

Corporate Planner: Using Table Reports

How to change the datastreams selected in Stream View

Changing the Datastreams Selected in Stream View:

The datastreams visible in the stream view can be changed.

1. **Create the Stream view table report**

See the [Using Stream View](#) user guide

2. **Right click on the datastream in the row of the Table Report you wish to change.**

3. **Click Rows.**

4. In the *Row Type* field, **select the type of data that you wish to view.**

This is either *Analysis Row* or *Data Stream* depending on whether you wish to view data or an analysis of that data.

5. To view a different datastream, **click the down arrow next to the *Data Stream* field.**

6. **Select the required datastream from the drop down menu.**

7. **Click OK.**
