History Museum.

PHD students also have the opportunity to engage directly with cultural organisations through our Researchers in Residence scheme.

HUMANITARIANISM, CONFLICT RESPONSE, DISASTER MANAGEMENT AND PEACEBUILDING

Our leading global centre is an unrivalled learning environment for students interested in careers in humanitarian aid or research. An exceptionally wide breadth of disciplinary traditions and research expertise incorporates the history, politics and social aspects of humanitarian and conflict issues.

Our Humanitarian and Conflict Response Institute connects teaching, research and practice, while keeping an independent critical perspective. Our researchers are accomplished practitioners whose impact reaches major NGOs, charities, policy and regulation on a global scale. We analyse humanitarian actions, combining theoretical, historical, political and cultural depth with practice-based perspectives on humanitarian interventions and their characteristics, theoretical models and operational boundaries. You can work with and learn from leading academics from the UK and overseas.

Our research trips enable access to areas recovering from disasters and/or conflict. Students can travel to countries such as Uganda to critically interrogate humanitarian practices through the design and implementation of an individual research project.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

The specialist skills you’ll gain through our programmes will offer you a host of career and further study options – from international institutions such as the UN Peacebuilding Commission to think tanks, and from international NGOs to local resilience forum roles within the civil service. NGO partners and prospective future employers include Save the Children, International Alert and Médecins Sans Frontières.

WHY MANCHESTER?

Engage first-hand with the people, projects and organisations that shape humanitarian aid, global health, disaster management, conflict response and intervention issues around the world.

Our inclusive approach unites medicine and humanities, mirroring the reality of aid operations and informing both analytical and applied disciplines.

We develop an academic and professional agenda for humanitarians worldwide, and provide robust education for practitioners at every level.

INTERNATIONAL DEVELOPMENT

Through education, research and policy analysis, Manchester’s Global Development Institute (GDI) aims to promote social and economic development and to reduce poverty, particularly within lower-income countries and disadvantaged groups. We address inequalities in order to promote a socially just world in which all people, including future generations, may enjoy a decent life.

We have 60 years of experience in training practitioners and leaders to provide solutions to the growing complex challenges facing organisations, institutions and society today. Our alumni community includes 10,000 individuals from over 170 countries, and the combined field experience of our staff covers more than 60 countries.

Our GDI research has a significant impact around the world: in the most recent Research Excellence Framework we were ranked first for research impact and second for research quality in the UK (REF 2014).

WHY MANCHESTER?

Europe’s largest dedicated international development research and teaching institute

Ranked 14th in the world for development studies (QS World University Rankings 2018)

Gain the skills necessary to take up specialist positions in development-related NGOs and in public and private organisations

LANGUAGES AND CULTURES

WHY MANCHESTER?

Our research is driven by an engagement with pressing, international concerns in a global and cross-cultural context.

You’ll have the opportunity to investigate languages in the context of their social, aesthetic, political and ethical cultures.

Whether you want to focus your research on a specific language, or work across language boundaries, our wide-reaching research expertise means we can offer you dedicated doctoral support.

French Studies

We are one of the UK’s oldest and largest centres for French and francophone studies. Our award-winning, internationally recognised academic staff are leading researchers in their fields and can offer you a wide range of expertise, from the early modern period to the present, covering canonical aspects of French and francophone culture, as well as lesser-known but equally influential individuals, events and works. We have a strong and original focus on French and francophone visual and performance culture, with specialists in theatre, art, illustration, photography, cinema, popular music and dance. We also work closely with Alliance Française de Manchester to offer various extracurricular activities throughout the year, including workshops, film screenings, talks and cultural events.

German Studies

Manchester is one of the leading research centres for German studies in the UK. We offer supervision on a wide range of topics in the culture and history of the German-speaking lands from the 18th to the 21st century, notably in literature, film, political, social, intercultural, and cultural history. Our research expertise includes: Holocaust and Jewish studies, Turkish-German culture; culture and dictatorship; contemporary literature; and aspects of translation. We offer regular research seminars, PhD forums, masterclasses and academic conferences, often in collaboration with other disciplines. We have a very active student society, as well as strong links with the Goethe-Institut and the Austrian Cultural Forum, which sponsor a varied programme of events.

Italian Studies

Our Italian Studies department is one of the oldest, largest and most highly rated departments of its kind. Our internationally recognised research is both wide-ranging and markedly interdisciplinary, with a particular focus on linguistics, translation studies and cultural politics from the medieval to the modern period. Our research culture is further enhanced by the presence of visiting professors and lecturers from Italy, participation in the interdisciplinary seminars held by the Italian Forum, and regular research seminars. We have a strong supervisory record across a host of specialisms, including the history of the book, renaissance culture, Dante, and cinema studies. The University’s own John Rylands Library also houses a world-class holding of early Italian printed books from the Spencer, Christie, and Bullock collections.

Russian and Eastern European Studies

One of the most highly regarded UK departments in its field. Russian and East European Studies at Manchester boasts internationally renowned scholars and award-winning teachers. We have particular expertise in Russian, Polish and Balkan studies, covering cultures, histories and political developments in these countries and regions from the medieval period to the present day. Our cross-disciplinary research interests include: literature; film; media and popular culture; intellectual history; memory studies; gender and sexuality; and post-communist transition. Our Centre for Russian and Eurasian Studies facilitates collaboration in research and postgraduate supervision. Our academics and postgraduates are also actively engaged in the initiatives of the national Centre for East European Language-Based Area Studies, which is funded by the Arts and Humanities Research Council and the British Academy.

Spanish, Portuguese and Latin American Studies

We are the UK’s leading institution for Spanish, Portuguese and Latin American studies. Outstanding research feeds into innovative teaching, and our experts actively engage with the transregional and transnational exchanges between local communities, nations and regions, notably those established between Europe and the wider Atlantic world. Cross-disciplinary research interests include literature and film, visual and urban cultures, colonial and postcolonial histories, intellectual and cultural theory, cultural studies, and sexuality and gender. You’ll form part of an internationally diverse and engaged body of students who participate actively in research activities, supplemented by strong links with Manchester-based organisations such as Instituto Cervantes and HOME, the largest combined arts centre outside London.

Middle Eastern Studies

For more than 100 years Manchester has been a major British centre for the study of the languages, history, religions, literatures and cultures of the Middle East. Our wide range of internationally recognised research supervisory expertise covers Arab-world studies, Islamic studies, Israel studies, Hebrew literature, classical Jewish studies and modern Iranian studies. We are home to the world-renowned Journal of Semitic Studies and are a constituent member of two research hubs: the Centre for the Advanced Study of the Arab World.
(with the universities of Edinburgh and Durham) and the Centre for Jewish Studies. Our experts in Middle Eastern Studies contribute to the public debate on contemporary cultural-religious issues in the UK and are part of the Middle Eastern discourses on the preservation of national heritages, gender roles and the relations between East and West.

East Asian Studies

We offer innovative programmes in Chinese Studies, Japanese Studies and East Asian Studies, giving you a wide range of internationally recognised supervisory expertise on contemporary culture and society, history, language, media and religion. Providing a deep knowledge and rich experience of two East Asian powerhouses, we offer fresh insight into the importance of studying this region through cutting-edge research and teaching. Specialisms in Chinese Studies include themes such as gender and sexuality, media studies and contemporary art, while specialisms in Japanese Studies include mass culture, subcultural formations and modern medical, educational and cultural history. We have close links with the University’s Confucius Institute and the Japan Society North West, both of which offer a broad range of cultural events.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

Our dedicated graduate school is an online and physical postgraduate community, designed to stimulate collaboration and networking among taught-course students and researchers. As well as providing bespoke resources, the graduate school delivers training, workshop sessions and programmes, each designed to foster the continual professional development of our postgraduates.

Law

Our exciting range of programmes allows you to choose a multi-directional or focused approach to your studies, as suited to your interests and career aspirations. Choose from corporate governance, intellectual property law, international business and commercial law, international financial law, public international law, security and international law and transnational dispute resolution.

Criminology

Innovative, interdisciplinary programmes focus on current trends and historical debates surrounding key issues of crime causation, crime control and regulation. We use recent high-profile cases to explore current issues in criminology and criminal justice, drawing on specialist research expertise in fraud, policing, violence, drug use and criminal justice.

Health care

The continuing advancement of modern healthcare and medicine gives rise to an increasing number of controversial ethical issues. We seek to address these issues with our research and via our postgraduate programmes.

WHY MANCHESTER?

- Ranked 28th in the world and 8th in the UK for Law in the THE Times Higher Education World University Rankings by subject 2018
- More than 140 years’ experience providing high-quality, internationally focused legal education, and one of the UK’s broadest ranges of specialisms for law, health care and ethics, and criminology
- Learn from world-class academics with diverse backgrounds, including legal scholars, bioethicists, social scientists, sociologists, psychologists, criminologists and philosophers

LINGUISTICS AND ENGLISH LANGUAGE

Discover more
www.manchester.ac.uk/lel

We offer you a strong foundation for specialist research in theoretical and empirical linguistics. Our teaching and research includes major specialisms such as sociolinguistics, phonetics and phonology, syntax, semantics and pragmatics, historical linguistics, morphology, typology, cognitive linguistics, corpus linguistics, forensic linguistics, language acquisition and the documentation of endangered languages.

Our internationally recognised expertise encompasses a breadth of languages, including English and other Germanic languages, Romance languages, Russian, Polish, Arabic, Hebrew, Turkish, Kurdish and other Iranian languages, Amerindian languages, languages of South Asia, indigenous languages of Australia and historical languages such as Old English, Old Saxon and Old Norse.

Supported by cutting-edge facilities, our diverse and world-leading research community explores the effects of our society and our psychological and cognitive make-up on language, covering a wealth of themes including identity, power and language acquisition.

As the most linguistically diverse city in western Europe – home to more than 200 spoken languages – Manchester offers a vibrant multicultural language experience and an ideal location in which to explore variation, cross-cultural references and social impacts.

WHY MANCHESTER?

Modern Languages and Linguistics at Manchester ranked third in the UK for research power in the most recent Research Excellence Framework (REF 2014).

Access to innovative resources, including: psycholinguistics and phonetics laboratories with facilities for signal analysis, speech synthesis, ultrasound, laryngography and electropalatography; specialist software; and the extensive linguistic collections of our National Research Library.

Benefit from strong links with cultural bodies such as the Alliance Française, the Goethe Institut, the Confucius Institute and the Instituto Cervantes.

CAREERS

You’ll gain a broad range of sought-after skills, including intercultural awareness, data capture and analysis, interpretation and critical thinking, as well as advanced written and oral communications skills. Our graduates enjoy careers in fields such as language teaching, language policy, speech and language therapy, publishing and communications. For those wishing to pursue an academic career, our dedicated graduate school offers you extensive training in research methods.

Materials

Discover more
www.manchester.ac.uk/materials

Academically challenging and forward-thinking, our postgraduate degree content is driven by industry. We invite many to work alongside us in our strategic development, in order to retain our international standing as a centre of excellence and innovation in materials – and design courses with graduate employability in mind.

FUNDING

In order to cultivate academic talent, reward high achievement and hard work, we offer a range of generous research studentships and scholarships to international, UK and EU students each year.

CAREERS

You’ll gain theoretical knowledge and understanding of current issues, backed by critical and reflective thinking, research techniques and organisational skills, providing you with exciting opportunities in a wide variety of science, engineering and management sectors.

WHY MANCHESTER?

National research centres in composites, energy materials, performance of materials and imaging of materials, give us unique capability to process and analyse materials of all types.

100% of our research environment rated “internationally excellent” or “world-leading” (REF 2014).

State-of-the-art research facilities include an electron microscopy suite, advanced mechanical testing equipment, nanofabrication equipment and cell culture laboratories.

Exceptional breadth of research and training in materials engineering, science and technology, cutting-edge textile design and fashion business.

MATHMATICS

Discover more www.manchester.ac.uk/maths

We are a major international research centre that covers the entire breadth of the subject, including pure and applied mathematics, probability, statistics and actuarial science. Some examples of problems currently being explored by our mathematicians include noise reduction in domestic appliances, the flow of avalanches, medical imaging, and landmine detection. We carry out research across a broad range of modern and traditional mathematics and have a high level of engagement in interdisciplinary research and with industry. Our work is organised into 11 research groups covering everything from logic to stochastic analysis, and has a global impact across banking and finance, manufacturing, energy, security and beyond.

FUNDING

Each year we disburse more than £1 million towards the funding of our postgraduate students, including substantial funding from EPSRC and the European Commission. We have a strong record of interdisciplinary and industrial research, and offer a variety of industrial bursaries for MSc and PhD students. We also have a range of generous scholarships available for MSc students.

WHY MANCHESTER?

Ranked sixth in the UK in the last Research Excellence Framework for research power – 90% of our research activity was rated “internationally excellent” or “world-leading” (REF 2014).

Commended in REF 2014 for our provision of PhD training and support through the Manchester Institute for Mathematical Sciences, we host an extensive programme of research seminars with a wide range of speakers, providing ample opportunity for furthering knowledge and discussing current research from all areas of mathematics.

MECHANICAL ENGINEERING

Discover more www.manchester.ac.uk/mace

Mechanical engineering is a diverse subject, characterised by the conception of an idea to solve a problem through to implementing the solution. Mechanical engineers work in small-scale areas such as nano-manufacturing, and with large-scale systems such as aircraft engines.

We offer you a vibrant environment with high-calibre facilities and strong links with industry, and provide a modern, world-class education. When you join us, we will support you with an intensive induction process, including research seminars and career development programmes, to enable you to settle in and feel part of our School. We want you to feel at home, so we give you a dedicated space to engage with your studies in a friendly environment.

For information about funding opportunities, including our President’s Doctoral Scholar Award and other external funding schemes, visit: www.manchester.ac.uk/mace/study/postgraduate-research/funding

You may also be interested in: Aerospace Engineering; Civil Engineering; Electrical and Electronic Engineering; Environmental Engineering

FUNDING

Grades are highly sought after by industry, thanks to our strong foundation in technical skills, and promotion of the development of conceptual creativity.

Gain a complementary blend of skills that employers look for, via programmes that integrate advanced engineering techniques with hands-on learning.

Strong teaching and research links with more than 300 companies, including industrial links with National Instruments, Rolls-Royce, EDF, BP, MBDA and ESTEC/ESA.

100% of our impact case studies were graded as "internationally excellent" or "world-leading" (3* or 4*) in the last Research Excellence Framework (REF 2014).

CAREERS

Our graduates work in a diverse range of industries, helping to solve some of the biggest challenges faced by society, including in areas such as sustainability, advanced manufacturing and innovative health care technologies.

Our MSc in Medical Imaging covers a multidisciplinary topic of central importance in diagnosis, treatment, monitoring and patient management. You’ll cover the basic science and technology behind the principal imaging methods currently used in medicine and medical research, as well as advanced imaging methods, clinical and research applications, imaging biomarkers and computational methods.

This course comprises both a taught component and a research project, giving you the skills and knowledge required for a career in an image-related field in clinical practice, clinical or scientific research, or technical development.

Our PhD/MPhil Biomedical Imaging Sciences programme enables you to undertake a research project in the field of biomedical imaging, including neuroimaging, cancer imaging (including mammography) and musculoskeletal imaging.

Excellent links with local hospitals enable the set-up of research projects embedded in clinical environments.

CAREERS
Our MSc equips graduates to pursue either clinically or technically focused careers in imaging in an academic or commercial environment. It forms a sound basis for students who wish to proceed to a PhD in any aspect of medical imaging, or to apply to trainee recruitment programmes in medical physics. Intercalating medical students may use this qualification as a platform for modifications and diploma options.

WHY MANCHESTER?
Discover the key clinical applications of medical imaging and how it contributes to diagnosis and treatment.

Benefit from excellent research-dedicated imaging facilities at several hospital sites and a dedicated molecular imaging centre (WMIC) co-located with The Christie NHS Foundations Trust.

Learn in a multidisciplinary environment alongside physicists, engineers, clinicians and other professionals from a range of fields.

Teaching incorporates a range of methods including lectures supplemented by group discussions and practical imaging exercises in acquiring images and analysing results.

Our postgraduate taught courses provide you with training that supports your career development, allowing you to progress within your chosen specialism. We offer certificate and diploma options to allow health professionals to gain an intensive grounding in health care subjects. Our Master of Research (MRes) courses are designed to give you a real taste of research and what is required of a professional researcher.

The research training we provide reflects our dedication to improving understanding of disease processes, diagnosis and enhanced patient care. From investigating the origins of diseases at molecular level through to identifying pharmacological and health service interventions, our postgraduate researchers play a pivotal role. We encourage you to pursue authorship in eminent publications, attend conferences and actively engage with the wider research community to improve your skills and career prospects.

TAUGHT COURSES
Cancer Biology and Radiotherapy Physics MSc/PGDip/PGCert
Cardiovascular Health and Disease MRes
Clinical Biochemistry MSc
Clinical Immunology MSc/PGDip
Experimental Medicine (Cancer) MRes/PGCert
Experimental Medicine (Dermatology) MRes/PGCert
Experimental Medicine (Hearing Health) MRes/PGCert
Experimental Medicine (Musculoskeletal) MRes/PGCert
Experimental Medicine (Respiratory) MRes/PGCert
History of Science, Technology and Medicine MSc
Medical Education MSc/PGDip/PGCert
Medical Humanities MSc
Medical Microbiology MSc/PGDip/PGCert
Medical Sciences MRes
Medical Virology MSc/PGDip
Molecular Pathology MSc
Occupational Hygiene (blended learning) MSc/PGDip/PGCert

Oncology MRes
Paediatric Anaesthesia MSc/PGDip/PGCert
Physician Associate Studies PGDip
Reproduction and Pregnancy MRes
Science Communication MSc
Teaching and Learning in Biology, Medicine and Health Sciences PGCert

WHY MANCHESTER?
Gain cutting-edge professional training to aid your career development via our master’s and diploma courses.

Learn to share good practice across disciplines, giving you the opportunity to meet others, organise specific training, or work in alternative environments.

85% of our research is rated “internationally excellent” or “world-leading” (3* or 4*) in the last Research Excellence Framework (REF 2014).

Research students will benefit from training opportunities and support through our Doctoral Academy.

MUSEOLOGY

Discover more
www.manchester.ac.uk/museology
www.manchester.ac.uk/icp

Study with us and you’ll examine current and emerging museum practices with leading professionals and academics in your field. We promote collaboration with the museum profession across the region, the UK and overseas, and continually review our course content in response to new research, cutting-edge critical approaches and practices.

As part of the University’s Institute for Cultural Practices, we work closely with the Centre for Arts Management and Cultural Policy to provide programmes that combine comprehensive cultural theory with practical understanding of overarching trends in the arts, cultural and heritage sector.

Our taught courses cover many practical subject areas, including: collection management; exhibition management; art curatorship; ethnography curatorship; business strategies. You’ll examine diverse issues around museum learning; digital heritage; and sector-specific management; art curating; ethnography curating; architecture; among other areas, including: collection management; exhibition management; ethnography curatorship; business strategies.

You might also be interested in: Art History and Visual Studies; Arts Management and Cultural Policy; Heritage Studies.

Manchester is currently one of the UK’s most important cultural hotspots, thanks to ongoing investment in creative infrastructure. You’ll have the opportunity to visit and network with multiple museums, galleries and cultural organisations throughout your studies. You’ll also work closely with the University’s own multi-award-winning gallery and museum, including opportunities for work-based training in various aspects of cultural practice, from conservation and collections management to audience development and fundraising.

TAUGHT COURSES
Art Gallery and Museum Studies MA

RESEARCH PROGRAMMES
Museology PhD
Museum Practice Professional Doctorate

FUNDING
Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

WHY MANCHESTER?
Study practice-based courses with a vocational emphasis; our alumni have reached senior positions in museums and galleries throughout the UK and overseas.

Placement and research opportunities with a host of institutions such as HOME, Tate Liverpool, Imperial War Museum North and the Museum of Science and Industry.

Design and participate in live projects with cultural organisations across the city – from collection curation to cultural event production.

CAREERS
You’ll enjoy valuable sector networking opportunities, placements and live project briefs as part of your studies. Our alumni have gone on to pursue successful careers in the arts and cultural sectors at home and overseas. Destinations include: Development Officer at the Victoria and Albert Museum, Assistant, Curator of Fine Art at National Museums Liverpool, and Project Manager at China Shanghai International Arts Festival.

MUSIC

Discover more
www.manchester.ac.uk/music

Consistently ranked as one of the top music departments in the UK, Music at Manchester provides an excellent environment for postgraduate study. Our flexible courses offer you the opportunity to combine your specific research interests with a solid methodological foundation. As a musicologist or ethnomusicologist, you’ll engage with the latest theoretical debates and explore interdisciplinary perspectives alongside original research. As a composer or sound artist, you’ll benefit from the liveliest performance culture of any UK music department. Witness your work brought to life by professional ensembles such as our resident Quatuor Danel or the BBC Philharmonic, or through events such as the Manchester Theatre in Sound Festival (MANTIS) and the Locativiaudio Festival.

Diverse specialist MA course units include: Contemporary Music Studies: Historical and Editorial Skills; Ethno/Musicology in Action; Fieldwork and Ethnography; Fixed Media and Interactive Music; and Aesthetics and Analysis of Organised Sound.

Our research community features regular musicology and composers’ forums, performance seminars and composition workshops and masterclasses.

TAUGHT COURSES

**NURSING AND MIDWIFERY**

Discover more
www.manchester.ac.uk/bmh/study/masters
www.manchester.ac.uk/bmh/study/research

Strong links with the NHS enable us to offer you wide-ranging study and research opportunities that keep pace with ongoing changes in health and social care policy and practice, giving you the skills and knowledge for roles today’s health care landscape.

You’ll also benefit from our research strengths. With one of Europe’s largest nursing and midwifery research portfolios, we attract considerable funding and publish widely in renowned international journals.

Our research has substantial impact on health and social care. For instance, we identified shortcomings of personal budgets as direct payments for older people, and revealed significant barriers to returning to work among cancer survivors because of the attitudes of employers and health care professionals.

We encourage our research students to focus on high-quality applied research that supports the improvement of patient care and shapes UK health and social care policy and service provision.

As well as postgraduate diplomas and degrees, you could take individual units from our courses as stand-alone continuing professional development courses.

**TAUGHT COURSES**

Occupational Hygiene MSc/PGDip/PGCert
Occupational Medicine MSc/AdvDip/PGCert/CPD

RESEARCH PROGRAMMES
Occupational and Environmental Health PhD/MPhil/PhD

FUNDING
We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships. These include the Biotechnology and Biological Sciences Research Council, Medical Research Council, Engineering and Physical Sciences Research Council, Wellcome Trust, British Heart Foundation and the PhD programme with A*STAR Singapore. We also offer scholarships and awards for outstanding international students, as well as a unique international PhD programme with integrated teaching certificate.

www.manchester.ac.uk/bmh/study/research/funded-programmes
www.manchester.ac.uk/bmh/study/research/financial-support

WHY MANCHESTER?
Part-time blended learning allows for flexible study with the benefits of face-to-face teaching
Home to the only course in the UK dealing specifically with occupational hygiene
The largest postgraduate course in occupational health in the UK
We have the highest number of qualified occupational hygienists and occupational physicians contributing to teaching on these courses

CAREERS
Our students either currently work in these fields or wish to enter them. The MSc in Occupational Hygiene offers you a good grounding in the subject and can also supplement the education received by other routes, such as British Occupational Hygiene Society modules.

OPTOMETRY

Discover more
www.manchester.ac.uk/bmh/study/masters
www.manchester.ac.uk/bmh/study/research

TAUGHT COURSES
Investigative Ophthalmology and Vision Science MSc/MRes
CPD UNITS (all 15 credits)
Glaucoma (accredited for the Professional Certificate in Glaucoma from the College of Optometrists)
Macular Degeneration
Retinal Vascular Disease

RESEARCH PROGRAMMES
Optometry MPhil/PhD

FUNDING
Our MSc/MRes Investigative Ophthalmology and Vision Sciences course brings together the research expertise in vision from The University of Manchester and the clinical expertise of Manchester Royal Eye Hospital. The course is aimed at optometrists, ophthalmologists, orthoptists and nurses from the UK and overseas. It is suitable if you are: considering undertaking a research degree in the vision sciences; interested in professional development; interested in conducting research as part of your clinical training; an ophthalmologist wishing to expand and extend your training in a specialist area; an optometrist considering a career in the hospital eye service.

CAREERS
This MSc is aimed at optometrists, ophthalmologists, orthoptists, biological scientists, nurses and those from related backgrounds, and can open up a number of career opportunities.

Our research programme graduates progress to secure career opportunities.

Benefit from close links with Manchester Royal Eye Hospital, one of the largest teaching hospitals in Europe, which is globally acknowledged as a centre of excellence
You will be trained by staff who are experts in this field
We have excellent facilities for learning
Hospital pharmacists, community pharmacists and industrial scientists will find a wide range of postgraduate taught options tailored to support career development. You can choose to study bite-sized CPD courses through to an MSc dissertation.

Learn from experts through close links with the Centre for Pharmacy Postgraduate Education, a national provider of continuing professional development programmes for pharmacists and pharmacy technicians across England.

We provide MPhil/PhD programmes in various fields, and our four-year International PhD for overseas students incorporates an accredited postgraduate teaching certificate. Our world-leading research experience includes basic pharmaceutical science through to applied pharmacy practice and multidisciplinary research, which has demonstrable impact for patients and the public.

WHY MANCHESTER?
- Study full-time, part-time or modular CPD options, including distance learning options
- Close working relationship with local hospitals (we have made joint appointments to the posts of clinical lectureships) and industrial partners
- Leading centre for pharmacy research, judged number one in the UK (REF 2014)
- Known internationally for strengths in cancer biology and drug development, biofilms and infection, predictive and translational pharmacokinetics research on drug metabolism, prescribing and medicines safety, workforce planning, education research and evaluation of pharmacy services
- Research students gain training opportunities and support through our Doctoral Academy

TAUGHT COURSES
- Advanced Clinical Skills Short Course
- Advanced Specialist Training in Emergency Medicine (ASTEM) PGCert
- Clinical Pharmacy MSc/PGDip/CPD Distance Learning
- Independent Prescribing Short Course
- Model-Based Drug Development MSc
- Pharmaceutical Industrial Advanced Training (PIAT) MSc/PGDip/PGCert
  - Clinical Trials pathway
  - Industrial Pharmacy pathway
  - Pharmaceutical Business Development and Licensing pathway
  - Pharmaceutical Microbiology pathway
- Pharmaceutical Technology and Quality Assurance MSc/PGDip/PGCert

RESEARCH PROGRAMMES
- Drug Design, Development and Delivery MPhil/PhD
- Pharmacy and Pharmaceutical Sciences MPhil/PhD
- Pharmacy Practice MPhil/PhD

You may also be interested in: Biological Sciences; Medical Sciences; Psychology and Mental Health; Public Health.

FUNDING
We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships, such as the Medical Research Council. We also offer a number of scholarships and awards for outstanding international students, as well as a unique International PhD programme with integrated teaching certificate.

CAREERS
We enable you to develop your chosen career path within the pharmacy profession or as a pharmaceutical scientist, by equipping you with advanced knowledge, problem-solving skills and a critical awareness of the most recent developments in your area of choice and specialism.

Taught contact: +44 (0)161 306 0604 pgtaught.pharmacy@manchester.ac.uk
Research contact: +44 (0)161 275 5608 admissions.doctoralacademy@manchester.ac.uk
WHY MANCHESTER?

Teaching and supervision in a wide range of areas of analytical philosophy, with staff who have published extensively in most major areas of philosophy.

Dedicated support in dissertation planning, research and presentation skills.

Master’s courses that offer small seminar-style classes with an emphasis on staff/student interaction.

Thriving postgraduate community with dedicated office space; each year we also organise a variety of workshops and conferences specifically for our postgraduate students.

PHILOSOPHY

Discover more
www.manchester.ac.uk/philosophy

Philosophical research at Manchester covers the full range of subject areas, but we boast a special emphasis on aesthetics, history of analytic philosophy, metaphysics, philosophy of language, and philosophy of mind and psychology. Together with colleagues in the Manchester Centre for Political Theory, we also offer significant research expertise in political philosophy.

As well as weekly research seminars, Philosophy at Manchester hosts a large number of international conferences, such as Quine and Naturalism (2017) and Early Influences on Lewis (2017).

We are also home to a number of funded research projects, including The Age of Metaphysical Revolution: David Lewis and his Place in 20th Century Philosophy (2016–19); Knowledge of Emotion: Expression and Social Cognition (2012–16); and The Architecture of Consciousness (2012–17).

PHYSICS AND ASTRONOMY

Discover more
www.manchester.ac.uk/physics

Our School is organised into four research divisions that span the breadth of physics: Theoretical Physics, Accelerator, Nuclear and Particle Physics; Condensed Matter, Atomic and Biological Physics; and the Jodrell Bank Centre for Astrophysics and the Jodrell Bank Observatory. These divisions offer a wide range of exciting opportunities for postgraduate research, working in world-leading teams, including experimental physics, observations, theory and technology.

Our research is about more than citations in academic papers. We apply our expertise in order to find solutions to the great challenges society faces, striving to shape the international agenda in collaboration with our partners in industry, government and academia.

We have a strong presence in several multidisciplinary research centres, including the Photon Science Institute, Centre for Nonlinear Dynamics, Dalton Nuclear Institute, and Mesoscience and Nanotechnology Centre. World-leading facilities include our famous Lovell Telescope and e-MERLIN/VLBI National Facility. The international Square Kilometre Array Organisation Headquarters is hosted at our Jodrell Bank Observatory. We gained Juno Champion status from the Institute of Physics in 2016 for our commitment to equality and diversity.

CAREERS

We offer select PhD students paid teaching opportunities, for which we provide training and mentoring. Final-year students may be offered some lecturing experience. Our research seminar encourages you to prepare work for publication in consultation with your supervisor: our students often have papers accepted for publication in international journals while pursuing their PhDs. Our placement officer provides guidance for PhD students wishing to pursue an academic career.

One of the UK’s largest and most active schools of physics and astronomy.

1st in Europe and 11th globally for physics in the Academic Ranking of World Universities 2017.

Our facilities, including Jodrell Bank Observatory and the Photon Science Institute, rival those of other leading universities worldwide.

Manchester Professors Andre Geim and Kostya Novoselov won the 2010 Nobel Prize in Physics for isolating the properties of wonder material graphene.

Ranked third in the UK for world-leading research and first in the UK for the real-world impact of our research (REF 2014).

Graduate destinations are many and diverse. Some take up postdoctoral research and may go on to an academic career. Many go into industrial research jobs; others work for government labs, such as the National Physical Laboratory, enter scientific publishing, such as the Institute of Physics, or use their skills in finance and banking.

TAUGHT COURSES

Nuclear Science and Technology MSc/PGDip/PGCert

EXTRA CAREERS

PhD students may also apply to work for government labs.

You might also be interested in: Aerospace Engineering; Biological Sciences; Mathematics.

FUNDING

We offer research council (EPSRC and STFC) studentships to suitably qualified home/EU candidates, and a number of bursaries to supplement international and EU candidates.

CAREERS

Teaching and supervision in a wide range of areas of analytical philosophy, with staff who have published extensively in most major areas of philosophy.

Dedicated support in dissertation planning, research and presentation skills.

Master’s courses that offer small seminar-style classes with an emphasis on staff/student interaction.

Thriving postgraduate community with dedicated office space; each year we also organise a variety of workshops and conferences specifically for our postgraduate students.

PLANNING AND ENVIRONMENTAL MANAGEMENT

Manchester is a vibrant 21st-century metropolis and a place of major urban change, offering you scope to explore development pressures and environmental impact. Covering planning, urban regeneration and development, urban design, real estate, and environmental management and assessment, we place a strong interdisciplinary emphasis on our work. We are home to the Manchester Urban Institute, and our problem-based approach to learning will help you think critically and creatively.

Graduates of our master’s courses in Planning, Global Urban Development and Planning, Urban Design and International Planning, and Urban Regeneration and Development, can proceed to become full members of the Royal Town Planning Institute (RTPI) and a chartered town planner. The RTPI accredits our master’s courses in Environmental Impact Assessment and Management, and Global Urban Development and Planning as specialist master’s degrees.

Our master’s courses in Planning, Environmental Impact Assessment and Management, Urban Regeneration and Development, and Real Estate are accredited by the Royal Institution of Chartered Surveyors (RICS).

RESEARCH PROGRAMMES
Planning and Environmental Management PhD
Research Methods with Planning and Environmental Management MSc
Urban Design and International Planning MSc
Urban Regeneration and Development MSc

You may also be interested in: Earth and Environmental Sciences, Geography.

FUNDING
We offer several postgraduate taught scholarships and merit awards to outstanding applicants, and fund up to ten new PhD students through studentships equivalent to those provided by the Economic and Social Research Council.

CAREERS
Our graduates work in environmental agencies and consultancies, private planning practices, real estate management, national and regional government (UK and overseas), local authorities, NGOs, and the water, energy and industrial sectors.

WHY MANCHESTER?
Ranked fifth in the UK for planning in the Complete University Guide 2019
Opportunities for international fieldwork
Manchester has the largest concentration of professional practices outside London, and we enjoy strong professional links with planners, urban developers, real estate practitioners and environmental managers.

POLITICS

What is politics, and what does it mean to be political? Why do violence, inequality, and poverty persist in the world? Why do we organise ourselves as we do at a local, national, and global level? How do political parties win elections and govern successfully? And how do we change the world in which we live?

These are just some of the questions we consider at Manchester – questions that are directly relevant to everyone and which raise fundamental issues about what it means to be human and living in complex times. Politics is the study of power in society, about who rules and why they do.

Whether investigating the effect of the global financial crisis on nation-states, humanitarian intervention to prevent famine in Sub-Saharan Africa, international terrorist attacks, or national concerns about the extent of European integration – politics at Manchester is about understanding the implications of such events, and how and why they happen.

We grapple with fundamental questions of how we think, see, and live in the world. We examine politics using a wide range of methods, based on the latest innovations in research. Our large size means we cover a huge range of sub-disciplines, so you will receive a broad education in political studies.

WHY MANCHESTER?
One of the largest and strongest politics departments in the UK, with a long and distinguished history as a centre of research and education
Distinctive research strengths in analytical political theory, comparative public policy, electoral politics, critical international political economy, and poststructuralist international relations.

You’ll benefit from our collaborations with numerous external partners, including NHS trusts across the north-west region, hearing aid companies and educators. Our PhD students undertake research in areas as varied as neuroscience, cognition, audiology, communication disorders and childhood development. Our MRes in Psychology prepares you for a research career or PhD study. The MSc in Clinical and Health Psychology and MSc in Health Psychology give you an academic grounding in theory, research and practice. The MSc in Health Psychology provides British Psychological Society accredited ‘stage one’ training for health psychologists.

**WHY MANCHESTER?**

- Be part of an environment whose research influences, underpins and delivers improved services in international health care and education.
- 85% of our research is rated ‘internationally excellent’ or ‘world-leading’ (3* or 4*) (REF 2014).
- The University houses the ESRC International Centre for Language and Communicative Development (LuCiD), a major new research consortium with the University of Liverpool and Lancaster University, whose mission is to bring about a step change in the understanding of child communication.
- Learn from clinical psychologists who are world leaders in the development and evaluation of psychological and psychosocial interventions in the treatment of psychotic disorders, notably schizophrenia and emotional disorders.
- Be taught by members of the Manchester Centre for Health Psychology, a group of internationally leading health psychologists.
- Postgraduate research students benefit from training opportunities and support through our Doctoral Academy.

PUBLIC HEALTH AND PRIMARY CARE

Discover more
www.manchester.ac.uk/bmh/study/masters
www.manchester.ac.uk/bmh/study/research

We offer substantial postgraduate training opportunities in epidemiology, public health and primary care, ranging from professionally linked master’s courses to research training for academic or health care careers.

Contemporary health and social care practice requires practitioners to be flexible, with broad experience of a range of subject areas, from management and leadership to research methods. Studying our evidence-based courses will equip you with the skills and knowledge to help improve people’s health and reduce inequalities in health.

FUNDING
We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships, including the Medical Research Council and National Institute for Health Research. We also offer several scholarships and awards for outstanding international students, as well as a unique International PhD programme with integrated teaching certificate.

WHY MANCHESTER?
Many modular and online courses, ideal for studying around other commitments and building your CPD portfolio
Receive support from a dedicated team of e-learning, academic and administration specialists
Courses tailored to your needs and aspirations, featuring expert tutors with research and service backgrounds in public health, primary care, health services management and other related specialties
Global alumni network in organisations ranging from the World Health Organization (WHO) and the National Institute for Health and Care Excellence (NICE), to local government offices and the NHS
Research students gain training opportunities and support through our Doctoral Academy

RELIgIONS AND THEOLOGY

Study with us and enjoy access to research strengths and specialist teaching across a breadth of areas in religions and theology, including: biblical studies; Jewish studies; Christian (including political theology; Islamic philosophy; continental philosophy and social ethics.

You'll explore religion and theology in their historical, contemporary and political contexts, uncovering how they continue to influence the world in which we live today, and determining your own study pathway throughout. You'll learn about the impact of religion and theology on human behaviour, looking at local, national and international perspectives. We’ll also encourage you to investigate and interrogate assumptions through stimulating debates and discussions that take into account a breadth of social and cultural backgrounds.

We approach religions and theology from a distinctively comparative, contextual and multidisciplinary angle, and encourage our students to raise new questions and cross boundaries. Close links with subject areas such as Classics and Ancient History, Archaeology, and Middle Eastern Studies offer opportunities for interdisciplinary research and study. Current sample research topics cover subjects as diverse as literary structures in ancient Jewish literature and the relationship between religion and politics in contemporary Britain.

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

You'll gain the versatile analytical skills required to help you apply critical thinking to religion-related issues arising in work settings or in research. Our postgraduate courses can act as a gateway for an academic career, or lead to professional roles in the media, voluntary sector or cultural organisations. For professionals in schools, religious ministries or other areas, our postgraduate programmes bring a new level of expertise and confidence.

WHY MANCHESTER?

Internationally recognised research centres include The John Rylands Library – home to biblical and Jewish papyri, anti-slavery collections and the Methodist and Christian Brethren archives.

There are many interdisciplinary links, notably with colleagues in philosophy; continental philosophy and social ethics. The Centre for Jewish Studies (one of the world’s only three regional hubs of excellence in Europe), the Centre for Biblical Studies (one of the world’s strongest producers of highly cited biblical research) and the Lincoln Theological Institute (conducting pioneering work in theology, such as the first systematic theological treatment of climate change) have a reputation for addressing cutting-edge and unusual research topics, while respecting the classical and long-standing interests of the discipline.

73% of our research activity was rated “world-leading” (4*) or internationally excellent (3*) in the last Research Excellence Framework (REF 2014).

SOCIAL ANTHROPOLOGY

Anthropology at Manchester builds on a strong tradition of innovative social research around themes of social change, conflict and political economy. Today, we have a reputation for addressing cutting-edge and unusual research topics, while respecting the classical and long-standing interests of the discipline. Our anthropological interests have grown both thematically and geographically over the years, and today cover most of the globe.

Our staff work on a range of topical issues, including conflict and its aftermath, economic change, kinship, gender, infrastructures, inequality, globalisation, sexuality, the material world, new technologies, visual culture and representation beyond texts.

We have an unequalled reputation for ethnographic filmmaking, photography and sound. We also have many interdisciplinary links, notably with colleagues in Development Studies, History, Archaeology and Drama.

If you have an interest in, but no background of social anthropology our MA in Social Anthropology is designed as a conversion degree, with many students going on to join the doctoral programme.

## Social Statistics

A high-profile discipline area within our School of Social Sciences, social statistics helps you to develop and apply statistical and quantitative research in the social sciences. Research activities are both methodological and substantive. You can focus on a wide range of subject areas, including social inequalities, population dynamics, social network analysis and survey methodology. We work across disciplines, developing and applying statistical and advanced quantitative methods within a social science framework.

Our strong connection with the Cathie Marsh Institute for Social Research (CMI) reflects our commitment to the integration of professional knowledge and expertise with the wider community. We've built our research culture on high-quality research teaching, supervision and support. As an MPhil or PhD student, you'll play a key role in our research, present at conferences and engage with the research output and we'll encourage you to publish your research.

Our PhD students, many of whom are Research Council funded, join a thriving research programme and receive high-quality training and supervision tailored to your particular needs.

### Why Manchester?

Graduate programmes recognised by the Economic and Social Research Council (ESRC) and the North West Social Science Doctoral Training Partnership

Ranked first in the UK based on the high percentage of our research activity rated as "world-leading" (4*) in the Research Excellence Framework (REF 2014)

### Taught Courses

- Social Research Methods and Statistics MSc/PGDip
- Data Science MSc

### Research Programmes

- Applied Social Research PhD
- Social Statistics PhD

You might also be interested in: Mathematics.

### Funding

For information about funding, see:

- www.manchester.ac.uk/socialsciences/study/masters/fees-and-funding
- www.manchester.ac.uk/socialsciences/study/postgraduate-research/funding

### Careers

Employability is high among our postgraduate alumni, who have gone on to jobs such as data analysts, consultants, civil servants, international organisation staff researchers, project managers, evaluation specialists and government statisticians.

Our PhD students, many of whom are Research Council funded, join a thriving research programme and receive high-quality training and supervision tailored to your particular needs.

### Taught Courses

- Social Work MA

### Research Programmes

- Social Work MPhil/PhD

You may also be interested in: Nursing and Midwifery; Mental Health.

### Funding

We offer a range of funding opportunities for PhD studentships from the various Doctoral Training Partnerships, including the Medical Research Council, National Institute for Health Research and ESRC North West Social Sciences DTP. We also offer a number of scholarships and awards for outstanding international students, as well as a unique International PhD programme with integrated teaching certificate.

- www.manchester.ac.uk/bmh/study/research/funded-programmes
- www.manchester.ac.uk/bmh/study/research/financial-support

### Why Manchester?

Gain a nationally and internationally recognised professional social work qualification and become eligible to register as a qualified social worker with the HCPC.

- Learn through methods involving service users, carers and current social work practitioners
- 100% of our students say our staff are enthusiastic about social work (Postgraduate Taught Experience Survey 2015/16)
- Gain practical experience during 170 days of high-quality placements through our membership of the Greater Manchester Social Work Academy
- Learn from teaching staff who actively undertake research in health and social care

### Careers

Our internationally recognised professional qualifications open up multiple rewarding career options in various fields, including mental health, childcare and child protection, learning and physical disabilities and working with older people. Many social workers work in local authorities, which provide services for adults and children and families; others work in NHS trusts and the voluntary or private sector. They also increasingly work to support communities and more informal networks of community care, and are often key members of multidisciplinary teams across the statutory, voluntary and private sectors who work with a wide range of people.
WHY MANCHESTER?

One of the UK’s largest and most prestigious centres for sociology, we specialise in theoretically driven empirical research and in experimental and mixed methods research.

Our broad expertise includes all areas of contemporary sociology, but we are particularly strong in: socio-cultural change, everyday life, gender and sexuality; cultural practices, consumption and sustainability; social movements and social networks; stratification, inequality, race and ethnicity; technology and material culture.

We value teaching and research that engages with real-world issues. Our most important commitment is providing you with a first-class education to develop your sociological imagination, and research skills to equip you for your future career.

FUNDING

For information about funding, see:
www.manchester.ac.uk/socialsciences/study/masters-fees-and-funding
www.manchester.ac.uk/socialsciences/study/postgraduate-research/funding

CAREERS

Our taught master’s students go on to varying destinations, including PhD study in sociology, research posts in think tanks and local government policy work.

Our graduates have also gone on to careers in: social research for public, private and third-sector organisations; public policy work for local, national and international governmental organisations; education; and writing for media organisations.

WHY MANCHESTER?

Consistently ranked highly for research, we ranked first in the UK for the percentage of our research outputs judged as “world-leading”, and second nationally for our research power in the most recent Research Excellence Framework (REF 2014)

Enjoy access to a world-class library, and active participation in our department’s research seminars, reading groups and conferences

Expert supervision on the range of subjects within contemporary sociology and on multidisciplinary and interdisciplinary projects, involving collaborations with colleagues

FUNDING

Each year a number of scholarships, studentships and bursaries for postgraduate study are awarded on a competitive basis by the University, UK Research and Innovation and other external funders. For details, visit: www.manchester.ac.uk/alc-funding

CAREERS

You’ll have the opportunity to enter a wide variety of careers in intercultural communication, translation and interpreting, as well as positions in in business, NGOs and the arts. You’ll use industry-standard translation software and train in the same kind of interpreting facilities used in the European Parliament. You can also experience industry first-hand, visiting the United Nations Office in Geneva, the European Commission in Brussels, and translation companies in the UK.

Our graduates find employment in the UK and overseas, including roles with cultural organisations, national and regional government, translation agencies, UN agencies and private business. Many of our PhD graduates now have academic careers in universities all over the world, from Athens to Abu Dhabi.

“Use your head but follow your heart.”

Professor Dame Nancy Rothwell, President and Vice-Chancellor of The University of Manchester

Every great journey starts with a single step – and we’ll help you to make it. Discover what you need in order to come to The University of Manchester.
ENTRY REQUIREMENTS

At Manchester we welcome talented students from all backgrounds who have achieved excellence in a wide range of UK and international qualifications.

For details on the exact qualifications, skills and qualities you need to embark on your desired postgraduate programme at Manchester – including English language requirements – visit the programme or course profile on our website:

www.manchester.ac.uk/study

International qualifications
If you have qualifications from outside the UK and want to know whether or not we accept them for entry to Manchester, please visit our website, or email us:

www.manchester.ac.uk/international
international@manchester.ac.uk

English language requirements
A high standard of English is a valuable long-term skill that will enhance your job prospects. We deliver all our teaching, assessment and student support in English at Manchester.

You must therefore be able to demonstrate your proficiency in written and spoken English to the general standard that we require, and to the specific entry requirements of the programme you’re applying for.

If you need a Tier 4 visa to study with us, you must also satisfy UK Visas and Immigration’s English language requirements.

Approved English language tests
Most international students will need to demonstrate English language proficiency through an approved test. These internationally recognised assessments of English are usually designed to determine the ability of non-native speakers who intend to study or train in English.

For example: IELTS Academic is accepted by most British, Australian, Canadian and New Zealand academic institutions

www.ielts.org

In general, we will require an overall score of 6.5-7.5 in IELTS, depending on the programme; many programmes also specify a minimum score in some test sub-scores (eg 6.5 in writing or reading).

Other acceptable qualifications
We do accept some other English language tests for the purposes of admission. Visit our website to find out more:

www.manchester.ac.uk/language-requirements

Stay up-to-date
Some test scores, such as IELTS, are only valid for two years. Your English language test must be valid on the date you start your academic programme, otherwise you’ll need to retake it.

SUPPORT WITH YOUR APPLICATION

Applicants with additional support needs
We welcome applications from anyone who has additional support needs arising from a long-term medical condition, disability, mental health difficulty, or specific learning difficulty such as dyslexia or dyspraxia. We’ll consider your application on exactly the same academic grounds as other applications.

Please get in touch with our Disability Advisory and Support Service as early as possible once you’ve applied. This will help us to get all the support you need in place before you start your programme.

www.manchester.ac.uk/dass

International students
We have educational consultants in many overseas locations who can assist you with preparing and submitting your application. Find out if we have representatives in your country:

www.manchester.ac.uk/countries

</table>
The city centre comprises several districts, each with their own distinct history and unique atmosphere.

- **Market Street, the Cathedral Quarter and Manchester Arndale**
  At the indoor Arndale mall you can shop at more than 200 shops and department stores. Stepping outside, you’ll be met by everything from premium department stores such as Harvey Nichols and Selfridges to high-street favourites.

- **Piccadilly**
  A great place to start your explorations of the city. You’ll find the main train, bus and tram stations here, as well as the Visitor Information Centre.

- **Chinatown**
  Manchester’s Chinatown is an ever popular destination with countless restaurants, Asian supermarkets, events and festivals all year round.

- **Spinningfields**
  The business district of the city is home to some of the biggest names in finance and professional services, including Barclays, Deloitte and Grant Thornton International. But it’s not all about work. You’ll also find cocktail bars, restaurants and designer shops here.

- **The Northern Quarter**
  Vintage fashion boutiques, cafes, fashionable bars, music venues and the indoor markets at Afflecks make this the independent heart of Manchester.

- **Castlefield**
  An inner-city conservation area where you’ll find a Roman fort, brick warehouses, cobbled streets and the world’s oldest industrial canal.

- **Ancoats**
  A former industrial suburb, Ancoats is one of Manchester’s most up-and-coming areas, with bars, restaurants and cafes appearing at an incredible rate.

- **Albert Square**
  The impressive 19th-century Town Hall building dominates this square, where many of Manchester’s biggest festivals take place, including the Manchester International Festival and the Christmas markets.
