Museum Unveils Monster Exhibit
The Museum unveils its latest and largest exhibit, a cast of the second most complete Tyrannosaurus rex skeleton known to science. At 40 feet in length, the monster exhibit will be not only be a major visitor attraction, but also used for study and research.

Central Manchester Central MP Tony Lloyd paid a visit to the John Rylands Library on Deansgate on the 10th anniversary of the Heritage Lottery Fund which has awarded £8.2 million towards the redevelopment of the historic building.

Staff of the new Careers, Business and Community Division have been busy in launch activities to alumni and British Consulates overseas as well as to local communities in Manchester.

A number of buildings and locations have changed following the merger of the two universities. To ensure staff are up-to-date with these, we have recreated the campus map and highlighted where these are, along with their new names.

Professor Geoffrey Beattie, Head of the School of Psychological Sciences, has been elected President of the Psychology section of the British Association for the Advancement of Science. The BA aims to promote openness about science in society.
At three tonnes and measuring 12.2 metres (40 feet) in length and 3.7 metres (12 feet) to the hip, “Stan” – named after its discoverer - dwarves the other large museum exhibits, such as the skeleton of the sperm whale skeleton (see page 17).

The original 65 million year old T.rex skeleton was discovered in 1987 by amateur palaeontologist, Stan Sacrison, near Buffalo, South Dakota in the USA and excavated in 1992 by the Black Hills Institute of Geological Research. To date, 399 bones have been found – 70% of a complete skeleton. This is on permanent display at the Black Hills Museum of Natural History Exhibit in Hill City, South Dakota.

Dr Phil Manning, Curator of Palaeontology at the Museum, said: “Stan is already proving to be a major attraction at the Museum particularly for young visitors, but it’s much more than that, we will use it for study and research purposes as well.”

Researchers are hoping to unlock the secrets of Stan’s fossil record and teach us more about this incredible creature and the links between dinosaurs and birds.

They have already learned that Stan survived a broken neck, almost certainly in a fight with another T. rex – a hole which is a perfect match for a T. rex tooth has been found in the bones at the back of Stan’s skull.

Phil and his team had been working on the display for Stan in the Fossils (Palaeontology) Gallery since July but after careful preparation were able to erect the cast in just one day.

Stan is displayed as if in a flat run, which may be familiar to viewers of the BBC’s Walking with Dinosaurs series - but this is the first time that a T. rex skeleton has been displayed in this position.

The exhibit was unveiled by President and Vice-Chancellor Professor Alan Gilbert at the preview which was also attended by a group of specially-invited schoolchildren from Saddleworth and covered extensively by the media.

Stan is now on permanent exhibition at the Manchester Museum.

The Manchester Museum unveiled its largest ever exhibit at a special preview on 3 November, a cast of the skeleton of the dinosaur **Tyrannosaurus rex**, the second most complete T. rex known to science.
This week (week beginning 15 November), the campus-wide staff survey, announced in the last issue of UniLife is being launched.

Staff who have access to a computer will receive an e-mail message once the survey is 'live' with a link to the web page. They can then complete the survey online or – if they prefer – complete a paper copy. Staff who do not have access to a computer will be given a paper copy.

The anonymous and confidential survey should take 30-60 minutes to complete but it will be time well-spent, with the results used to directly inform the University’s operational planning. The deadline for responses is 3 December.

It is intended that the survey will be carried out every two years so that the President and his Senior Management Team use the feedback to influence how the University is run.

The results will be publicised in 2005.

The staff survey team would like to thank all the staff that have helped in the focus groups, pilot and the drafting of the questionnaire.

---

The delegation comprised Professors Zeng Xianyi, Dean of the Law School of Renmin University; Wu Handong, President of Zhongnan University of Economics and Law; Zhu Yong, Vice-President of China University of Political Science and Law; Wang Chenguang, Dean of the Law School of Tsinghua University; along with officials from the Ministry of Education and the Chinese Embassy in London.

The delegation was welcomed by Professor Andrew Sanders, Dean of the School, Professor Asif Qureshi, Director of External Relations, Dinah Crystal External Relations Officer, Law School; Professor Alistair Ulph, Vice-President and Executive Dean of the Faculty of Humanities; Professor Paul Layzell, Vice-President for External Relations.

After a discussion on co-operative arrangements, the guests met Chinese students and toured the University including the Legal Advice Centre. This award-winning service set up by the School of Law with the support of law firms in Manchester, gives undergraduates the opportunity to work on real cases alongside solicitors while providing free legal advice to the public.

This was followed by lunch when the Chinese delegation also met members of the local Chinese community including Mr Michael Redfern QC (Northern Circuit) and Mr Frank Sindair the Law Society President.

---

The delegation comprised Professors Zeng Xianyi, Dean of the Law School of Renmin University; Wu Handong, President of Zhongnan University of Economics and Law; Zhu Yong, Vice-President of China University of Political Science and Law; Wang Chenguang, Dean of the Law School of Tsinghua University; along with officials from the Ministry of Education and the Chinese Embassy in London.

The delegation was welcomed by Professor Andrew Sanders, Dean of the School, Professor Asif Qureshi, Director of External Relations, Dinah Crystal External Relations Officer, Law School; Professor Alistair Ulph, Vice-President and Executive Dean of the Faculty of Humanities; Professor Paul Layzell, Vice-President for External Relations.

Central Manchester MP Tony Lloyd paid a visit to the John Rylands Library on Deansgate recently on the tenth anniversary of the Heritage Lottery Fund which has contributed £8.2m to the redevelopment of the building.

The Library, which is the Special Collections building of the John Rylands University Library, is currently undergoing refurbishment to carry out restoration works on the historic building and provide state-of-the-art visitor facilities. The work has been funded by £8.2m from the Heritage Lottery Fund and more than £3m from the European Regional Development Fund, with the ‘Unlocking the Rylands’ campaign aiming to find another £4 million.

During his visit to the site, Tony Lloyd met with Head of Special Collections, Dr Stella Butler, who accompanied him on the tour of the Library.

Tony Lloyd said, “I have visited John Rylands Library in the past and it is certainly true that it is one of Manchester’s hidden treasures. It is appropriate that my visit coincides with the 10th Anniversary of the creation of the Heritage Lottery Fund, as this project is one of the many that have benefited from the fund over the past 10 years.”

Tony Lloyd said, “I have visited John Rylands Library in the past and it is certainly true that it is one of Manchester’s hidden treasures. It is appropriate that my visit coincides with the 10th Anniversary of the creation of the Heritage Lottery Fund, as this project is one of the many that have benefited from the fund over the past 10 years.”

The University’s international and alumni relations activity has led to the establishment of a $25,000 (c£16,000) scholarship for an Arizona State University (ASU) graduate to study for a Masters in any subject here at Manchester.

The award has been funded by a donation from Mike and Shirley Molyneux to the North American Foundation for the University of Manchester (NAFUM), and is for study in any discipline in 2005/6. The University already has close links with ASU through its undergraduate exchange agreement and first made contact with Mike in 1997 through the Development and Alumni Relations Office (VUM).

The Molyneuxs who live in Phoenix, are originally from the North West of England - Mike was an engineering student at Manchester Metropolitan University. Now retired, he was previously President of Cytec Engineered Materials.

Tanya Luff, Deputy Head of the International Office, said: “The fact that we are now the UK’s largest university played a key role in creating the scholarship which will help to raise our profile in the US and significantly strengthen our existing undergraduate links with ASU.

“A key selling point for US students to study in the UK is that here a Masters only takes a year to complete – in the US it takes two.”

From left: Dr Stella Butler, Head of Special Collections; Alison Firth, Library Development Officer; Tony Lloyd MP.
A new Centre has been established at the University to bring together the wealth of expertise in cultural theory on campus from across several disciplines within the new Faculty of Humanities.

The Cultural Theory Institute (CTI), is a cross-disciplinary networking initiative which co-ordinates research activities on the Cultural Theory theme. Members of the Institute are drawn from the Schools of Social Science; Arts, Histories and Cultures; Languages, Linguistics and Cultures; and Environment and Development.

There is currently a network of 50 affiliates to the CTI and the University can boast leading experts in this field. These include Professor of Cultural Theory Terry Eagleton, Senior Lecturer in English Literature, Ken Hirschkop, and Amelia Jones, Pilkington Professor in Art History.

CTI Director Dr Lisa Adkins, a Reader in Sociology, said: “Across the former Faculties of Arts and Social Sciences, there was the recognition that many people were working on cultural theory themes in different departments. The idea of this initiative is that bringing people together will produce more than the sum of its parts - for example generating stronger research grant applications. We want to draw on the fact that we have these individuals who are renowned internationally and enhance our profile.

“There is a lot of synergy between different departments and cross-disciplinary research fits in with the new University structure and the Manchester 2015 agenda. There is real potential for some exciting collaborations.”

The CTI team, based at 178 Waterloo Place, comprises an Administrator and five Student Research Associates whose work includes organising a series of postgraduate activities under the Cultural Theory theme including reading groups, a postgraduate seminar series and culture-related activities under the auspices of Kultur Café.

On 21-23 January 2005, the CTI will hold its inaugural conference ‘Making Use of Culture’ to instigate a rethinking of customary ways of imagining, interpreting, allocating and implementing culture. Five international plenary speakers will be showcased, and University President, Professor Alan Gilbert, and Vice-President and Executive Dean of the Faculty of Humanities will welcome delegates.

For further information, visit the website below or call 275 8997/8.

www.cti.man.ac.uk/

Around 50 people attended the launch of a major new piece of research looking at the relationship between performance and war at the University last week.

‘In Place of War’ is a £386,000 project being undertaken by the Drama Department’s Centre for Applied Theatre Research.

The research team, which is being led by James Thompson will look at examples of performance in war-torn areas, as well as studying performance projects by communities fleeing conflict, such as refugees and asylum seekers in the UK.

At the launch, the team gave an overview of the project which was followed by a performance of a play entitled ‘I have before me a remarkable document given to me by a young lady from Rwanda’, which tells the story of a Rwandan asylum seeker living in London.

The play has been inspired by real life experiences by Rwandan asylum seekers in the UK and is being performed by the London-based theatre company Ice and Fire, which aims to present new writing about people caught up in wars and conflicts.

The Iraqi theatre director who attended the event Alan Amin runs World Theatre Company, based in Manchester, and is an Iraqi Kurd who fled Iraq after suffering persecution.

From Consulates to Check-Outs

Successful events were held at the British Consulates in Boston and New York to thank alumni and Consulate staff for their support of the former Victoria University of Manchester and UMIST and to launch the new University. The events were organised in collaboration with colleagues in the Alumni Office.

Consulates

The vision for 2015 was well received. Alumnus Roland Challons-Brown welcomed the opportunity it provided for alumni ‘to develop a more strategic engagement with the University’. Both Consulate staff and alumni were keen to work with the University in imaginative ways including:

- Consultancy and support to promote the University to US businesses;
- Numerous offers of mentoring to prospective and existing students;
- Enquiries on postgraduate study;
- Commitment to work in partnership with the University to support inward investment to Manchester and the North West.

There was also considerable interest in several of the University’s research themes and its work with deprived communities in Manchester.

Jane Ratchford, Director of the BCCD, said: “A key aim was to develop a ‘sales team’ of influential advocates who would promote the 2015 strategic plan. I am confident that we left behind us alumni and Consulate staff able and willing to undertake this role on our behalf.”

Check-outs

To celebrate the national ‘Make a Difference Day’, BCCD staff volunteered their services as careers and business advisers to the public at the ASDA Eastland store. Their message was that the University wanted to make a contribution to community, and was committed to being a university of the city, and for the city.

Fifteen BCCD staff, including the Director and Deputy Director, offered people of all ages and backgrounds, careers guidance, useful tips on applying to university and advice on business start-up. The venue, one of the largest superstores in the UK attracting 72,000 shoppers a week, is based in a deprived area of Manchester where progression rates into higher education currently stand at only 0.02%.

Andrea Rannard of the BCCD and event coordinator said: “University staff relished the opportunity to share their expertise with members of the local community and to try to make a difference to the lives of others.”

The Business, Careers & Community Division (BCCD) has been busy in launch activities to alumni and British Consulates overseas as well as to local communities in Manchester.
Several buildings and locations on campus have changed their names following the merger. To ensure staff are up-to-date with these, here we have recreated the campus map and highlighted where these are along with their new names.
In consultation with their respective Faculties, Faculty Managers have come up with new names. Only a few changes were proposed and adopted as a temporary measure, these are:

- Manchester Business School is now Manchester Business School West
- Manchester School of Management is Manchester Business School East
- The Arts Building is now Humanities Lime Grove
- The School of Architecture is now Humanities Tuer Street

Other buildings which have name changes are:

- Main Building (UMIST) is now Sackville Street Building
- The Music Building on Denmark Road is now the Denmark Road Building
- The John Owens Annexe is the Eddie Newcomb Student Services Centre
- Coupland II is The Martin Harris Building

There are three long-term temporary accommodation areas which are to be named:

- Portacabins adjacent to Crawford House are the Lamb Building
- Portacabins adjacent to the Materials Science Centre are the Newman Building
- Portacabins adjacent to the Zochonis Building are the Chisholm Building.

Staff should be aware that the campus car parks have now changed and are named A-G.

Staff are also asked to remember that the terms ‘Sackville Street’ or ‘Oxford Road’ ends of the campus should be referred to instead of ‘North campus’ and ‘South campus,’ to reflect the single University on one campus.
... I believe that research has to be collegial - we all benefit from bouncing ideas off one another.

Gaskell’s Gateways

Not the man in the Moon, but a man with a mission to Mars has played a pivotal role in opening one of the gateways on Professor Simon Gaskell’s career path.

Professor Colin Pillinger, the irrepressible architect of the attempt to land Beagle 2 on Mars, was a fellow researcher at Bristol and remains a friend. Nearly 30 years ago, he gave Simon some crucial advice when a key job opportunity came up in Cardiff. “It was the perfect job for me, but it came at the wrong time,” says Simon, who was then holding an MRC post-doc Fellowship in the Department of Chemistry at Glasgow. Colin advised him to apply anyway - and see if the appointment might be deferred for a year. Simon did so, the arrangement was agreed and, in 1977, he took up the job of Principal Research Officer and Head of the Mass Spectrometry Unit at the Tenovus Institute for Cancer Research at the University of Wales College of Medicine in Cardiff.

“I’m very grateful to Colin,” says Simon. “It changed my direction at a time when I had identified the exciting opportunities in applying my skills to the medical rather than the environmental field.” It was the start of a nearly a decade of trailblazing work in Cardiff, particularly on steroid analysis in relation to breast and prostate cancer.

Today, nearly 30 years later, the research interests of his group, in this University’s Michael Barber Centre for Mass Spectrometry, include a contribution to the Leukaemia Research Fund National Proteomics Facility, in collaboration with the Paterson Institute. So, the cancer-related work goes on. “Fundamental understanding of analytical chemical techniques enables us to contribute to the elucidation of problems of fundamental biological and clinical importance,” he says.

Much has happened, of course, between that beginning in Cardiff and his position now in Manchester, and many gateways have been negotiated on the way, but you can see the path. Now, he is taking on responsibilities as Associate Vice-President for Research – and, clearly, his track record over the years of front-line research and of fostering collaboration within the University, as well as with institutions in other countries, especially the United States, enables him to lead by example.

His new responsibilities will complement the work of the Vice-President for Research, Professor Nancy Rothwell FRS, who also carries a big research commitment of her own.

“I strongly believe that individual academics need to take responsibility for covering the costs of their own research,” he says. “But I also believe that research has to be collegial - we all benefit from bouncing ideas off one another.”

His view is very much coloured by his experience, especially in the US, where he worked for several years, in Texas and in North Carolina, in the ’80s and early ’90s.

He had a sabbatical year from Cardiff to lead the Mass Spectrometry Group at the National Institute of Environmental
Health Sciences at Research Triangle Park, NC. And in 1987, he moved to the States as Professor of Experimental Medicine and Pharmacology at Baylor College of Medicine in Houston.

He worked on developing physical chemical techniques to solve medical problems, particularly aspects of cardiovascular disease. “It was very stimulating,” he says. “But since Baylor was a private college, you had to compete in the marketplace - set up your stall, so to speak, and beat off your competitors. I had no problem with that, but it didn’t exactly encourage collegiality in the way that we know it here.”

Ever since then, he has held to his dual principles of individual responsibility, bolstered by collaboration. “The productivity of UK science is related to the collaborative approach,” he says. “I suppose I have what amounts to an addiction to interdisciplinary work – departmental boundaries are irrelevant.”

Even at the very beginning of his time in Manchester - he came in 1993 as Professor of Mass Spectrometry at UMIST - he experienced the sort of collegiality he champions today. He had a meeting with Rob Beynon, Professor of Preclinical Veterinary Medicine at Liverpool and formerly at UMIST. “It was wonderful,” he says. “We just bounced ideas off each other all afternoon.” He still collaborates with Rob and is a Visiting Professor in his department. And, reaching further back, he still does collaborative research with colleagues in the US.

His attachment to America goes back to school days. Before he went to Bristol to read Chemistry, he spent a year, courtesy of an English Speaking Union scholarship, at a private school in California - and the late 60s were a great time for a teenager to be there. He grew his hair long, embraced the hippy culture, made a lot of friends, did the 99 days-for-$99 unlimited travel deal on Greyhound, swapped his BOAC return ticket (as you could then) for a cruise home on the Queen Elizabeth.

Indirectly, it was that experience which shaped his future career. “I had such a good time, I badly wanted to go back and spend a summer vac there,” he says. “A friend suggested I talk to the Professor of Geochemistry, Geoff Eglinton, who had collaborators in California. I did – and he set me up with a lab job in Berkeley.”

When he came back, almost as a quid pro quo, but partly inspired by his summer experience, Simon opted to work with Prof Eglinton FRS, who was interested in what happens to steroids in lake sediments. (Biological processes represent the first stages in the development of oil). That’s how he ended up doing a PhD in Geochemistry, leading to a thesis entitled “The environmental geochemistry of sterols.” Another gateway.

He and his wife, Deirdre, an educational psychologist, met as undergraduates at Bristol. They enjoy all that Manchester has to offer culturally, having season tickets to the Royal Exchange and being frequent visitors to the Halle. They keep fit down at the gym. They have two children, Clare, 25, a psychologist, met as undergraduates at Bristol. They enjoy all that Manchester has to offer culturally, having season tickets to the Royal Exchange and being frequent visitors to the Halle. They keep fit down at the gym. They have two children, Clare, 25, a psychologist, and 23-year-old Nick, who is training to be an architect.
Veronique Rizzuto from the Teaching and Learning Assessment Office has just returned from Ethiopia where she worked as a volunteer for ‘Habitat for Humanity’ helping to build simple houses for homeless families in Dese.

Veronique said: “Nothing quite prepares you for the images that Ethiopia presents to the visitor. There a family of ten is crowded in a house no larger than an average sized sitting room in the UK. The school had four classrooms for 450 children and no toilets.”

Veronique has now committed herself to raising funds with some of the volunteers, to build more classrooms and facilities for the Karagutu Elementary School in Dese.

Veronique thanks all those who donated money for the Habitat for Humanity building project in Dese. Your contributions helped to build 15 houses; 150 more are to be built over 3 years.

If you wish to make a donation for the school project, you can ‘Buy a Brick’ for £1.50. Email Veronique on hardyv_36@hotmail.com

http://groups.msn.com/Ethiopia2004

Staff at the John Rylands University Library took part in ‘Wear it Pink Day’ on 29 October, a national day organised by Cancer Research UK in which organisations are invited to get their staff to dress up in pink clothing and pay £2 to Cancer Research.

Organised by Diana Leitch - Deputy University Librarian and Associate Director JRUL (Information Resources and Academic Support), the day along with a cake stall, raised £239.50.

Thomson Learning who were visiting the Library on the day were invited to join in the fundraising efforts.

GE Foundation awards

The GE Foundation and the Institute of International Education (IIE) recognised the first winners of the GE Foundation Scholarship at a public awards ceremony held in London recently. At the ceremony, Charles Alexander, the National Executive of GE in the UK, presented awards to 12 outstanding students from five universities, including Victor Tsoi from The University of Manchester.

“The GE Foundation, the philanthropic organization of the General Electric Company, invests in initiatives that improve educational opportunity and strengthen community organizations in GE communities around the world. The award identifies low-income, first-year students who have demonstrated academic excellence, community involvement and financial need, and continues throughout their second and third years of study. “This scholarship identifies promising young scholars who have demonstrated their commitment to society and provides them with tools to develop their leadership potential.

Victor Tsoi, a Computer Science student at the University was among the winners, and was awarded £2000 as part of the scholarship programme. Victor commented: “I am very pleased to be given this award. I applied just thinking I would ‘give it a go’ and was surprised to be chosen. I will use the money to further my professional development whilst at University.”

Victor will also be offered a mentorship opportunity within GE UK and will participate in community work in their home or university communities.

Psychology President

Professor Geoffrey Beattie, Head of the School of Psychological Sciences, has recently been elected to serve as President of the Psychology section of the British Association for the Advancement of Science (BA).

The BA is the UK’s nationwide, open membership organisation dedicated to connecting science with people, so that science and its applications become accessible to all. The BA aims to promote openness about science in society and to engage and inspire people directly with science and technology and their implications. Professor Beattie was chosen as a result of his ability to communicate scientific issues to the public, and will be responsible for putting together a programme of events for the BA’s Festival of Science, which takes place in Norwich in September 2006.

He said: “I care passionately about the communication of science, and in particular psychology, to a general audience. Psychological science, in my view, is far too exciting to be kept locked behind doors in the ivory towers of a University.”

What’s On

The Whitworth Art Gallery

DISPLAYS/COLLECTIONS

William Morris “Ministering to the Swinish Luxury of the Rich” to 23 December 2004
An exhibition by David Mabb. Mabb recycles familiar images from the Gallery’s holdings of William Morris material to produce a new installation.

Ship Ahoy! to February 2005
This exhibition of watercolours, prints, wallpapers and textiles includes depictions of galleons, fishing smacks, trading vessels, warships and freshwater boats. The exhibition also features a Ship Ahoy! Reading area providing children’s books with stories about ships, pirates and the deep blue sea.

Walter Sickert ‘Drawing is the thing’
October to 5 December 2004
This extensive loan exhibition of Sickert’s drawings offers an unrivalled insight into his techniques, themes and, most importantly, his reasons for the drawing.

TOURS AND EVENTS

Every Saturday at 2pm there is either an Exhibition Tour or an Eyepoener Tour.

Walter Sickert Curator’s Tour - Sat 30 Oct, 2pm, FREE

CONCERTS

Dibley String Quartet: excerpts from quartets by Dvorak and Shostakovitch, Sun 31 Oct, 3pm, FREE

Whitworth Art Gallery, Oxford Road, 0161 275 7450  www.whitworth@man.ac.uk

Contact Theatre

Written and directed by Nona Sheppard
CRAZY LADY
Featuring music composed and performed live by Nikkii-Kate Hayes. Design by takis
Two old friends, Claudia and Jaz, estranged for twelve years, meet up again in a dark and mysterious gothic bar called the Crazy Lady to talk about times past. With each of them hiding and revealing the myriad of truths in their lives, they find themselves caught up in a bizarre tangle of memories, passion and madness, with completely unexpected consequences...

“Nothing is overstated but plenty is understood in this impressive piece.”
The Stage

BSL Performance Thursday 18 November
Wed 10 Nov 2004 - Sat 20 Nov 2004, £9/£6
Forced Entertainment

BLOODY MESS
Forced Entertainment’s Bloody Mess defies categorisation, creating a startling and comical new logic from the collisions of disconnected characters, stories and performances. Influenced by popular culture, cinema, contemporary art and the occasional dash of heavy metal, Bloody Mess takes these elements and creates a whole that is intelligent, darkly comic and unexpectedly moving.
Marking their 20th birthday, Bloody Mess is Forced Entertainment at its best – uncompromising political Pop Art, ironic physically demanding camp trash, visual spectacle that tries to describe the modern world in all of its beauty, horror and complexity.

EVENT!
Post Show Discussion - Tues 23 Nov
Forced Entertainment will be answering your questions at this special event for BLOODY MESS ticket holders.

Tue 23 Nov 2004 - Wed 24 Nov 2004, £9/£6

Contact Theatre, Oxford Road, Manchester
Tickets Info: 0161 274 0600
For information on other events please visit our website www.contact-theatre.org
A limited number of tickets are available from just £4 on the day from the Ticket Office between 12pm - 4pm daily.
**Jodrell Bank**

The facilities at Jodrell Bank are going through a period of redevelopment. The Visitors Centre currently has a café, an exhibition space and a 3D theatre open, and visitors can still explore the various trails and the natural habitats of the Arboretum's 35 acres with its 2000 species of trees and shrubs and National Collections. In January 2004 Jodrell Bank completed a B0 degree observational pathway close to the base of the world famous Lovell radio telescope.

---

**Manchester Museum**

Fridays (during term time), 11am - 2pm
**Magic Carpet**
Storytelling and story making for the under fives. Wed 17 Nov, 1.30 - 3.30pm FREE

**What The Curator Found**
Hidden treasures from the Mediterranean Gallery (Dr. John Prag, Keeper of Archaeology at The Manchester Museum) - Find out what real treasures are to be found in our Mediterranean Archaeology collection. Pre-booked event.

Thurs 18 Nov, 6.30 - 7.30pm
**Communicating Vessels**
Surrealism and Contemporary Art - One of a series of public conversations organised by the ARHB Research Centre for Studies of Surrealism, five contemporary artists will discuss - how their work interacts with Surrealism. For further information and to book tickets, please call Anna Davey on 0161725 6788.

Sat 20 Nov, 1.30 - 2.30pm FREE

**Hidden Treasures**
Join our curators of Ethnology and Zoology at the ‘Buried Treasure’ exhibition handling table, as they show some of the ‘treasures’ from the natural world. Drop-in event.

Sat 20 Nov, 2.30 - 4.00pm

**Story Scrolls**
Every treasure tells a tale. Create stories about your own treasured objects or be inspired by those shown at the Museum.

Sun 21 Nov, 2.00 - 3.00pm

**Tusk Tales**
Take a look at the Benin tusk on our Living Cultures gallery and recreate your own in this art and craft session.

Thurs 25 Nov, 6.30 - 8.30pm

**Alderley**
A cross-disciplinary project connecting with the community (Clare Pye) - Part of the Centre for Continuing Education Winter Lecture Series. Gain an insight into behind the scenes research and a fresh outlook on the newly refurbished Museum. The series costs £22 per person. To book your place call 0161725 3278/79.

Thursday 25 November

School of Pharmacy and Pharmaceutical Sciences: “Clinical Pharmacy in the Pharmaceutical Industry?”. Dr Terri Cameron (OSIP). 4pm, LTH.A, Coupland III Bldg.

Looking Back

The Manchester Museum 1898

As The Manchester Museum unveiled its newest and largest exhibit this month in the shape of T-rex (see page three), this photograph taken in 1898, shows the winching into place of the skeleton of a young sperm whale. This was then the largest exhibit at 36 feet in length and is still the centrepiece of the Gallery today.

The whale was found stranded and dying on the Massachusetts coast near Provincetown in 1896 and was bought by the Museum from Ward’s Natural Science Establishment in New York state with a donation of £50 whilst the Keeper of the Museum, Professor William Hoyle, was on holiday there. The bones were shipped to Manchester Docks and assembled in three weeks.

Alfred Waterhouse’s purpose-built Natural History galleries built in 1888 had, over the years, been added to in a piece-meal manner. Some features including the suspension of the sperm whale in 1898 were an improvement, although the main floor of the gallery had become cluttered by the addition of cases of varying sizes.

A complete refurbishment, in both style and content was carried out in 1990-91, in keeping with the Bird Gallery which was completed in 1981. The most recent and extensive redevelopment of the museum was completed in 2003, funded by the Heritage Lottery Fund, the ERDF and the University. This created additional galleries to display more of the museum’s six million artefacts.

The next big push for the Museum is the redevelopment of its Natural History galleries, which were little altered during the capital development project. This project offers an exciting opportunity to integrate issues of social responsibility through interdisciplinary research from across the University, looking at issues of local and global concern related to the environment.

Noticeboard

The Teaching and Research and Development Network

The Teaching and Research and Development Network (TRDN) is an interdisciplinary network that exists to promote good practice through dissemination of research on student learning. It is open to all staff involved in the teaching and learning process. Information on TRDN events and activities are available at www.intranet.man.ac.uk/rsd/cl/profess/trdn/index.html

Grand Total

The UMIST Auction held during the Day of Celebration on 8 September, raised a grand total of £906.13 for charity.

The proceeds will be split between Marie Curie Cancer Care and The Wood Street Mission.

Thanks go to everybody who took part, with special thanks to Jill Earnshaw and Steve Williamson for all their hard work.

The University of Manchester Wine Club:

“Burgundy the ‘King of Wines’. 5.30pm, Senior Staff Common Room, Staff House, Sackville Street, £5-£9.

Want to receive an extra £100?

We are looking for men and women to take part in research studies at the Neuroscience & Psychiatry Unit. Everyone is eligible to apply. We’ll send you a simple health questionnaire to complete, which will help us allocate you to the most appropriate project. A researcher will then get in touch with you to tell you the details of their study, giving you the opportunity to ask questions about it before you commit to taking part.

If you are interested, please contact us at: 275 7432 or 275 7670 npuvols@fs1scg.man.ac.uk

Anna Malone
Trainee Disability Adviser

If you love to surf then there's arguably only one place in Britain to be - the South West coast, which is why every weekend Trainee Disability Adviser Anna Malone grabs her surfboard and heads for North Devon.

Anna took up the sport just over a year ago and, much like her new job, she's still getting to grips with it.

“I love being by the sea, and I travel down to Devon most weekends,” she says.

Anna started working in the Disability Support Office, which provides advice and support to disabled students, in February after spending a year as an Administrative Secretary in the Department of Psychology. It was there she realised how much she enjoyed working with students.

“I love dealing with students and I was finding that more and more in that role, I was dealing with students who had disabilities or needed support during exam times, and I found it really rewarding. Then this job came up, I applied, and I got it,” she says.

At the moment Anna is still learning the ropes. Along with the other Disability Advisers, Anna deals with student enquiries and meets with students to identify their support needs. She also assists students with applications to their funding bodies for the Disabled Students Allowance.

“Students may require adapted materials or equipment such as dictaphones to record lectures, or screen readers for their computers, which can be expensive. What we are able to do is assess their needs, and to help them apply for LEA grants,” she says.

In addition to helping with the day to day running of the office Anna’s trainee programme involves her producing a portfolio of reflective writing about her experiences, networking with other Disability Advisers in the HE sector and producing a project on ‘issues facing disabled students in higher education’.

There are currently over 2,200 disabled students registered at the University. These include students with Specific Learning Difficulties (such as dyslexia), mental health difficulties, visual impairments, hearing impairments, medical conditions and mobility difficulties.

“You cannot make assumptions from the nature of a student’s disability about their support needs. Two students with the same disability can be affected in completely different ways,” says Anna.

Students are welcome to drop-in to the Disability Support Office at any time, although Anna would recommend that an appointment is made wherever possible.

Looking to the future, Anna is hoping to complete her training and become a fully-fledged Disability Adviser early in 2005, and on the beach front, she’s got her mind set on somewhere much more exotic than Devon.

“I love being by the sea and hope to go to get the chance to travel to somewhere a little more exotic than Devon in the near future. Sri Lanka or New Zealand are both places I would like to visit.”

The DSO, located in room LG27 on the Lower Ground Floor of the John Owens Building, is open from 9am-4.30pm (Mon-Thurs) and 9am-12pm (Friday). For more information about what they do please visit the following web address.

www.manchester.ac.uk/disability
