

Timelines

University of Manchester eProg Summary

A timeline is a way of visualising PGR progression, from induction to graduation. It encompasses all the milestones on a pathway. A pathway may have multiple timelines, for example one for each year or one for year 1 and another for years 2-3.

Create a timeline

Enter eProg and select 'Manage Pathways'. Search for the relevant pathway you wish to create a timeline for.

Once found, select the 'Timelines' tab. Select 'Add Timeline'.

Milestones, Skills Training and Taught Units (already created and added to the Pathway) are shown in the 'Components' box. The availability of these items will depend upon the start date and span selected for the Timeline.

Remember! Enter a title, start date and time span for the Timeline first.

Select items for display on the Timeline by clicking on the relevant items and moving them to the right-hand box using the arrows.

Enter start and end labels to the timeline, if needed.

Click 'Preview' to visualise the Timeline. Click 'Continue Editing' to add more information to the Timeline.

Click 'Save' once the Timeline is complete. **Changes saved** indicates successful Timeline creation.

If you need to edit or delete the Timeline, this is possible by selecting 'edit' or 'delete' in the Timelines tab.
