Description of Grant monies available:	
<p>Manchester Statistical Society operates a scheme for small research grants of up to £10,000 from the bequest made by Sir Harry Campion. The grants are for research on the political economy of the North West. The grants can be used by academic staff and research students to develop short-term research projects or even to develop a PhD placement that produces an output that will be relevant to the areas of research listed below.</p>	
Specific research areas of interest to Manchester Statistical Society:	
<p>While applications are particularly welcome on contemporary issues relating to:</p> <ol style="list-style-type: none"> 1. Economy, society and government in north west England 2. Of particular interest are projects and placements that relate to the devolution of budgetary control of health to the combined Greater Manchester Authority and to the concept of the “Northern Powerhouse” <p>Funds have been granted to a broad range of topics concerned with the North West's political economy.</p>	
Other Comments:	
<p>Applications for funding must be made using the form on Manchester Statistical Society's website.</p>
