

OPEN POSITION: Unit Coordinator for MSci Final Year projects (BIOL40010) - UNDERGRADUATE EDUCATION

Unit Coordinator for the 4<sup>th</sup> year projects (BIOL40010) in the Integrated Masters (MSci) degree. This interesting role will involve overseeing the yearlong 4<sup>th</sup> year MSci projects, with students having academic backgrounds from all of the undergraduate programmes, from anatomy to zoology. This will involve interacting with the students and the staff acting as supervisors/2nd markers. It includes coordinating several elements of credit-bearing work (MSci student talks and mock interviews in Semester 1 and write-up advice and poster sessions in Semester 2, as well as thesis submission and the coordination of marking). However, it also offers the successful individual the chance to mould this exciting project type with new ideas and formats, working with some of our best undergraduates. Administratively, attendance will be required at the Final-level Examination Boards.

Applications for the post should be emailed to Nicky High ([nicky.high@manchester.ac.uk](mailto:nicky.high@manchester.ac.uk)) and give details of relevant experience and a brief explanation of why this opportunity has attracted your interest. Deadline: Tuesday 25<sup>th</sup> July, 5pm.

Informal queries may be directed to either Nicky, or to Donald Ward (Tel: 55459; Email: [d.ward@manchester.ac.uk](mailto:d.ward@manchester.ac.uk)) or the MSci Academic Lead Ken Grieve (Tel: 63868; E-mail: [ken.grieve@manchester.ac.uk](mailto:ken.grieve@manchester.ac.uk)).
