

WE ARE A TEACHING ORGANISATION

STUDENTS AND TRAINEES WILL BE INVOLVED WITH THE DELIVERY OF YOUR HEALTH CARE

As a teaching organisation and a provider of healthcare, we have a responsibility to train future Healthcare Professionals. This includes doctors, nurses and other health professionals. This means that students and trainees may be present during your treatment and be involved in your care. All our students work under the supervision of a qualified member of staff. You can make a valuable contribution to their training by allowing students to be involved in your care.

You will always be asked for your permission for students to observe or participate in your care – if you are not comfortable please do say so, nobody will be offended. It will not affect your care and treatment in any way.
