Manchester Institute of Education

MA Digital Technologies, Communications and Education

2023 – 2024 Programme Handbook

WELCOME TO THE FACULTY OF HUMANITIES

As Vice-President and Dean of the Faculty of Humanities, I would like to extend a very warm welcome to all students in The University of Manchester. The Faculty of Humanities is one of three Faculties in the University and consists of four Schools. We offer an unprecedented range of innovative programmes at undergraduate and postgraduate level, embracing disciplines as diverse as arts and languages, business and management, social sciences, law, education, environment and development.

This rich mix of opportunities makes study at The University of Manchester an exciting and stimulating experience where you will benefit from the experience of leading scholars in your field and from being part of a large, diverse, and international student community. The city has an international sporting pedigree and one of the richest and most influential arts and music scenes, with a lively, culturally diverse city centre that's easy to enjoy on a student budget. There is much to enjoy!

Being at university is not all about what you will learn in the classroom, and you will have access to a diverse range of activities to stretch and develop your knowledge, thinking and skills from field trips and study abroad to volunteering, industrial placements and hundreds of societies. In addition, there is Stellify, a package of some of our most transformative student experiences that enables students to develop beyond their chosen subject. These experiences are why we are the university most targeted by employers.

Within the Faculty, and its constituent Schools, we are committed to providing a student experience of the highest standard and making sure you have the support you need along the way. This handbook will give you information to help you make the most of your time with us. I look forward to seeing you all thrive whilst you are here. Your success is hugely important to me and all our academic and professional staff.

Fiona Devine
Vice-President and Dean, Faculty of Humanities
September 2023

Welcome to the School of Environment, Education and Development

The School of Environment, Education and Development (SEED) was formed in August 2013 and forges an interdisciplinary partnership combining Geography and Planning and Environmental Management with the Global Development Institute (GDI), the Manchester School of Architecture and the Manchester Institute of Education, thus uniting research into social and environmental dimensions of human activity. Each department has its own character and the School seeks to retain this whilst building on our interdisciplinary strengths.

The **Global Development Institute (GDI)** is a culmination of an impressive history of development studies at The University of Manchester which has spanned more than 60 years and unites the strengths of the Institute for Development and Policy Management (IDPM) and the Brooks World Poverty Institute. GDI is the largest development focused teaching, with over 600 full-time postgraduate taught students, and research institute in Europe and emphasises the University's commitment to addressing global inequalities.

Planning and Environmental Management has a 60-year record of academic leadership in Planning education. It has innovative and high-quality graduate and undergraduate programmes for professionals in town planning, urban studies, and environmental management. The discipline has practice links with institutions, companies and communities engaged with environment and urbanism, particularly in north-west England.

Geography has been taught at Manchester for over one hundred and twenty-five years. There are currently over forty members of staff who have a wide range of teaching and research interests. It has a highly rated international research reputation across a broad range of areas of human and physical geography and is regularly ranked in the top 10 Geography departments in the world. It has a large undergraduate population, and four taught Master's degrees.

The **Manchester Institute of Education (MIE)** is the leading university provider of Initial Teacher Education in the North of England. It has a world-leading reputation for excellence in educational research and is the leading provider of doctoral programmes in the Northwest.

The School also contains the *University of Manchester Architectural Research Centre (UMARC)*, part of the **Manchester School of Architecture (MSA)** which was created in 1996 by an amalgamation of the extant architecture schools in the University of Manchester and the Manchester Metropolitan University. UMARC draws upon a wide range of interdisciplinary research and teaching interests within the School and has strong research and practice links into urban design and sustainability.

I hope that you have a successful and enjoyable time in the School.

Professor Martin Evans

Head of the School of Environment, Education and Development

Statement on Dignity at Work and Study

The University of Manchester is committed to creating a learning environment free of harassment, discrimination, victimisation and bullying, where everyone is treated with dignity and respect. The School of Environment, Education and Development will not tolerate bullying, harassment, discrimination or victimisation of any kind, either towards students and staff, or between them. Allegations of bullying, discrimination and harassment will be investigated and, if appropriate, disciplinary action will be taken.

More information can be found at:

Section 1: Guide to Programme

Digital Technologies, Communication and Education (DTCE) is a distinguished, award-winning programme with a rich history spanning nearly twenty years. We are proud of the transformative impact our programme has had on the careers and lives of our alumni, many of whom are now doing innovative work in the field of digital education. The programme equips students with the knowledge and skills to thrive in the digital age, tailored to empower a diverse range of professionals: teachers, lecturers, administrators, managers, e-learning designers, trainers, and all those passionate about education.

As we navigate through the digital transformation, this programme provides you with a profound understanding of the dynamic environment that permeates both our personal and professional lives. By integrating theory with practical, real-world insights, our programme equips you with the necessary competencies to navigate, evaluate, and shape the digital future of education. Whether your goal is to further your career, enrich your understanding of digital education, or position yourself at the forefront of educational innovation, our MA in Digital Technologies, Communication, and Education empowers you to release your potential in this digitally connected world.

This innovative programme takes a broad, critical perspective on the use of technology for teaching and learning. The research-focused curriculum equips you with practical technology skills while also developing your ability to evaluate the role and impact of digital tools in diverse educational settings. Through hands-on activities, you will gain experience with multimedia, mobile apps, video and other technologies to enhance your professional competencies. However, we look beyond technical know-how to explore the historical development, theories, legal and ethical dimensions, and emerging issues associated with education technology.

Core topics encompass digital literacy, management of technological change, communication patterns, distance learning, and appropriate integration of technology across educational contexts – from schools to universities to informal learning. Real-world focus areas bridge the classroom and workplace. Multidisciplinary perspectives shed light on how digital environments influence pedagogy, culture, policy, and society. Class discussions analyse international case studies to relate concepts to your home countries and professional experience. You are encouraged to identify issues of personal interest for further research.

The programme cultivates adaptable professionals ready to make discerning decisions about technology, lead innovation, and navigate the exciting changes reshaping education in our connected world. We look forward to this journey of discovery with you. Please contact us if you need any assistance.

Yours Sincerely,

Mark Carrigan (Programme Director, On Site)

Heather Cockayne (Programme Director, Distance Learning)

1.1 Programme Aims and Objectives

Welcome to the MA in Digital Technologies, Communication and Education (MA DTCE). This innovative programme can be studied either by distance learning or on-campus in Manchester. This handbook contains key information for all students, with specifics about each mode of study highlighted where relevant.

For nearly twenty years, our graduates have made transformative impacts on digital education worldwide. This award-winning programme equips you with the knowledge, skills and critical perspective to evaluate, shape and lead innovation in today's digitally connected education landscape.

The curriculum enables you to:

- Advance your career by enhancing expertise in applying digital technologies and communication across diverse contexts including schools, universities, corporate training and informal learning.
- Develop strong interpersonal and group communication skills to promote independent learning, collaboration, and informed decision-making through reflection.
- Build confidence and capabilities in designing creative educational materials and pedagogies using digital tools.
- Critically assess uses of technologies in formal and informal education, relating this to your professional context.
- Deeply understand and evaluate research and methodologies relevant to digital technologies in education, applying this in projects.
- Analyse rapid technological changes and their multi-faceted impacts on educational processes, institutions, policies and culture.
- You will gain hands-on experience with multimedia, mobile apps, educational video and other technologies while examining the historical development, theories, legal dimensions and emerging issues related to digital education.

At the University of Manchester, you will study at a top-ranked global university and access unmatched expertise. We look forward to guiding you on this journey to become an adaptable, critically reflective professional empowered to steer ongoing transformations in digital education.

Please explore the handbook and get in touch if you need any assistance. We are excited to have you join our distinguished community of educators and innovators.

1.2 Programme Structure

The MA: DTCE requires you to reach a passable standard in 120 credits of taught courses and a 60 credit dissertation.

Individual course units are either 15 or 30 credits. The table below summarises the core units that you must take, made up of 60 taught credits plus 60 for the dissertation. This leaves 60 credits to be taken as optional units. A list of optional units, and more details on these and the core units, is given later in the booklet.

Course Code	Title	Availability	Credits
Core course units - taken by all students (but see the availability notes)			
EDUC77301 EDUC70141	Educational Technology and Communication	Onsite students: Sem. 1 DL Students: Sem. 1 (Year 1)	30
EDUC70441 EDUC77081	Digital Education Research 1	Onsite students: Sem. 1 DL Students: Sem. 1 (Year 2 or 3)	15
EDUC71272 EDUC77012	Digital Education Research 2	Onsite students: Semester 2 DL Students: Semester 2 (Year 2 or 3)	15
EDUC75000	Dissertation	Onsite students: Sem. 2-summer DL Students: Sem. 2-summer (Year 2 or 3)	60

The 60-credit dissertation is compulsory. Its completion will involve you in some form of independent research and – possibly – an actual intervention in teaching practice. The dissertation is expected to be around 15,000 words in length and is submitted at the end of the course.

Please note that it is not possible to take more than 180 credits.

1.3 Career Development

The MA in Digital Technologies, Communication and Education welcomes a diverse range of students interested in exploring the intersection of technology, communication, and education.

Our graduates have gone on to fulfilling careers as:

- Teachers and ICT coordinators in schools implementing technology in creative ways to advance student outcomes.
- Learning technologists and instructional designers in higher education developing innovative curricula and digital learning materials.

- Teachers and university lecturers working in topics related to digital education and digital change.
- Education consultants applying expertise in e-learning, multimedia, and video production to improve training and instruction.
- Policy analysts shaping the future of technology integration in formal and informal learning.

The programme equips students from all backgrounds and sectors with in-demand skills, knowledge, and credentials, whether you are:

- An educator in K-12, higher education, or adult learning looking to expand your digital fluency and credentials.
- A corporate training or L&D specialist aiming to optimize workplace learning through technology.
- A computing professional keen to contribute your technical skills to education and instructional design.
- A communications or media specialist seeking to apply your background to the education sector.

The rigorous curriculum also provides ideal preparation for doctoral study and academic research careers focused on educational technology and digital learning. We welcome inquisitive minds passionate about exploring how technology can empower educators and enrich learning experiences.

Each academic year includes careers support workshops involving DTCE alumni and research support workshops for those interested in undertaking doctoral research.

1.4 Course Unit Choice & Guidance

Summaries follow of each core and recommended optional course units on the MA: DTCE. (However, note that in principle you can take any Masters' level course unit from the School of Environment, Education and Development as an option: see the university web site for the full list.) If you are a Distance learning student, read the next section for more guidance on Unit selection.

For our full-time students, you will be required to complete the full 180 credits (discussed above) within **12 months / one year**.

Semester 1	EDUC77301 (30) CORE Education, Technology & Communication
	EDUC77081 (15) CORE Digital Education Research 1
	One optional unit (15) (see list below)

Semester 2	EDUC77012 (15) CORE Digital Education Research 2
	Three optional units (15x3=45 credits) (see list in section 1.4)
	EDUC77700 (60) CORE DISSERTATION

For our part-time (distance learning) students, you can complete the 180 credits over two or three years. Your options/routes are highlighted below;

Two-year route (For our part-time (distance learning) students)

	Year 1	Year 2
Semester 1	EDUC77301 (30) CORE Education, Technology & Communication - 30 credits covered in 1 semester	EDUC77081 (15) CORE Digital Education Research 1
		Optional units (see list below)
Semester 2	Optional units (see list below)	EDUC77012 (15) CORE Digital Education Research 2
		Optional unit (see list below)
		EDUC77700 (60) CORE DISSERTATION

Three-year route (For our part-time (distance learning) students)

	Year 1	Year 2	Year 3
Semester 1	EDUC77301 (30) CORE Education, Technology & Communication - 30 credits covered in 1 semester	Optional Units (see list below)	EDUC77081 (15) CORE Digital Education Research 1
Semester 2	Optional units (see list below)	Optional Units (see list below)	EDUC77012 (15) CORE Digital Education Research 2
			EDUC77700 (60) CORE DISSERTATION

PLEASE NOTE: During the September registration period students are required to select the course units they wish to take in that academic year ONLY. However, students are advised that it is useful to plan their study path for the entire Programme to ensure that all course

requirements can be met within the two year period and a manageable workload can be achieved.

If anyone has any questions about optional units / choosing units and / or routes then please contact the Programme Director (Heather Cockayne).

CORE UNITS

EDUC70141 Educational Technology and Communication (Core Unit)

Tutor: Drew Whitworth

This unit is the foundation of study on the MA: DTCE and all students, whether full-time or part-time study it in the first semester. It covers (amongst other things):

- the idea of learning being an interaction with an environment, and the roles that technologies, assumptions about teaching and learning, and forms of organisation, play in shaping this environment
- basic pedagogical theories and how these are influenced or affected by technology
- the nature of reflective practice and its importance for the professional development of educators
- different types of educational technology, and what influence each type can and does have over teaching
- the role of communication in organisational, community and public life, and communicative approaches to decision making and teaching
- how ICT and distance learning change the way we organise and think about education
- the history of the Internet and how this has affected communication, both online and face-to-face
- reflective practice
- Appropriate Technology, and what this means for education in the developed world, for those with disabilities, etc.

The unit is assessed by: a 3,000 word self-evaluation document (65%) and your participation in online activities conducted as part of a “working group”, which take place on an ongoing basis through the semester (35%).

EDUC70441/EDUC77081 Digital Education Research 1 (Core unit. This is a final year unit for part-time students.)

Tutors: Louis Major and Felix Kwihangana

This 15 credit course in Semester 1 introduces you to expectations and practices around reading and reviewing educational research, and systematically processing and reporting on educational research. Assessment comprises a critical review of an article draft, a critical literature review and completion of study tasks.

EDUC71272/ EDUC77012 Digital Education Research 2 (Core Unit. This is a final year unit for part-time students.)

Tutors: Louis Major and Felix Kwihangana, working in conjunction with dissertation supervisors.

This 15-credit course unit in Semester 2 helps you develop a research question and looks at data analysis techniques, helping you progress to your dissertation. Assessment involves you developing a research proposal and a related rationale.

OPTIONAL UNITS

Students on the standard MA DTCE must take 60 credits of options, which equates to four optional units. All units listed here are 15 credits. If you are a full-time, on-campus student, you take one of these optional units in semester 1, and three in semester 2. Part-time students have more flexibility as to when they take the options, though note that it is not recommended that any part-time students take any additional options in their very first semester of study. See the section on Course Unit Selection Guidance for Part-time Distance Learners for more details if you are part-time distance learner.

As well as these optional units, to complete your credit load you should also note the possibility of independent supervised study or a client-based project; see below.

SEMESTER 1

EDUC70511/EDUC77401: Multimedia Design and Development

Tutor: Taslima Ivy, Heather Cockayne and Felix Kwihangana

This course unit aims to:

- develop an advanced knowledge and understanding of the role of (digital) multimedia in teaching and learning;
- provide opportunities to analyse and critically reflect on relevant research and theory in the field and make use of it to inform the evaluation and development of multimedia learning materials;
- provide the opportunity for the development of relevant skills in the design and development of multimedia learning materials;

- understand concerns relevant to multimedia learning including accessibility, the appropriate use of multimedia materials in diverse learning context, pedagogical approaches with multimedia and

You will have the opportunity to evaluate multimedia learning materials, explore a range of software & hardware associated with multimedia learning and design multimedia learning materials for specific learning contexts. The assignment provides two options: You will either evaluate existing multimedia learning materials -which you select -or you will create an exemplar set of multimedia materials. For both options you will provide a rationale for the use of, or creation of the multimedia materials in a specific learning/training context.

EDUC70551/EDUC77901: Sustainable Ed Tech Design

Tutor: Amanda Banks Gatenby, Susan Brown.

The unit will combine a critical data studies approach with technology development skills to explore the ethics of educational technology design, development, delivery and evaluation with a central focus on socio-environmental sustainability. This course unit aims to enable students to critically engage with edtech tools used in their educational practice through exploration and experience of the development processes behind these tools.

Through designing, developing and evaluating their own edtech proof of concept, and considering the sustainability dimensions of that concept, students will contribute to their learning communities and extend their understanding and repertoire of edtech research methods. This will enable students to make informed selection of other educational technologies and related interventions and to perform robust evaluations as they encounter edtech tools as practitioners. This will develop a critical understanding of how the combination of commercial concerns and measures for edtech evaluation, including for example usability and learnability, inform the manifestation of designs for learning technologies.

The unit will provide a platform for students to contribute to broader debates with industry developers on sustainable edtech design and development. Working through technology development as a mediator of software, commercial and LXD (learning design) practices, students will explore and share the impacts at the intersection of edtech for sustainability and sustainability of edtech.

EDUC71261 / EDUC77111 Learning design and educational technology practices

Tutor: Amanda (Mandi) Banks Gatenby, Felix Kwihangana and Faculty of Humanities eLearning team

Learning design and educational technology practices evolve quickly as new technologies emerge. In recent years, an increasingly wide range of roles, such as Instructional Designer, Digital Learning Developer and Digital Curriculum Developer have materialised across formal education institutions, informal learning organisations and Learning and Development functions in the commercial sector. This unit offers

knowledge and practical experience of what it means to work in these evolving practices while developing a critical understanding of how these practices are situated at and shaping the boundaries between educators, learners, education institutions and the edtech sector. The unit has been designed through the Association of Learning Design Education for Sustainable Development (ALD ESD) framework and draws on this and other frameworks as a critical lens on practice and to encourage learners to adopt sustainable practices when they enter employment by providing opportunities to try these out within their studies

This unit is assessed through three tasks worked on across 10 weeks of the unit: an individual competencies development action plan; a report on a simulated Learning Consultation; an annotated learning design and resource.

EDUC71221/77091: Digital Education Futures

Tutor: Mark Carrigan

This course unit aims to provide an understanding of emerging technologies (such as machine learning, augmented/virtual reality, generative AI and data visualisation) which are used within education. It will explore the implications, for education and learning, of these technologies with a view to supporting critical but open-minded engagement with their potential. Students will develop understandings of themes and concepts relevant to these emerging technologies through a series of detailed case studies. These will be supported through critical perspectives on digital pedagogy, digital design, organisational sociology and political economy which support analysis of the claims being made about these technologies, the commercial interests underpinning them and their pedagogical potential. The course seeks to equip students with transferable skills for critical analysis of emerging technologies beyond these case studies. It will enable them to undertake independent research with a view to understanding the potential of technological innovations in applied settings, while remaining resistant to the hype which surrounds them.

EDUC 77101/EDUC77101: Language Learning and Technology

Tutor: Felix Kwihangana & Nahielly Palacios

This semester 1 course unit explores a range of technologies (software/ apps, video material, generic tools such as the Internet, word processing etc.) used in language teaching and learning with reference to both classroom practice and self-access applications. Topics covered include:

- Second language learning and the development of digital literacy
- The nature of reading in a digital world and the development of reading skills through the use of computer-based tasks and the WWW
- Technology and task, and text authenticity
- 'Computer' based and networked writing development
- Language learning and Web 2.0

- Synchronous and asynchronous 'computer' mediated communication for language learning
- The role of video texts (analogue and digital) in language learning
- The impact of technology use on learner talk
- Digital games
- Computers and data driven learning

Note that to follow this course unit successfully, you need to have a background and experience in language teaching.

EDUC60491/EDUC77501: Theories of Teaching and Learning

Tutor: Mike O'Donoghue

Though the core unit EDUC70410 will cover some basic information on the theories of teaching and learning, this unit will go into more detail about major schools of thought on learning theory, key ideas underpinning theories of teaching and learning and how all of these apply to the debates which arise about teaching and learning in a variety of different institutional, policy and cultural contexts. It would be particularly useful for MA: DTCE students who seek an in-depth understanding of pedagogical theory and practice that can apply in a digital setting. Assessment involves writing an essay.

SEMESTER 2

EDUC61632/EDUC77032: Introduction to Educational Video Production

Tutor: Michael O'donoghue

- the role of video-based material in teaching and learning
- practical experience with cameras, microphones, and editing
- storyboarding and shot selection
- interviewing techniques
- approaches to editing

This unit combines theory and practice in the production of video for educational purpose. Theory is supported by practice through small group production tasks. Students submit an educational video which forms their assessment, along with short written critical review on one aspect of the production process. Please note that this course unit requires you to have at least some access to a video recording or capture device, though this can include those installed on many mobile telephones these days.

EDUC71242/EDUC77602 AI (Artificial Intelligence) Perspectives on Learning

Tutor: Amanda (Mandi) Banks Gatenby

Artificial Intelligence is the development and implementation of computational models of human intelligence, learning and knowledge transfer, informed by theories of mind and consciousness. This course unit aims to provide a broad exploration of these computational perspectives on learning and the principles of computation that underpin learning technologies, to develop students' ability to critically evaluate and design for learning with technology that is changing at an accelerating rate. Students will develop 'AI literacy' by learning to read and interrogate the code that drives technologies such as chatbots and robots. We will explore research in emerging fields around developmental robotics and 'teacher-bots', as well as considering the implications of AI technology for existing technologies such as VR/AR, how AI is already changing these and what this might mean for education and learning. Students will learn to read code through playing and 'digital making' with code. Introduction to basic programming skills for building digital artefacts for learning will enable students to understand and contribute to debates on how education might develop creators rather than consumers of technology. No prior knowledge of computer programming is required and this is not a computer science unit: programming work is based on activities aimed at complete beginners, some of which is aimed at primary years. The focus is on conceptual aspects of computing and understanding cutting edge developments that are changing the technologies we use now and the ethical implications for learning and education. AI draws on all the learning sciences from neuroscience, through cognitive science and psychology to social learning theories and this unit will use this transdisciplinary perspective to broaden and challenge conceptions of what it means to learn. The unit includes:

- an overview of current technological innovations in computing from AI to biological and quantum computing and the implications for learning and education;
- basic principles of programming, coding and digital making pedagogy;
- using a range of technologies for learning and expressing computationally, digital making and developing tools and games for learning, for example, Scratch, Greenfoot, Bubble, Codebug and chatbots;
- AI theories for learning, including machine learning, neural networks and robotics;
- the historical development of AI and the theories of learning and language that have informed and emerged from AI;
- current AI research and connections with learning theories including play and gamification;
- ethical and social implications of these perspectives including issues of gender, sustainability and 'scientism';
- methodological approaches to evaluating learning such as TAP (Think Aloud Protocol) and process-based assessment

The assessment is a reflective report on your experience of participation in two tasks done during class time: a 'concept map story' which is developed week by week for the first 10 weeks, and the design of an AI related digital artefact which is then evaluated with TAP (Think Aloud Protocol) by another student.

EDUC77022: Blended Learning in a Digital Age

Tutor: Taslima Ivy and Peter Khan

There is no one universally agreed definition of 'blended learning', though it is commonly perceived in terms of different instructional modes, methods and uses of learning technologies in a range of teaching contexts, both face-to-face and online. The course unit will allow participants to think about the potential of blended learning in their teaching context, what form that blended learning might take and ways of effectively designing blended learning courseware for that context, or aspects of that context.

Specifically the course will cover:

- understandings of the term 'blended learning' in the literature;
- rationales for blended learning in different learning contexts;
- rationales for blending different technologies for learning, e.g.: VLEs with social media (e.g. wiki and podcasting);
- practical explorations of blended courseware development;
- instructional design principles as guiding frameworks for the creation of effective blended courseware.
- evaluation of existing blended courseware.

Assessment involves the development of a detailed plan for the introduction of blended learning into a learning context and critical reflections on that plan.

EDUC70050/EDUC77042 Teaching and Learning Online

Tutor: Nahielly Palacios and Peter Khan

The experiential aspect of this course unit provides an opportunity for students to explore and reflect on a range of topics intrinsically related to technology use in virtual learning contexts:

- technology and changing educational horizons
- distance and distributed learning
- computer-mediated communications and online learning
- Web2 and its implications for collaborative learning
- building online learning community
- developing learner autonomy
- technology and teacher training and development

Assessment involves identifying a topic that emerges as relevant through the course of study, and exploring this from a more personal perspective through the analysis of data accumulated throughout the course (e.g. logs of synchronous meetings, discussion

forum contributions, learning diary), and a review of research that can enlighten interpretation and learning.

EDUC71212/EDUC77052 Educating for Sustainability

Tutor: Susan Brown

The unit consists of an exploration of key themes, concepts and learning approaches, related to educating for sustainability, authentic case studies from people working in the field and student-centred projects. Specifically the unit covers:

- An exploration of understandings of the term 'sustainability' in various learning contexts including professional training contexts
- An exploration of key ideas, terms and pedagogical approaches associated with educating for sustainability;
- Evaluation of existing learning initiatives, activity/course/curriculum development and policy development relating to educating for sustainability;
- Development of exemplar materials/courseware for different learning contexts

Assessment involves a presentation outlining a proposal for the integration of education for sustainability in a chosen context and a related blog post. Sustainability education is a relatively new focus in the educational field. All students will be viewed as important contributors and collaborators in building understandings of how to appropriately educate for sustainability. In that spirit, students will be encouraged to contribute their thinking (e.g. their assignment proposals) to relevant (online) communities.

EDUC61712/EDUC77082: Digital Media and Information Literacy

Tutor: Mark Carrigan

This unit explores the ways in which education has responded to the spread of information and communications technologies through society, and the subsequent demands that both children and adults be prepared to study, work and live in a digital world. It will explore:

- The history of digital, media and information literacy (DMIL) from the early days of 'computer studies' to the present time
- Different models of DMIL including functional, phenomenographic and critical approaches
- Questions of whether, and how, we can be taught to navigate information landscapes
- DMIL in the educational workplace, and how this impacts on broader questions such as educational leadership and professional development

The course also has a practical element, aiming to enhance your own abilities at finding and critically evaluating information, whether academic or otherwise.

Assessment involves you creating a portfolio of educational activities aimed at enhancing the DMIL of an identified target audience of learners.

EDUC71230/EDUC77060 Intercultural Engagement and Work and in Communities

Tutor: Rui He

This unit is focused on social responsibility and offers you the chance to apply the knowledge you have developed in the MA: DTCE to the benefit of a community or local organization. The unit involves a project that is integral to your learning about social responsibility in a real-world setting. For example, a MA: DTCE student may look to create a web site, video or other digital resource on behalf of the community.

Students will carry out supervised practice within an organisation during which time they will undertake a short-term project as well as an analysis of intercultural dialogue either within the organisation or between the organisation and its constituent communities. Students will be able to apply for a work-based learning opportunity from a list of approved local community organisations or can suggest their own location for the work. Within the organisational setting, induction and regular supervision will be provided by a manager to facilitate the student's introduction to the organisation and its communities and identify a suitable area of work. Two scheduled group tutorials will provide networking opportunities and further ideas for project development.

EDUC75000/EDUC77700 Dissertation (Core Unit in the final year of study)

Tutor: varies based on the dissertation topic and available academic staff

The dissertation enables you to pursue independent research on a topic aligned with your interests and career goals. There are three main dissertation routes:

Empirical Research Route: Conduct original research involving human participants to collect and analyse data.

Literature-Based Route: Perform an in-depth investigation of academic literature on a specific topic.

Design/Evaluation Route: Design and implement an intervention like a technology solution or teaching innovation and evaluate its impact.

Dissertations often take a hybrid approach combining elements of the above routes. All dissertations involve examining relevant literature.

You should start exploring potential topics immediately and have an initial idea by the end of your first semester. This will be refined through discussion with your allocated supervisor in semester 2.

You are entitled to five 30-45 minute consultations with your supervisor at key milestones during the dissertation process.

The dissertation is allocated 600 study hours, mainly for independent research and writing.

For empirical or literature routes, the dissertation is 15,000 words. For design/evaluation routes, the word count is 12,000 words as the intervention itself is also assessed.

Careful planning, meeting deadlines, and working closely with your supervisor are key to successfully completing the dissertation. We encourage you to begin thinking about topics early and seek guidance throughout the process.

1.5 Teaching Staff

The teaching staff on the DTCE programme consists of

- Professors
- Readers
- Senior Lecturers
- Lecturers
- Senior Tutors
- Teaching Assistants

They all work collaboratively in the delivery of all MIE Masters programmes. Many of the staff will be teaching on more than one course unit. So, you are likely to meet them across a range of course units on the programme. You can contact your Course Leader or any other academic staff teaching on that course about any questions about the module or assignment. For general queries about the MA DTCE programme, we recommend that you contact the programme directors directly.

All academic staff supervise dissertations and act as Academic Advisors.

You can find staff contact information on the DTCE Blackboard space.

1.6 Your computer and Internet connection

You will attend an induction session during Welcome Week introducing you to key university systems and tools.

To fully participate in the program, you need access to:

- A computer capable of browsing the internet, streaming video content, and installing software
- A reliable high-speed internet connection (low bandwidth may impact access to video conferences)

- Webcam and headset for video conferencing sessions
- Latest version of web browser like Chrome or Firefox
- Microsoft Office or equivalent software
- PDF reader software
- Media player software
- Storage devices like USB or external hard drive
- Much of the content is mobile-friendly for access via smartphones and tablets. We provide content in multiple formats where possible. Please contact us if you need files on CD due to connectivity issues.

While you are expected to have basic digital literacy, we encourage you to be creative in exploring new technologies and media for learning. Please share any useful tools we should experiment with.

IT support is available for issues accessing university systems. We also provide guidance on software, availability of campus facilities, and other technical needs.

Let us know if you have any technology-related queries so we can assist you in engaging fully with all aspects of the program. Given the nature of this program, we expect occasional technical problems. Exploring new educational technologies inevitably involves some unpredictability. We deliberately maintain an experimental mindset to push boundaries. Rest assured that any system failures are learning opportunities, not grounds for blame.

We welcome your frank feedback on the course technology and how to improve it. The field evolves rapidly, so we must adapt too. Your input will shape more effective use of technology. Please share suggestions, especially regarding accessibility and inclusion. Technical disruptions are frustrating but can teach us resilience. With proactive communication and collaboration, we will develop optimal edtech solutions for enriched learning. Our goal is for technology to empower, not impede, your education journey.

1.7 A note about the use of technology on this course

As you are doubtless already aware, computers and the Internet are not the most reliable of technologies. Internet connections break at inconvenient moments; software and hardware suffer from compatibility problems; unexpected events cause your computer to stop responding; or new applications fail to install, leaving you with only an error message for your efforts.

Please understand, first of all, that we fully appreciate the nature of these problems, and how off-putting they can be, particularly if they become chronic. We will always do our best to support you through any such difficulties, and no one will be penalised in any way as a result. However, to be able to help you like this does depend on your informing us of a problem: please don't keep difficulties to yourself. More information on technical support is available from the university web site.

There is another side to this, however. Remember that this degree is specifically oriented towards developing in you a critical, questioning attitude to the use of technology in education. It also has a mandate to experiment with some “cutting edge” technology. The simple fact is, we expect problems to occur at times. We know that some of the more technically difficult parts of the course – like online synchronous chat sessions – will, at least at first, be a little chaotic, as you are all unfamiliar with the technologies. Indeed, because we deliberately adopt an experimental, exploratory stance on our use of technology, we may well not be that familiar with them either. To stress this again then: no one will be penalised, or considered at fault, if our systems let you down. Problems which occur are all part of the learning process, for you and us alike, as we strive to understand the impact of digital technologies on communication and education.

We also welcome your critical input into the development of this course and its technological environment. This field moves so rapidly that it is very likely—in fact, for any part time students, almost certain—that the technologies we will be using at the end of your study will be different from those with which we started. If you think there are things we could do better, or more effectively: please tell us about them. Also we need to know about technical problems as soon as they occur, particularly if they are our fault (for example, a file we have supplied is incompatible with your operating system).

More will be said on this throughout your studies. At this early stage, however, please remember that the technologies you will encounter on this course are as much the subject of your study – and criticism – as they are tools.

1.8 A note on the face-to-face/Distance student dynamic

As well as working with students in the same mode of study (i.e. face-to-face or Distance learning), there *will* be points where you work with distance students if you are an on-site student or with onsite students if you are a distance learning student.

This is to provide flexibility in learning arrangements and aim for the widest possible level of participation from people all over the world. Depending on where you are taking the course from, you may therefore have the opportunity to work with colleagues who may live thousands of miles away from you. For example, if you are onsite in Manchester, you may need to engage in learning activities with students who are in a different time zone. This allows you to engage with a broad range of professionals and extend your networks.

There will be logistical issues because of time zones, but this is the realities of teaching and learning in a connected world. Learning about and communicating our needs with in collaborative work like this is, we think, an important part of what professional development means in a world saturated with easily available and global communications tools like email, videoconferencing, mobile telephony etc., and in an era when increasing numbers of educational courses, at many levels, are no longer tied to single locations. Ground rules for these various tasks will be negotiated as groups

and also between individuals. Learning to respect the needs of others is a key part of the DTCE experience.

1.9 Etiquette and conduct in discussions

Antisocial behaviour can be as upsetting online as it is face-to-face, and certainly, no abuse of any kind will be tolerated within the course environment, whether this be 'flaming', 'trolling', cyberbullying, racism, homophobia or any other kind of prejudice.

Even if it falls short of these extremes, aggressive or confrontational behaviour online can still be upsetting. Remember that all of us are in this course environment to learn. We expect all students (and teachers) on the course to treat one another with respect in online and face-to-face communications. Disagreements and differences of opinion are inevitable, and not to be glossed over. But if they arise, they can be discussed in a civilised way, with each side respecting the other's view even if they do not agree with it. Remember the simple golden rule for life in general: treat others as you would like to be treated yourself.

We hope that all disagreements and conflicts can be resolved without any recourse to some kind of disciplinary action, but please note that we nevertheless reserve the right to take such action if a student disrupts activity on a course in any repeated or chronic way. In such cases, the Programme Director will investigate in the first instance and if necessary will give a warning to the student. If infringements continue after this formal warning then the student may find his or her computing privileges withdrawn, in line with the University's policy on abuse of its systems [which all students agree to follow as a condition of being given access to these systems].

Section 2: General Information

2.1 Administrative/Academic Team

You are supported in your studies by a dedicated administrative and academic team.

Administrative Team

You are part of the **School of Environment, Education and Development (SEED)** which includes the departments of Geography, Planning and Environmental Management (PEM), the Manchester School of Architecture, the Global Development Institute (GDI) and the Manchester Institute of Education (MIE). Under the new structure of Student Experience Programme, there are administrative teams with various specialties across the whole school to give students holistic support throughout their journey at SEED. They are Student Information Advice and Guidance Team (IAG); Student Support and Wellbeing Team (SSW); Programme and Curriculum Team (P&C); and Assessment and Progression Team (A&P).

Academic Team

Academically your programme is overseen by the Programme Director, who is ultimately responsible for the management of the Programme. They work closely with the administration team to ensure that all aspects of your Programme run smoothly. The Programme Directors sit on the Programme Committee where issues relating to your programme are discussed, and on the School-level Teaching and Learning Committee, where they discuss wider issues of programme development with Programme Directors from across the School. Additionally you will be allocated an Academic Adviser who will offer academic as well as pastoral support (see **Section 3.3** for more information).

2.2 Contacting the Administrative/Academic Team

Administrative Teams

If you have any queries, please contact seed.hub@manchester.ac.uk, and one of the administrative teams mentioned above will be in touch with you.

Student Support Hub

The SEED Student Support Hub (open Monday-Friday, 9am-5pm) serves as a face-to-face contact point if you have any query and/or wish to speak to a member of staff in person. The Hub is managed by Information, Advice and Guidance (IAG) team and Student Support and Wellbeing (SSW) team, which is located on the ground floor of Humanities Bridgeford Street Building.

If you're in need of support, the IAG team will be able to provide you any relevant information, signpost you to the right team, refer you to useful resources available, and resolve your queries/issues in an effective manner. 1-1 appointments are also available with SSW staff to discuss any wellbeing-related issues and they can also provide

guidance on academic and programme-related queries or concerns such as interruptions/withdrawals.

Additionally, a wide variety of events/drop-ins are hosted inside the Hub across the academic year. Please check out the communications regularly and don't miss out any opportunities to enhance your student experience here at SEED.

Alternatively, you can contact the Hub on the phone by calling 0161 275 2817 (Monday-Friday, 9am-5pm).

Academic Staff

Consultation/office hours for academic staff will be posted on their office doors, and the first floor in the Arthur Lewis Building is open access to students 10.00-16.00 during term time. If you want to see a member of staff outside of consultation hours you may e-mail them to arrange a suitable time.

2.3 Information Points

School of Environment, Education and Development Student Intranet

The main reference point for information about your programme, the department and the School is the School's Student Intranet

 <https://www.seed.manchester.ac.uk/student-intranet/>

This will hold electronic copies of School documentation such as handbooks, timetables, relevant forms, copies of minutes from relevant committees, mitigating circumstances and disability support information, and will have regularly updated electronic noticeboards. It will also hold details of student representatives for each programme, once they have been nominated.

My Manchester

My Manchester (<http://my.manchester.ac.uk>) is the single gateway for you to access key tools, services and information to support your studies. You will be able to access all the information and online services you are likely to need on a day-to-day basis here, e.g. email, Blackboard (the University's virtual learning environment), your library account, your personalised examination timetable, your student record and your assessment grades once these have been published.

My Manchester also links through to all University Policies and Procedures, some of which are referenced later in your handbook.

2.4 Communication

In order for your programme to run smoothly it is essential that you maintain good communication with the administrative and academic team.

E-mail

All of the information sent out by administrators and academic staff comes via your *University of Manchester* e-mail address which you are allocated upon arrival. This can be accessed via the internet. **It is your responsibility to ensure that you regularly check your e-mail account.** If you believe that you are not receiving all relevant e-mails, you must inform the Information Advice and Guidance Team *immediately*.

Contact Details

It is your responsibility to keep all contact details up-to-date on the on-line student system (which you used to register). If you change address during the course of the academic year, you must update this system accordingly.

Social Media

There is an official SEED Instagram Account managed by the Information Advice and Guidance Team where all up-to-date school-specific and university-wide activities are advertised.

- Instagram SEED:  [UOM SEED \(@uomseed\) • Instagram photos and videos](#)

The different departments also provide their own Twitter and Facebook accounts which are used for various non-urgent communications, and so you as a current postgraduate student can interact with each other, undergraduate students, alumni and prospective students.

GDI

- Facebook GDI:  <https://www.facebook.com/pages/GDI-Manchester/275503185890905>
- Twitter Manchester GDI:  <https://twitter.com/GlobalDevInst>

Geography

- Facebook Geography:  <http://www.facebook.com/pages/Geography-at-The-University-of-Manchester/183071438489575>
- Twitter Geography:  <https://twitter.com/GeographyUOM>

Planning and Environmental Management

- Facebook Planning and Environmental Management:  <https://www.facebook.com/pages/Planning-and-Environmental-Management-at-The-University-of-Manchester/134318460039324>
- Twitter Planning Manchester:  [@PlanningUOM](https://twitter.com/PlanningUOM)

MIE

- Twitter MIE:  [@EducationUoM](https://twitter.com/EducationUoM)

2.5 Monitoring Attendance and Wellbeing of Students

Recording and monitoring attendance of all students is a University requirement under Regulation XX (Monitoring Attendance and Wellbeing of Students). To this end, the School of Environment, Education and Development will ensure a robust approach to the monitoring and recording of student attendance across all departments and programmes.

The University expects all students to attend all timetabled classes (lectures and small group sessions), meetings with tutors or your supervisor and any other arranged sessions for your programme. Your attendance will therefore be monitored throughout each semester.

The University is introducing a new system for recording student attendance from September 2023 and further details on how to register your attendance will be circulated to students at the start of the new academic year. Recording attendance helps us to see where students might be struggling and to offer support.

The Attendance Monitoring team will be in contact with students where non-attendance has become a concern or where a pattern of absence begins to raise concerns with regards to a student's wellbeing.

Full-time students are expected to be in Manchester for the entire duration of the registration period. Part-time students are also expected to attend all teaching activities in person for the duration of the registration period. If your attendance is being affected by health or personal reasons please see **Section 4.7** for further information.

Full information on the School of Environment, Education and Development's attendance monitoring policies is available to read at:

<https://www.seed.manchester.ac.uk/student-intranet/postgraduate/postgraduate-taught/attendance-requirements/>

2.6 International Students with a Tier 4 Visa

As part of the University's compliance with UKVI regulations for Student Route (Tier 4) Visa holders, international students must demonstrate that they are physically attending and engaging with their programme. Your attendance on the programme will therefore be monitored for reporting purposes. This is to ensure the University meets the Home Office statutory requirements as a sponsor of Tier 4 students and its responsibilities in accordance with its Highly Trusted Sponsor status. UKVI may request access to these records at any point. If your physical attendance and/or engagement is deemed unsatisfactory by the School then you may be withdrawn from your studies and this would lead to the cancellation of your Student Route visa. To avoid problems with your visa, you must report any unavoidable absence to us as soon as you can to seed.attendance@manchester.ac.uk.

Attendance requirements over the summer dissertation period

This is a 1-year taught Masters programme with a requirement to complete a dissertation during the summer. As the summer is classed as term-time, you should limit your absence from the UK from the end of semester 2 until the submission date of your dissertation to 14 days maximum, unless travel is required for the completion of overseas fieldwork. Absence from the UK outside of vacation periods, or for longer than 14 days during the dissertation period that is not required for overseas fieldwork, may impact your Student Route Visa status and future eligibility for the Graduate Route (Post Study Work) visa, should you wish to apply for this.

How will I be notified about unsatisfactory attendance?

You must check your University e-mail account regularly in case the School is trying to contact you about your attendance and respond to any emails related to this.

What happens if you don't record your attendance or if you miss teaching activities?

The School must be able to confirm your presence to the Home Office on a rolling basis. If you are unable to attend a teaching activity and you do not provide a valid explanation for your absence you will be deemed to be "not in attendance".

Those students identified as "not in attendance" will be reported to the Home Office and the University will cease to sponsor the student's Student Route (Tier 4) visa. The visa will then be curtailed and the student must leave the UK within 60 days.

What happens if you interrupt your studies?

Students who are recorded as interrupting their studies are not expected to attend during their period of interruption.

Further information

For more information on the University's Student Immigration Team:

<https://www.manchester.ac.uk/study/international/why-manchester/student-support/immigration/>

For more information on Student Route (Tier 4) visas:

<https://www.ukcisa.org.uk/Information--Advice/Visas-and-Immigration/Protecting-your-Tier-4-status>

If you have any queries about attendance monitoring please contact seed.attendance@manchester.ac.uk.

If you have any queries regarding your Student Route (Tier 4) visa or visa-related concerns, please contact visa@manchester.ac.uk.

2.7 Academic Timetable

Semester dates/academic year/exam dates:

<https://www.manchester.ac.uk/discover/key-dates/>

Activity	Start Date	End Date
Online induction (new students)	Monday, 11 September 2023	
Welcome Week	Monday, 18 September 2023	
Semester 1 starts	Monday, 25 September 2023	
Winter graduation	Monday, 11 December 2023	
Christmas break	Monday, 18 December 2023	Sunday, 14 January 2024
Semester 1 assessment and exams	Monday, 15 January 2024	Friday, 26 January 2024
Semester 1 ends	Sunday, 28 January 2024	
Semester 2 starts	Monday, 29 January 2024	
Non-teaching period	Monday, 18 March 2024	Sunday, 24 March 2024
Easter break	Monday, 25 March 2024	Sunday, 7 April 2024
Semester 2 assessment and exams	*To be confirmed, but expected to begin Monday, 13 May 2024	*To be confirmed, but expected to end Wednesday, 5 June 2024

Semester 2 ends	Friday, 7 June 2024	
Summer graduation	*To be confirmed, but expected to fall within the three weeks from Monday, 8 July 2024	

2.8 Teaching & Learning Facilities

Library

The School of Environment, Education and Development has subject specific library spaces for GDI, Geography, Planning and Environmental Management materials which are held in the Kantorowich Library which is situated in the Humanities Bridgeford Street Building.

Tours of these facilities will be arranged during your first weeks at University.

GDI Library	Muriel Stott Graduate Research Centre, Kantorowich Library, Ground Floor, Bridgeford Street Building
Geography/Planning Library (Kantorowich)	Ground Floor, Bridgeford Street Building

All students are also strongly encouraged to use the main collections in the main University Library.

The University Of Manchester Library

<http://www.manchester.ac.uk/library>

The University of Manchester Library, one of the best-resourced academic libraries in the country, provides you with the resources and support you need throughout your programme. The Library houses all the essential text books, across various sites, and has an extensive online collection of e-books, e-journals and research databases.

The “**My Library**” tab in “**My Manchester**” has quick links to all of the Library’s resources and services available to students.

Facilities

The University of Manchester Library operates a number of sites across campus. The Main Library offers group study rooms, individual study spaces and computer clusters. Wi-Fi is available throughout the building and a cafe lounge located on the ground floor.

The Alan Gilbert Learning Commons provides a state of the art 24/7 learning environment, offering flexible open learning spaces, multimedia facilities, computer clusters and bookable group study rooms. In addition to the main sites, there are a number of specialist libraries located across the campus. Details of all locations, facilities and opening hours can be found via the Library website.

Get Started: Find Your Resources

Your student card is required to access all library sites around campus and your central university username and password to access the electronic resources. Our **Get Started**

guide provides helpful videos on how to use the Library plus information on how to navigate and find support within the Library.

- <http://www.library.manchester.ac.uk/get-started/>

Use **Library Search** to find books, ebooks, online journals and articles. Use the **Subject Guides** to find appropriate resources/databases for your subject area plus guidance on referencing and keeping up to date with research.

Training and Research Support

My Learning Essentials: The Library provides a comprehensive programme of online resources, workshops and drop in skills clinics throughout the year designed to help you to develop your academic and employability skills.

- <http://www.manchester.ac.uk/my-learning-essentials>

Feedback & Enquiries: For general enquiries, e-resources support and/or to feedback suggestions please contact the library in person, via phone or online.

- <http://www.library.manchester.ac.uk/contact>

Library News and Updates:

Keep up to date with the latest library developments via Facebook

<https://www.facebook.com/uomlibrary/> or Twitter [@UoMLibrary](https://twitter.com/UoMLibrary).

Blackwell's

The campus bookshop is Blackwell's, and they are situated next to the Arthur Lewis Building (no.36 on the Campus Map).

Blackwell's stock all your recommended texts, and with their 'Student Price Match Guarantee', should be competitive with Amazon.

They also have a coffee shop, and sell general books, stationery, technology, cards, gifts, University merchandise.

Follow them on Twitter [@BlackwellsMcr](https://twitter.com/BlackwellsMcr)

<https://blackwells.co.uk/bookshop/shops/>

Blackboard: Course units and enrolments

Blackboard (Bb) is the web-based platform that we use across the institution to deliver our teaching, learning and assessment online. All of your course units and programme-wide spaces (where relevant) are delivered via Bb.

Access Bb via My Manchester <http://my.manchester.ac.uk/> under 'Tools'. In Blackboard you will find:

- a list of all the course units you are registered to take, under the 'Course List',

- a list for Programme spaces or other 'Organisations', in the 'My Communities' list.

Your Bb course units will contain different elements, depending on how your tutor(s) have set them up. They may be used for hosting teaching materials, lecture handouts; for assessment including coursework submission, quizzes; for communication such as class announcements; for collaboration with your fellow students e.g. discussion boards or blogs; or other. If you have any queries about the content in your Bb spaces, please check with your tutor first.

You can find guidance on the various Bb tools as well as other eLearning tools we use at Manchester e.g. Turnitin, accessing the Manchester video portal or other in this page: <https://sites.manchester.ac.uk/humteachlearn/student-support> .

If you like you can access Bb on your smartphone using the Bb App. For guidance, see: [https://help.blackboard.com/Blackboard App](https://help.blackboard.com/Blackboard_App) .

When can I access the Blackboard sites for the units I am studying?

Courses become available to students one week before the start of teaching. For *most* courses in 2023/24 this is:

- Semester 1 and all-year courses: 18 September 2023
- Semester 2 courses: 23 January 2024

For details on how to enrol on your course units please see the guidance in the link below

[Student Support | Support For Your Studies | Course unit selection | The University of Manchester](#)

To ensure that you have access to all of your courses within Blackboard, you must be enrolled on them through the Student Records system. Once enrolled, your courses should appear on Blackboard from the dates above mentioned.

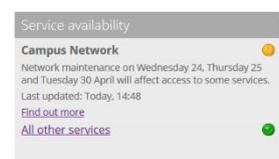

What can I do if I cannot find in Bb a course(s) I am enrolled on?

If you cannot see a course you expect to see, it may be because your tutor has not 'activated' your Blackboard site for the course, or it may be that your enrolment is not completed:

- contact seed.hub@manchester.ac.uk to check that you are fully enrolled;
- check with your tutor that the Bb site has been activated (made available to students);

Note: If you decide to change your course enrolments (from one unit to another) there will also be a delay of up to 24 hours in acquiring your new courses and removing those you are no longer taking. If after enrolment or changing your enrolments your courses are not correctly listed in Bb after 24 hours, please contact the eLearning Team via the Support Portal <https://www.itservices.manchester.ac.uk/help/elearning/>

More broadly, if during the duration of your studies you experience interruptions in IT or eLearning services such as Blackboard, Turnitin, Video Portal or other please check the Service Availability information on IT services homepage:

<http://www.itservices.manchester.ac.uk/> The Service Availability portlet will display whether there is any known disruption and flag issues with a red or an orange circle (see image). If you experience an issue that is not notified in the [Service Availability portal](#) please contact your eLearning team via the Support Portal <https://www.itservices.manchester.ac.uk/help/elearning/>.

Arthur Lewis Student Common Room

All School of Environment, Education and Development students have access to the Student Common Room on the ground floor of the Arthur Lewis Building. The room is divided into three main areas: a laptop area, an area with study tables and a more informal soft seating area. The room is shared with the School of Social Sciences who are also housed in the Arthur Lewis Building.

Technical/IT Support

The facilities

Students at The University of Manchester enjoy access to a wide range of high-quality IT services provided across campus. Within The Faculty of Humanities, there are many computers located within Faculty buildings available for student use, complementing the computers provided by the University in public clusters – including at Owens Park halls of residence, the libraries and the Alan Gilbert Learning Commons.

These include printing, scanning and copying, and access to a wide range of general use and course specific software on the Windows operating system.

The clusters provide access to services offered by schools, faculties and central service providers such as IT Services and the University Library. PC clusters in the Faculty may also provide additional software not available in the central PC clusters.

- [PC clusters on campus](#)

Details of PC clusters across campus and their capacities will be updated on the PC cluster webpages above.

Remote access is enabled for some students on many of the PC clusters. This allows students to log into a University computer from wherever they are. Details of remote access to University PC clusters can be found here.

- [Remote access to PC clusters](#)

Wi-Fi is installed across campus enabling students to access IT services on campus from their laptops or mobile devices. The eduroam network is the recommended service.

- [eduroam](#)

Software

Students can download the Microsoft Office software suite (including Word, PowerPoint, Excel and more) for free, to use on their own computers and mobile devices.

- [Microsoft Office 365](#)

There are also hundreds of software packages in use around the University. Find out which ones are available to you:

- [Applications](#) (If you're using Wi-Fi or you're not on campus, you need to use the VPN to access this site)

Help and advice is available from our Support Centre which can be contacted by phone or via the Support Portal.

- [IT help and support](#)

The return of face-to-face IT support at walk-up support desks on campus is under discussion on how to do that safely, and more information will be posted on IT Services' walk-up support page when this is available:

[Walk-up IT support](#)

Technical Resources

The Media Stores in Media Services are able to loan students a range of audio-visual equipment for learning, teaching and research. Training is provided on the use of the equipment and guidance given on getting the best out of the facilities for your learning or event activities.

Other design/technical services

Other design/technical services are also available in the University's *Media Centre* based on the second floor of the Humanities Bridgeford Street Building which provides: black and white photocopies, colour photocopies, colour / black and white printing, scanning, and binding and laminating facilities. The Media Centre can also lend laptops to students for up to a week, in the event of a personal laptop having been stolen or sent for repair. Opening times are Monday–Friday 09.00–17.00 (closed 13.00-14.00)

Printing/Scanning Facilities

All scanning/printing is paid for in advance through your printing account. In order to add money to this account you can use the Online ePayments System or the *Central Printing Credit Top-up Stations (Payment Kiosks)*. A Payment Kiosk is available in the Arthur Lewis G.05 Computer Cluster for purchasing printing credits. Printers are normally available in all computer clusters. For more information visit:

<http://www.itservices.manchester.ac.uk/students/printing/payment/>

Print Pull System

The new print pull facility will enable you to print your document from any networked computer and collect the print out at any printer in a University building using your swipe card.

Visit <http://www.itservices.manchester.ac.uk/students/printing/> for more information.

Podcasting

The University has introduced podcasting (sometimes known as lecture capture) into many lecture theatres and teaching spaces across campus. This system has been set up to help students replay, revisit and revise from past lectures.

No video cameras are used in the teaching environment; instead podcasting records the output from the projector, which includes: PowerPoints, web browsers, video, or software from a PC, laptop or iPad etc., and the lecturer's voice from microphones at the front of the teaching space.

The recordings are then automatically processed into usable formats and made available to students. Currently 320 locations are equipped for podcasting, making this one of the largest lecture capture installations in the world.

Instructions on how to access podcasts for your classes can be found here: <https://www.mypodcasts.manchester.ac.uk/student-faqs/>

Section 3: Student experience

3.1 Student Charter

The Student Charter, developed jointly by the University and the Students' Union, is an important part of how we establish and maintain clear mutual expectations for the experience of all undergraduate and taught postgraduates. It sets out what we can expect from each other as partners in a learning community. A copy of the Student Charter can be found on the following webpage:

<http://www.yoursay.manchester.ac.uk/student-charter/>

3.2 Student Development

Study Skills

Each department in the School of Environment, Education and Development offers study/research skills training as part of the postgraduate programme, whether in named course units or in additional workshops.

Additional writing skills workshops will be available to all overseas students at the beginning of the academic year, on a first-come first-served basis – please ask the Information, Advice and Guidance Team for details of how to sign up. Throughout the course of the year, you are also encouraged to discuss coursework with your Academic Adviser and/or the Course Unit Director, who can assist you with any questions you may have.

Research Training

Students are encouraged to become involved in the wider research community by attending relevant seminars both within and outside the School of Environment, Education and Development. Details of relevant seminars will be circulated via e-mail and posted on social media whenever possible.

My Learning Essentials Training Courses

The Library offers a range of skills sessions throughout the academic year to help you with your research and designed to equip you with the solid base of skills that you will need for academic success. Courses cover study strategies, academic writing, proofreading, literature searching, subject databases, citation and referencing, avoiding plagiarism and a range of workshops on specialist resources and research information skills. Full details of online training sessions, workshops and skills clinics are available on the Library website:

<http://www.library.manchester.ac.uk/services-and-support/students/support-for-your-studies/my-learning-essentials>

Exam Extra Sessions

On the run-up to University exam periods, the Library run a series of sessions specifically to help students revise and prepare for exams. Further details on sessions will be publicised by the Library closer to the January and May/June exam periods.

Careers

Your Future and your Careers Service

The Careers Service offers a range of activities for UG and PG students from practical help with CVs, applications and preparing for interviews through to helping students decide what they want to do after graduation and help with getting work experience/placements along the way.

By visiting [Careerslink](#), students can access the full menu of events and find part-time jobs, placements, work experience/internships and graduate job opportunities. Careers Consultants from the Careers Service also deliver activity at Faculty and School/Programme level.

Currently, all services have been moved online so students can access the full range of services, including an extensive programme of [webinar workshops](#)/ [lunchtime live](#) sessions with employers. Once guidance is received, services will return to on-campus delivery as deemed appropriate.

Students should visit the Careers Service website to get full details of how to access our services:

<https://www.careers.manchester.ac.uk/>

Volunteering Hub

Volunteering is a great way to enhance your University experience. The University has an online Volunteering Hub where you will find details of opportunities to get involved in a range of activities that support other students and improve the University community, fundraising, educational, environmental and cultural projects, through to getting involved in charities and not-for-profit organisations in the wider community outside of campus. Further details and access to the hub can be found here:

<http://www.volunteers.manchester.ac.uk/>

The University Language Centre

The University Language Centre provides courses and language learning resources for students from a wide variety of disciplines wishing to include a modern languages element within their studies. It also offers a wide range of courses and services for international students for whom English is not a first language.

Language courses

Offered as part of the University Language Centre's institution-wide language programme (LEAP), these courses are available to students from across the University and may be studied on a credit or on a non-credit basis to complement your degree.

The following languages are being offered in 2023/24:

- Arabic
- Chinese
- French
- German
- ...
- Polish
- Spanish
- Turkish
- Urdu

For more information on the full range of languages and levels that are available, please consult the University Language Centre website via the link given below.

[University Language Centre - LEAP courses - School of Arts, Languages and Cultures - The University of Manchester](#)

Academic Success Programme: English Language Support

At the University Language Centre, we believe clear academic English is key to your success – whether or not English is your first language. Our Academic Success Programme enhances your academic writing and speaking to help you to reach your study goals. In our workshops, experienced tutors will help you get the most out of your studies by exploring the key features of both written academic and spoken English. A particular emphasis is placed on communicating well with your intended audience. We also aim to boost your confidence to work independently in English.

Please visit our website to find out more and to register for workshops or follow us on

Twitter: [@UoMLangCentre](#)

www.manchester.ac.uk/academicsuccessprogramme

Open Learning Facilities

The University Language Centre's open learning facilities, situated in the Samuel Alexander Building, offer:

- A well stocked library of materials in text, audio, DVD and CD-ROM formats
- Materials in more than 80 languages
- Two suites of dedicated multimedia PCs for computer aided language learning, DVD playback and access to TVoverIP (for viewing live satellite channels via the University network)

- Booths with LCD screens for group viewing of DVDs
- A conversation room for group work and voice recordings
- Short-term loan of digital recorders, cameras, webcams, etc
- Support and advice for learners from expert staff and through on-line resources
- Access to the Face-to-Face scheme: This is a reciprocal language learning scheme, in which students can meet with native speakers of the language they are learning. International students find that this is a good way to meet home students and to become more integrated into the University. Home students can prepare themselves for study abroad by finding out about their partners' home universities and cultures. Students can arrange the face-to-face meetings online.

A full guide to the University Language Centre's courses, services and its language learning resources is available at: <https://www.languagecentre.manchester.ac.uk/>.

Extra-Curricular Activities

The Student Union

The Student Union organises many different student activities including student societies and volunteering opportunities. For details please contact the Student Union.

☎ 0161 275 2930

🌐 <http://manchesterstudentsunion.com/>

The International Society

The International Society organises a programme of events, trips and social activities for international students at the University. It also runs English and foreign language classes, a Women and Families Group, and hospitality scheme to link up international students with local families. They also run a variety of interesting cultural projects that you may be interested in volunteering for.

You can keep up to date on their upcoming activities via social media.

🌐 www.internationalsociety.org.uk

<https://www.facebook.com/theinternationalsociety/>

Campus Sports

An important way to maintain good health and wellbeing throughout your studies is to engage in sports, either individually or as part of a team. Further information is available at:

🌐 <http://www.sport.manchester.ac.uk/sport/>.

Social Responsibility is at the heart of everything that we do at the School of Environment, Education and Development.

As the University's third goal, Social Responsibility describes the way we are making a difference to the social and economic well-being of our communities through our teaching, research, and public events and activities. Our web page <http://www.seed.manchester.ac.uk/connect/making-a-difference/> provides a flavour of our social responsibility work and throughout the year, SEED's Director of Social Responsibility will share news of other activities and events. You might like to volunteer, for example. On the University's volunteering website www.volunteers.manchester.ac.uk/ you can learn more about the hundreds of opportunities available to you and how to get started. We are regularly looking for people to assist with community engagement and outreach – in the past, we have had a team at both the University's [Community Festival](#) and [Bluedot](#) and we regularly have Widening Participation activities with Schools. We are also keen to help promote your work, perhaps you are already part of community engagement and would like to encourage others or would like to be nominated for a [Making a Difference Award](#), for example.

3.3 Student Support

Student Services Centre

The Student Services Centre is a central point for information and advice on all non-academic University-related services such as examinations, registration, graduation, finance (including advice on the Living Costs Support Fund), immigration, certificates and transcripts.

☎ 0161 275 5000

Email: ssc@manchester.ac.uk

<http://www.manchester.ac.uk/study/international/why-manchester/student-support/student-services-centre/>

Opening Hours: Monday to Thursday 09.00-17.00 & Friday 10.00-17.00

University Student Support

Resources relating to student support can be found at

<http://www.studentsupport.manchester.ac.uk/>

Academic Support

If you are encountering problems with your academic work then you should seek help and advice from your Academic Adviser, or your Programme Director. If the problems you are encountering are linked to health or personal problems please also see **Section 4.7 Mitigating Circumstances**.

Pastoral Support

You will be allocated an Academic Adviser at the beginning of your programme. The Academic Advisement system is to help you review your academic progress and development, and to provide assistance to resolve problems you may encounter in relation to your studies in Manchester. This assistance will often take the form of referring students to the appropriate professional support service. You will be able to meet with your Academic Adviser at least once each semester. This may be by means of drop-in sessions which are arranged at specific times. It is your responsibility to attend those meetings which have been arranged. **It is particularly important to arrange to see your Academic Adviser if you have failed any semester 1 course units, or are experiencing any problems affecting your academic progress.**

You will normally retain the same Academic Adviser throughout your programme, but there may be instances where a change of tutor is necessary, for example during staff sabbaticals.

Students can request a change of Academic Adviser if the relationship becomes difficult for any reason and should contact their Programme Director to discuss the reasons why a change is requested. Any students whose Academic Adviser is also the Programme Director, can approach the School's Student Support and Wellbeing team (seed.wellbeing@manchester.ac.uk).

School Student Support and Wellbeing Team

In addition to your Academic Adviser, the School also has a small team of staff who can help students in times of difficulty and are available to meet with students to advise on the kinds of support available in the University, including support for students with disabilities, and to discuss options such as interruption or mitigating circumstances. If you would like to arrange a meeting, please email the Student Support team (seed.wellbeing@manchester.ac.uk).

Stress and Ill Health

You **must register** with a local doctor (GP) when you arrive in Manchester to receive NHS treatment whilst you are resident in Manchester. The University does not have its own medical service. Registering with a doctor enables international students, their spouse and children to receive **free** medical care, providing they are in the UK for 6 months or longer. You can find a doctor online by visiting the NHS website at <http://www.nhs.uk/Pages/HomePage.aspx> and using your term-time postcode to search. Information on accessing different kinds of healthcare in the UK can be found here:

<http://www.studentsupport.manchester.ac.uk/taking-care/support-services/accessing-healthcare/>

If you are unwell for up to one week, you can complete a "Self-Certification" form which can be found on the Student Intranet at:

<https://www.seed.manchester.ac.uk/student-intranet/postgraduate/postgraduate-taught/mitigating-circumstances/>. If you are using this form as supporting evidence for

a mitigating circumstances/extension application, the certificate will need to be signed by your GP.

For illnesses that last longer than one week you will need to obtain a doctor's note. This is especially important if you feel that health or personal issues are affecting your academic work and may impact on your ability to meet assessment deadlines. Please refer to **Section 4.7 Mitigating Circumstances**.

If you start to experience longer-term health issues you may wish to consider taking a break from your studies, a period of 'interruption'. Please refer to **Section 3.9 Interruptions**.

University Policy on 'Supporting Health, Fitness and Return to Study'

The University is committed to supporting students and recognises the impact that a student's health, wellbeing and conduct can have on their academic progression and wider experience. Issues with any of the above may affect a student's fitness to study. This policy will apply when a student's health, wellbeing, behaviour and/or conduct is significantly impacting on their ability to progress academically or function at University and it aims to ensure that the best interests of the student are considered in relation to their personal situation and to ensure that students who are experiencing issues are supported to address these difficulties at the earliest opportunity and have access to appropriate support services.

The Policy may also be used where the University has significant concerns about the impact of a student's behaviour and/or conduct on their own safety and wellbeing, or the safety and wellbeing of others. If these concerns have not been resolved by the 'Procedure on Support to Study' and the provision of support, they may be considered under the 'Procedure on Fitness to Study'.

The Procedure on 'Fitness to Study' is a two-stage process, which will include an assessment of the impact of the student's behaviour and/or conduct on both themselves and others. Stage 1 will consist of a School-level Fitness to Study Panel who will make recommendations. If a student is referred to Stage 2 of the procedure, then the Director of Campus Life would become involved.

The full policy and procedures can be found on the University website: <http://documents.manchester.ac.uk/display.aspx?DocID=37798> .

All information considered by the School's Fitness to Study Panel will be treated with the utmost confidentiality.

There are a number of specialist services available at the University, to which students can be referred or can self-refer:

Student Occupational Health Service

This service offers confidential care and support on health and safety issues and offers emergency care if you are taken ill on campus. They will also advise the School on

whether a student is 'fit to study' or 'fit to travel' on fieldwork in cases of illness. Please note that this service is not a doctor's surgery, and you should register with a GP when you arrive in Manchester.

☎ 0161 306 5806

Opening Hours: Monday–Friday 09.00–16.00

🌐 <http://www.occhealth.manchester.ac.uk/>

Counselling Service

The Counselling Service is a free service available to all students. Professional counsellors provide confidential one-to-one counselling for anyone seeking help with personal problems affecting their work or well-being. The Counselling Service also run a range of group support workshops on issues such as managing anxiety; exam stress; procrastination; assertiveness; confidence and self-esteem; low mood; and speaking out in groups. They also have a comprehensive range of self-help resources, including recorded workshops and interactive resources available to students on their website.

Location: 5th Floor, Crawford House, Precinct Centre

☎ 0161 275 2864

Email:

counselling.service@manchester.ac.uk 🌐 <http://www.counsellingservice.manchester.ac.uk/>

24/7 Mental Health Helpline

Health Assured is a 24-hour mental health helpline and wellbeing app.

For mental health and wellbeing support and advice, call the confidential helpline on **0800 028 3766** whenever and wherever you need it.

The 24-hour mental health helpline and app offers access to mental health support from trained counsellors and advisors who are ready to listen and provide help whenever you need it. It's anonymous, non-judgmental and available 24 hours a day, 365 days a year.

Student Union Advice Centre

The Union have independent welfare advisers who can provide advice on a range of matters including academic issues (appeals, complaints and disciplinary matters) health and wellbeing, housing, finance and hardship.

Location: First floor, Student Union Building, Oxford Road

☎ 0161 275 2952

Email: advice.su@manchester.ac.uk

🌐 <https://manchesterstudentsunion.com/advice>

Disability Advisory and Support Service (DASS)

The single term "disability" is used to cover a broad range of physical and sensory impairments, medical conditions, specific learning difficulties and mental health needs. The definition of disability found in legislation is any condition which has a significant,

adverse and long-term effect on the person's ability to carry out normal day-to-day activities.

Therefore, “disability” can include students who have

- A sensory (visual/hearing) impairment
- A mental health difficulty
- A mobility impairment
- A dexterity impairment
- Asperger's Syndrome and other autism spectrum disorders
- Chronic medical conditions (e.g. diabetes, epilepsy, asthma)
- Chronic pain / chronic fatigue
- Cancer
- Specific learning difficulties (e.g. dyslexia, dyspraxia)
- Any other condition which has a long-term and adverse effect on study

The University has a **Disability Advisory and Support Service (DASS)** who can help any students with additional needs and advise students on the support available to them throughout their studies. They can arrange an Assessment of Needs, assist with applications for funding support, arrange dyslexia screenings and discuss appropriate study aids, assistive technology and special examination arrangements if necessary. The DASS liaises with the School of Environment, Education and Development via the School's Disability Co-ordinator (seed.dc@manchester.ac.uk). Students should seek advice immediately if they feel that their work is being affected by a disability.

Location: 2nd Floor, University Place

☎ 0161 275 7512

Email: dass@manchester.ac.uk

Opening Hours: Monday to Friday 10.00 to 16.00

🌐 <http://www.dso.manchester.ac.uk/>

Whenever possible, please telephone or email for an appointment.

Legal Support

For free, confidential advice on any legal issue. The Legal Advice Centre is run by the School of Law.

Location: 188 Waterloo Place, Oxford Road

☎ 0161 275 7976

Email: free.legal@manchester.ac.uk 🌐 <http://www.law.manchester.ac.uk/legal-advice-centre/>

Mediation Service

The Mediation Service provides an alternative, informal method of dispute resolution to students who are experiencing a disagreement or conflict, or who feel that they are being harassed, discriminated against or bullied. They can offer advice to students on ways to approach a difficult situation.

☎ 0161 306 5874

Email: mediation@manchester.ac.uk

🌐 <http://www.manchester.ac.uk/mediation>

Accommodation

Information regarding university accommodation can be sought at **The Accommodation Office**.

☎ 0161 275 2888

Email: accommodation@manchester.ac.uk

🌐 <http://www.accommodation.manchester.ac.uk/>

or alternatively information regarding private accommodation can be found at **Manchester Student Homes**.

☎ 0161 275 7680 / 7681

Email: manchesterstudenthomes@manchester.ac.uk

🌐 <http://www.manchesterstudenthomes.com/Accommodation>

The website also provides useful advice on contracts and your rights, as well as household costs and safety issues.

Finance (Debt)

Postgraduate students rely on a variety of sources for their funding: private or family savings, income from work, scholarships offered by governments or charitable foundations, and loans. Students who find themselves in genuine and unforeseen financial difficulties can apply for small sums from the **Living Cost Support Fund**, which is administered by the Student Services Centre. This fund does not assist students with payment of tuition fees and can only provide assistance with living expenses.

🌐 <http://www.studentsupport.manchester.ac.uk/finances/a-z/living-cost-support-fund/>

Finance Advice

Blackbullion is a financial education website for students that aims to help you take control of your money. It offers modules on budgeting, saving and more which you can access on your phone, tablet, or laptop.

🌐 <https://www.studentsupport.manchester.ac.uk/finances/a-z/budgeting/> .

If you are experiencing serious financial difficulties which are causing stress and are affecting your academic work then please refer to **Section 4.7 Mitigating Circumstances**.

It should also be noted that degree certificates/awards will not be given out unless all fees have been paid including tuition fees, accommodation fees, library fines, etc. In severe cases where students have large fee arrears, then the University will restrict all access to University resources such as the library and IT facilities, email and Blackboard until the fee has been paid.

Mature Students' Support

If you have just returned to the academic environment from an absence of any length of time you may be interested in the various computing and writing skills services that are available to all students. Please refer to the Study Skills information in **Section 3.2** for more information on these services. Additionally, **The Burlington Society** offers a social and support network for mature and postgraduate students.

Email: burlington.manchester.ac.uk

 www.burlington.manchester.ac.uk

 <https://www.facebook.com/groups/burlington.society>

Student Parents

The Student Union provides online resources with guidance and information for student parents in the areas of childcare, schools, funding, accommodation, support groups, and University policies and procedures that may directly affect you.

 <https://umsu.unioncloud.org/studentparents>

3.4 Fieldwork

The School of Environment, Education and Development (SEED) recognises the value of fieldwork. However, the safety and wellbeing of our students and staff remains our priority. The School will assess on a regular basis the viability of any travel and fieldwork and communicate any significant changes to our students at the earliest possible opportunity.

The ability of fieldwork and travel to proceed, and whether any changes to proposed fieldwork and travel might be necessary, will remain subject to factors such as the:

- rules and guidance on travel and activities implemented and published by the UK and overseas governments;
- outcome of any risk assessments conducted by the University;
- educational value and student experience of the fieldwork, if significant changes to the proposed fieldwork would be necessary;
- availability of appropriate insurance cover;
- availability of appropriate travel and accommodation and any significant changes to their financial costs.

All fieldwork and travel will be subject to a rigorous risk assessment process and the implementation of any protective measures identified by the risk assessment to ensure the health and safety of all our students and staff.

In some circumstances, it may become necessary to make changes to fieldwork or programme related travel. The University will notify you of those changes at the earliest opportunity. If any fieldwork does not go ahead as planned, then the School's focus will be on seeking to offer a suitable alternative and ensure that the Intended Learning Outcomes (ILOs) of the programme are met.

Please note that Countries may change their immigration and visa regulations at short notice. The School cannot guarantee that where visas are required for fieldwork, they

will be granted but we will take steps so that if a visa is refused, affected students are not academically disadvantaged.

Attendance

Where the fieldcourse is compulsory all students are expected to attend. Where the fieldcourse is optional students will be given a deadline by which they must sign up for the module, this will be in semester 1 and once selected students will not be able to drop the module once the deadline has past. Students attending fieldwork are also required to attend all preparatory lectures and / or seminars.

Part-time students are expected to attend in the second year of their programme; however, this is negotiable on request.

Assessment

You should refer to the information provided in the course structure section of this handbook for information on whether fieldwork is assessed in your programme and if so, the nature of that assessment. Where fieldcourses are not formally assessed, students are encouraged to keep a field diary during the trip and will be expected to critically relate their fieldwork findings to the frames of analysis introduced during taught courses.

Travel Documents and Entry Visas

Students should ensure that they arrive in Manchester with their full passport and, for international students who require one, a UK visa. Many destinations will require that passports and visas are valid for a full 6 months after the date of return from an overseas trip. Students should ensure that their passport and UK visa have the appropriate validity when they arrive in Manchester. If passport or visa renewals or extensions are needed and action is not taken immediately, students may not be able to attend their fieldcourse. For advice on UK visa extensions or renewals, students should contact the Student Immigration Team in the Student Services Centre for assistance. They can be emailed at visa@manchester.ac.uk or telephoned on 0161 275 5000 (option 1). School administrative and academic staff are not qualified to provide guidance on UK visas or immigration issues.

Some destinations will also require entry visas. In this case, students will be guided through the application process. The School has no influence over the visa application process and cannot accept liability if a student is denied an entry visa. Most applications will need to include statements from a UK bank account. It is important that students take steps immediately upon arrival to open a UK bank account. Information on how to do this is available here: <http://www.studentsupport.manchester.ac.uk/finances/a-z/banking/banking-made-easy/>.

Vaccinations

Some destinations will require vaccinations and / or anti-malarial medication. These will be prescribed by Occupational Health Services. No additional charge will be made for this. It is the student's responsibility to ensure that they receive any necessary vaccinations and / or anti-malarial medications in sufficient time to attend the

fieldcourse. Failure to obtain the necessary vaccinations and / or anti-malarial medications will result in students not being permitted to attend the fieldcourse.

Students are expected to be vaccinated according to the UK vaccination schedule before travelling. Occupational Health Services will check that this is the case and it is therefore very important that students arrive in Manchester with full details of their vaccination history. Failure to provide this information can result in students not being permitted to attend fieldcourses.

Costs

The School of Environment, Education and Development makes a significant financial contribution to the cost of the fieldcourse, in addition to the amount paid by students via their tuition fees.

You will also need to cover some additional costs such as meals and personal expenditure whilst on the fieldcourse. No refunds can be given for those students who cannot attend fieldwork, as the School does not charge fieldwork fees. Fieldwork costs are budgeted annually and are entirely separate from the fee setting exercise.

Some fieldcourses may be offered as an optional extra and require a student contribution towards the cost of travel and accommodation. If an optional fieldcourse is cancelled, students will receive a refund for their financial contribution. If a student assigned to the trip later chooses not to attend for personal reasons no refund will be given.

Timing

Fieldcourse dates are set at the start of the first semester and you will be informed of them in advance.

Code of Conduct

All students travelling on fieldcourses must adhere to the School of Environment, Education and Development Fieldwork Code of Conduct, which can be found in the Fieldcourse Handbook. You will be asked to sign a declaration agreeing to abide by the Code.

Fieldcourse Handbook

For further and more detailed essential information about fieldcourses, you should ensure that you read the Student Fieldcourse Handbook carefully. The Handbook will be made available at the beginning of semester one, on the student intranet at <http://www.seed.manchester.ac.uk/studentintranet/>

3.5 Health & Safety (Including Risk Assessments)

University Policy on Health and Safety can be accessed via My Manchester (see Section 2.3)

Online Health and Safety Course

All new students are required to complete compulsory eLearning modules in health and safety at the University. You will be automatically enrolled on the course and it will appear in your class list in Blackboard. You must complete the online courses by no later than week three of semester one.

The purpose of the eLearning course is to:

- provide you with appropriate information on the health & safety policies and procedures in place;
- encourage good practice and set a high standard of health and safety at all times;
- ensure you are aware of and understand health & safety procedures and information;
- enable you to take care of your health and safety and that of others who may be affected by your actions.

You will be required to complete an online assessment at the end of the course.

Working in Arthur Lewis, Ellen Wilkinson and Humanities Bridgeford Street Buildings

The following information is provided for the safety and security of anyone working in or visiting the above buildings.

These buildings are open from 7.30am until 6.00pm. Access around the Arthur Lewis Building is via swipe card only. Telephones are located at the ground floor reception desk and on each link bridge to phone the person you are visiting to gain access. Please note that the member of staff you are visiting is responsible for your well-being whilst you are in the School and we ask that you follow their instructions in the event of an incident or accident.

Accidents and First Aid

There are several first aiders located in all buildings and their names and extension numbers can be found via the QR codes on the First Aid notices which are located throughout the buildings. In the event of an emergency, if you can't immediately locate a notice, call Security on 69966 (internal telephone) or 0161 306 9966 (external telephone).

First aid kits are located in all oasis areas and at the ground floor at reception in the Arthur Lewis Building, and in the administration offices and staff room in Humanities Bridgeford Street Building. In the Ellen Wilkinson Building locations of First Aiders are listed on each floor outside the lifts.

If you need to call for an ambulance, dial 9-999 (internal telephone) or 999 (external telephone) then contact Security on 69966 (internal telephone) or 0161 306 9966 (external telephone), who will direct the paramedics to the building. It is very important that you follow this final step of calling Security – the University of Manchester occupies a large campus and ambulances won't necessarily know where to go to find the correct building. Vital time can be lost if Security are not aware of the call.

Children

Children are only permitted on the premises in exceptional circumstances.

Fire / Evacuation

If it is necessary to evacuate the building, an alarm will sound continuously. Please leave the building by the nearest exit and make your way to the nearest Fire Assembly Point. As a student you must familiarise yourself with the procedures for dealing with an emergency, including discovery of fire, and with the fire exit points in your building and elsewhere in the University where you might find yourself working. Do use all the emergency exits in each part of the Building when they are nearest for you, and do not use the lift in the building when there is an emergency. Fire Marshals in yellow or green vests will be on hand directing staff, students and visitors to Fire Assembly Points.

If you are registered with the Disability Advisory and Support Service (DASS) and have an impairment which affects your ability to exit a building in an emergency situation, the DASS will be in contact with you to arrange emergency evacuation (egress) procedures.

Students who have mobility difficulties should wait in a refuge area. These are located on the 1st, 2nd, 3rd and 4th floor stairwells on the North and South side of the Arthur Lewis Building, along with an Evacuation Chair on the 4th floor. Refuge areas in the Humanities Bridgeford Street Building are located on the stair landings outside rooms 1.70, 1.72 and 1.75 and there are a further three refuge points on the second floor on the stair landings outside rooms 2.13, 2.14 and 2.85. Refuge areas in the Ellen Wilkinson Building are located on each stair landing. Emergency blankets and an intercom system are located on the 3rd, 5th and 6th Floor, A Block and Evacuation Chairs are located on the 4th and 5th Floor C Block.

Testing of the fire alarms is carried out on Monday at 1.30pm in the Arthur Lewis Building, Wednesday at 11.30am in Ellen Wilkinson Building and on Friday at 9.00am in Humanities Bridgeford Street Building.

If you discover a fire, you should:

- sound the alarm by breaking the glass at the nearest call point,
- call the Fire Brigade by dialling 9-999 from any internal telephone,
- evacuate the building by the nearest available exit,
- use the refuge areas if you are unable to use the stairs,
- close all doors behind you and report to the Assembly Point,
- do not collect personal belongings,
- do not use the lifts,
- do not run,
- do not re-enter the building until authorised to do so.

It is your own responsibility to familiarise yourself with the fire exits and evacuation points on all our sites.

Security

You are advised not to leave your belongings unattended. You do so at your own risk. Coin-operated lockers are available on the ground floor and 1st floor of the Arthur Lewis Building. In case of an emergency, call Security, who can be contacted by telephoning 69966 (internal telephone) or 0161 306 9966 (external telephone).

Food

Please always dispose of left-over food and wrappings or containers in bins. Food left on desks or in common areas overnight can lead to problems with vermin.

Toilets

In the Arthur Lewis Building there are male, female and disabled toilets on each floor adjacent to the lift area and these are clearly labelled. In Humanities Bridgeford Street Building there are male, female and disabled toilets on the ground and first floor and lower ground floor. In Ellen Wilkinson Building there are male and female toilets on alternate floors adjacent to the lift area and the disabled toilets are situated on the 1st and 5th floor A Block.

Out of Hours Working

To ensure your safety in Arthur Lewis, Ellen Wilkinson and Humanities Bridgeford Street Buildings during all periods of 'out of hours' access, we ask you to observe the following if you are working in the building before 8.00am or after 6.00pm on weekdays, or during weekends and public holidays / University closure periods. It is in your own personal interest to follow these guidelines.

- Ensure the building entrance is locked i.e. the door closes, after you have gained access. In particular ensure that no one follows you into the building without presenting their University ID card to you. If this happens politely request that they present their ID and if this is not done, then please inform Security at the earliest opportunity by telephoning 69966 (internal telephone) or 0161 306 9966 (external telephone).
- If you follow someone into the building, as a courtesy and to avoid Security being contacted, please present your Student ID card without this being requested.
- Sign in (and out when exiting) using the out of hours register – registers are located at the ground floor reception desk of the Arthur Lewis, Ellen Wilkinson and the Humanities Bridgeford Street Buildings.
- Inform someone else of your location and expected time of return (this is in case you are injured e.g. slip on the stairs).
- If possible keep a mobile phone with you at all times.
- The use of the laboratories during 'out of hours' periods is not permitted except by permission of Senior Research Technician for specified 'low risk' approved procedures.

Please note the heating is limited or switched off entirely during weekends and vacation closure so rooms will be very cold in the winter months and there will be minimum IS maintenance.

Risk Assessments

The School of Environment, Education and Development has prepared a set of generic Risk Assessments which cover most activities undertaken by students within the School:

- SEED high/extreme risk overseas travel risk assessment
- SEED low/medium risk overseas fieldwork travel risk assessment
- SEED low/medium risk overseas business travel risk assessment
- SEED off campus UK based travel risk assessment

These Risk Assessments are available to view on the School's intranet 

<https://www.staffnet.manchester.ac.uk/seed/policies-guidance/compliance/health-and-safety/>

All students undertaking fieldwork or independent study, for example for the purpose of their dissertation, should complete the relevant Risk Assessment in joint discussion with their supervisor and staff. Students must read and understand these Risk Assessments and consider carefully whether their work is covered. **The generic risk assessments are NOT sufficient in the following circumstances:**

- Visiting countries to which the United Kingdom Foreign and Commonwealth Office (FCO) has recommended against travel
- Visiting countries outside the European Union¹
- Visiting recognised hazardous areas, for example factories, quarries, mountains & cliffs, glaciers, caves & mines, high crime neighbourhoods, regions of known political instability and warfare, regions identified by the FCO as carrying a high risk of terrorism and regions affected by disease prevalence or outbreak as identified by the World Health Organisation (WHO), including malaria, dengue fever, avian 'flu, swine 'flu etc.
- Visiting hostile environments, e.g. large rivers, lakes, the sea or areas at high risk from natural disasters such as earthquake, hurricane or typhoon
- Visiting areas which are more than 12 hours from medical facilities
- Working with chemical, biological or allergenic hazards
- Research with children, animals, illegal substances or illegal activities or where there are ethical considerations

If the student's work is not covered by a generic Risk Assessment, they must complete a full Risk Assessment.

The following steps should be taken when preparing a full risk assessment:

1. Identify all reasonably foreseeable hazards, even those where you think the risk is low. Make sure all areas and activities are included and record findings on the University's risk assessment form,
2. For each hazard firstly consider whether it can be removed completely or replaced by a less hazardous alternative,
3. If not, write down any existing controls which you know are in place already.

¹ Students should not assume that simply because the fieldwork is taking place within the European Union, a full risk assessment is not required. All foreseeable hazards should be carefully considered to ensure the generic risk assessment is appropriate.

4. Assess the risk with the existing controls in place. i.e. how **likely** it is that harm will occur and how **severe** the outcome will be,
5. You should then be able to answer the question – Are the existing controls adequate to prevent the harm occurring or is it reduced to an acceptable level, bearing in mind the risk, the legal obligations and standards of good practice?
6. Sign and date the risk assessment. If additional work is required, write an action plan and specify who is responsible for carrying out the actions listed and a timescale for their completion.

When completing a full risk assessment, the following check-list should be considered:

- Travel from home location to fieldwork location,
- Travelling in fieldwork destination country (self-driving, public transport, domestic flights etc.),
- Terrorism threat level,
- Personal security risk & threat of crime,
- Defect or failure of equipment,
- Safety and quality of accommodation,
- Weather conditions (for example, adverse conditions, extremes of temperature etc.),
- Environment (for example, rough terrain, altitude, sea or water courses etc.),
- Urban environment (for example, traffic conditions, crime levels etc.),
- Distance from medical facilities,
- Lone working,
- Hazardous activities (for example, diving, snorkelling, swimming, caving, climbing etc.),
- Communication difficulties (for example mobile phone reception, language barriers etc.),
- Hygiene levels,
- Emergency communication (for example, contact with University, home Embassy or Consulate etc.),
- Prevalent disease or health concerns (for example, malaria, dengue fever, HIV, influenza, rabies etc.),
- Vaccinations and / or prophylactic medication (for example, anti-malarials),
- Pre-trip medical and dental screening,
- Cultural sensitivities (for example dress, speech, sexual conduct).

This list is NOT exhaustive but should be considered as a minimum. It is unreasonable to expect one person to identify all the hazards associated with a particular activity or area. The joint involvement of supervisors and staff is crucial as often each individual may be aware of different aspects of the task and its associated hazards.

Guidance on known risks associated with specific destinations can be sourced from the UK Foreign and Commonwealth Office (FCO) website at <https://www.gov.uk/foreign-travel-advice> and the website of the World Health Organization (WHO) at <http://www.who.int/en/>.

You should also review the University's risk assessment guidance at <http://documents.manchester.ac.uk/display.aspx?DocID=10128> and the University's guidance on Health & Safety in Fieldwork at <http://documents.manchester.ac.uk/display.aspx?DocID=15496>.

3.6 Student Representation

Student Representatives are students who are appointed as representatives by their peers for their particular Programme, School or Faculty to champion your interests, promote your views and act as a mouthpiece between you and decision makers in the University.

The School is committed to receiving and responding to student feedback in order to bring about improvement in the quality of the student experience and the development of teaching and learning across all its programmes. The system of student representation in each department and within the School of Environment, Education and Development as a whole is designed to give students every opportunity to establish and maintain dialogue, both formally and informally, between the student body and staff in order to aid development of programmes of study, the student experience and the quality of the institution as a whole.

Student representation covers a diverse range of activities, which varies depending on the population of students being represented. Representatives can use surveys and student focus groups to collect data and feedback from students in order to inform decisions and make positive change.

Representatives are invited to take part in many different groups and committees where key decisions are made, such as the School Student Support Forum, School Boards, Department Teaching and Learning Committees, Programme Committees.

Committees

Programmes Committee

Each programme in the School will belong to a Programme Committee through which individual or groups of relevant programmes are managed.

Department Teaching & Learning Committee

The School of Environment, Education and Development has a Teaching and Learning Committee within each Department at which decisions regarding programmes are taken and fed into the School Teaching and Learning Committee.

The School Student Support Forum

The School of Environment, Education and Development has a Student Forum which gives student representatives the opportunity to report back to members of senior School management staff on their experience of the provision of teaching and learning, along with issues concerning University facilities such as Library, Estates, IT, eLearning.

The School Board

The School Board sits four times a year, and is the decision-making body of the School. It is constituted by all members of academic staff and representatives from the research, professional support services and student groups within each of the School's five departments.

The School Health and Safety Committee

The School Health and Safety Committee meets once or twice a year and is made up of representatives from the academic and administrative staff and student body from the School of Environment, Education and Development.

Faculty Staff/Student Committee

Student representatives will also be called upon to attend one or two Faculty-level meetings per year.

Student representatives may also be sought during the course of the year to sit on smaller working groups where student input is important.

Election to the Role of Student Representative

Student Representatives should be appointed as soon as possible after the start of a new academic year. Training for new student representatives will be provided online by the University Student Union and student reps notified once this is available.

Student representation on Programmes Committees is decided by informal discussions amongst the student body for your Programme.

Further information on the role of the student representative, training available for new student reps, and the remit of the various School committees can be found on the student intranet at <https://www.seed.manchester.ac.uk/student-intranet/support/student-representatives> .

3.7 Student Complaints

University General Regulation XVIII (Student Complaints Procedure) sets out the procedure for handling complaints by students. A complaint is defined as *'an expression*

of dissatisfaction which merits a response' and covers complaints about the provision of programmes or parts of programmes, services or facilities by the University, or the actions or lack of actions by University staff. The Student Complaints Procedure does not cover matters relating to assessment and progression (see **Section 4.10 on Academic Appeals**), nor complaints involving allegations of misconduct or harassment, as these are covered by separate procedures (see **Section 3.8 on Dignity at Work and Study** below).

Informal Stage

Most complaints can be resolved informally and where practicable a complaint should be dealt with as close as possible to the point at which it arises.

Minor individual problems may be brought to the attention of a Course Unit Convenor, your Programme Director or your Academic Adviser, who will work with relevant School staff and the Student Support and Welfare Team to deal with your complaint.

Collective complaints (for example about a course unit or teaching arrangements) should be reported up through your student representatives to the Programmes Committee or your Programme Director.

If you wish to make an informal complaint, you should outline your concerns in writing in a letter or email, providing all relevant evidence to back up any claims you are making, and send this to the Head of Department, with a copy to the Student Support and Wellbeing Team (seed.wellbeing@manchester.ac.uk). Your complaint will then be investigated and a written response will be sent to you.

Complaints should be made as soon as possible and in any case **within eight weeks of the events or actions (or lack of actions) which have prompted the complaint**. The School will not normally consider complaints made after this period, unless there is good reason for the delay.

Formal Stage

If you feel that you have explored all avenues within the department and the School and are unsatisfied with the response, formal procedures can be invoked by completing a Complaint Form available from the University website at: <http://documents.manchester.ac.uk/DocuInfo.aspx?DocID=1894>. The completed forms and any enquiries should be sent to the Appeals, Complaints and Malpractice Officer in the Faculty of Humanities Office (telephone: 0161 306 1119, email: humsacm@manchester.ac.uk).

The Complaints Procedure does not cover the following, for which separate procedures exist:

(a) appeals against decisions of an Examination Board (or equivalent body) where a student is seeking an academic remedy (Regulation XIX, Academic Appeals Procedure: <http://documents.manchester.ac.uk/display.aspx?DocID=1872>);

(b) complaints involving an allegation of misconduct by a student (Regulation XVII, Conduct and Discipline of Students: <http://documents.manchester.ac.uk/display.aspx?DocID=6530>);

(c) complaints involving an allegation of harassment, discrimination, victimisation and/or bullying by a student or member of staff (Dignity at Work and Study Policy and Procedure: <http://www.staffnet.manchester.ac.uk/equality-and-diversity/policies-and-guidance/dignity-at-work-and-study/>);

(d) complaints against the Students' Union (Code of Practice on the Students' Union: <http://documents.manchester.ac.uk/display.aspx?DocID=12019>), other than through requesting a review of the outcome of any complaint against the Students' Union having exhausted the Students' Union complaints procedure;

(e) If a student wishes to complain about specific accommodation issues, then complaints in this regard can be submitted directly to the Division of Residential and Sports Services as detailed on the following website: <http://www.accommodation.manchester.ac.uk/current/here/info/complaints/>.

3.8 Dignity at Work & Study

The University of Manchester does not tolerate any form of harassment, discrimination or bullying. If you believe that you are being bullied or harassed, the University has a 'Report and Support' platform which allows students to securely report bullying, harassment, sexual harassment or discrimination and receive confidential advice from a Harassment Support Adviser. Reporting can be done anonymously and the platform can be found here: <https://www.reportandsupport.manchester.ac.uk/>. For further information on the Dignity at Work and Study policy, see:

 <http://documents.manchester.ac.uk/DocuInfo.aspx?DocID=22733>.

3.9 Registration and Progression

Registration

Registration for both full-time and new part-time students is undertaken on-line. On arrival at the University, you will be provided with a University Student ID card which is also your Library Card and holds information about your programme, length of stay and eligibility to use University facilities.

You will have received detailed information regarding registration prior to your arrival and it is also included in your welcome pack. Further information about registration is also available at  <http://www.welcome.manchester.ac.uk/new-students/get-ready/>.

Academic and Financial Registration must be completed by the 31 October 2023. Late registration after 31 October will incur a £200 charge.

Course Unit Selection can be completed up to the end of the second week of teaching. It is important that your Academic Advisor and Programme Director meet with you to advise you **before** you select your course units.

If you have not completed your registration nor paid your tuition fees by 31 October 2023 the School will withdraw you from the programme.

Part-Time Re-Registration

Those students on part-time programmes will be contacted over the summer months with details about how to re-register. You should contact the Programme and Curriculum Team in September if you have not received any information about re-registration.

Late Registration

You should arrive in Manchester no later than the Sunday prior to the first day of Welcome Week. **If you cannot arrive in Manchester until after the Monday of Welcome Week, for example due to issues with a visa application, you must contact your Admissions contact at the earliest opportunity.** After this date, you will be considered a late arrival and will be required to provide evidence to support the reason for your lateness. The final deadline date for late arrival is the **31 October 2023**. Your P&C Administrator and Programme Director will then consider whether it is appropriate to approve your late arrival. Unapproved late arrivals will be deferred to the next academic year and you will be withdrawn from the programme. Note that late arrival cannot be used as part of any mitigating circumstances case and students must ensure that they are aware in full of issues discussed during the induction process (especially with regard to plagiarism).

Transfer between Programmes

Transfer between programmes may be allowed before the 31 October 2023 under *exceptional circumstances*. Students who wish to be considered for transfer must complete a *Programme Transfer* form available from the School's student intranet, and submitted to the Student Hub. This form will then be sent to the Programme Directors involved for approval or rejection.

Course Unit Changes

Registration for Course Units takes place at the start of the first semester. Once you have registered for these course units you will be able to make changes to your optional choices via the online system until the deadlines shown below. It is imperative that your record of course units is correct in order that you are subsequently entered for the correct exams and assessments.

Semester 1 deadline for course unit changes	07 October 2023
Semester 2 deadline for course unit changes	17 February 2024

Withdrawal

If you are considering leaving (withdrawing from) your Programme, please speak to your Academic Adviser immediately. Your Academic Adviser may be able to present an

alternative perspective on your situation and will certainly be able to offer advice on how to proceed.

If, for whatever reason, you have firmly decided to withdraw from the Programme, you should inform your Programme Director, and submit a *Withdrawal Request* form (available from the Student Intranet) to seed.hub@manchester.ac.uk. The University will only refund fees from the day the School receives this confirmation of your decision to withdraw.

Interruption

It is the expectation of the University that you will complete your programme in one continuous period of uninterrupted study. It is understood, however, that you may encounter personal difficulties or situations which may seriously disrupt your studies. In such instances, you may be granted a temporary interruption to your studies.

It is important to realise that we may not be able to provide an identical teaching, supervision and assessment experience on your return as would otherwise have been available. Programmes of study and regulations change to reflect developments in the subject, requirements of external bodies and the resources available to the University. While we will try to make reasonable provision for you following your interruption you need to realise that permission for an interruption is a privilege and not a right.

During your period of interruption you will not be a registered student of the University and your right to be on University premises will be that of a member of the public. You may not undertake work on University premises as you are not covered by our insurance agreements. You should also note that you will lose onsite IT and student library access; however, you can retain remote email access to your student email account. You do need to ensure, however, that, if necessary, you save work and provide alternative forwarding contact email details to us.

If you fail to return and re-register at the expected date of return following an interruption, we will attempt to contact you but if we receive no response after 30 days following your expected date of return, you will be withdrawn from the programme.

If you decide, after discussing with your Academic Adviser, to take a break (interruption) from your studies for whatever reason, please speak to your Programme Director. Interrupting your studies will need approval and the implications of any interruption (including financial and academic) need to be carefully thought through. If you are an overseas student, an interruption may also affect your visa and so advice should be sought on this from the Student Immigration Team in the Student Services Centre: <http://www.studentsupport.manchester.ac.uk/immigration-and-visas/changes-during-your-studies/>. If you are in receipt of a PGT Student Loan, you should also check the implications with the Funding Team. Further information on the financial implications of interrupting can be found here: <http://www.studentsupport.manchester.ac.uk/finances/tuition-fees/payments/interruptions-and-withdrawals/>.

Once you have taken all of this advice you must submit an Interruption Request Form (available from the student intranet) to the Student Support & Wellbeing Team.

Once an interruption has been approved, you will be contacted by the School with details of the terms of the interruption and the return date. It is your responsibility to ensure you keep in contact with your Programme Director throughout the period of interruption and update them with any details which may affect your return.

See also **Section 4.7 Mitigating Circumstances**.

3.10 Graduation

Graduation

Should all deadline dates with regard to dissertation submission be met, and should all assessment requirements be fulfilled, students will graduate in the July/December following the completion of their programme. Should you not be able to attend the Graduation Ceremony, the University will arrange for your certificate to be sent to you as proof of attainment.

Graduation is organised via the Student Services Centre (SSC), and not through your Programme Administration Team. You will be contacted directly by the SSC with information regarding Graduation. Further information is available from the SSC Graduation website at <http://www.graduation.manchester.ac.uk/>.

Debts

Students will not be able to graduate should they owe the University money in the form of tuition fees, accommodation costs or other costs such as library fines. Proof that the debt has been paid will be needed before their result can be released.

3.11 The University of Manchester Alumni Association

At Manchester we are proud to have the largest global alumni community of any campus-based university in the UK, with many of the 300,000 graduates we are in contact with holding top positions in every imaginable field. The University of Manchester's Division of Development and Alumni Relations is here to help alumni maintain a lifelong connection with us and with each other, sharing experiences and expertise and enjoying alumni-exclusive offers, events, networking and volunteering opportunities.

Many of our alumni help to influence and inspire the next generation of Manchester graduates by volunteering their time and expertise. Our alumni volunteers mentor and network students, take part in careers Q&As, provide internships and placements, and act as hosts for our Global Graduates programme – all to give you the high-quality experience and transferable skills that are vital in ensuring a return on investment into a degree.

Some alumni also support the University financially, enabling researchers and graduates to contribute towards a more progressive, responsible world, and help us offer Access

Scholarships to high-achieving undergraduate students who come to us from backgrounds under-represented in higher education.

Many of our graduates hold positions of seniority in business, academia, politics, industry and the media, including:

Lord Terence Burns
Chairman, Santander UK

Professor Brian Cox OBE
Physicist and Science Communicator

Jane Cocking
Humanitarian Director, Oxfam

Jesse Armstrong and Sam Bain
Writers of television comedies – Peep Show and Fresh Meat

Benedict Cumberbatch CBE
Actor

Chuka Umunna MP
Former Shadow Secretary of State for Business, Innovation and Skills

Sir Peter Maxwell Davies
Composer and Conductor

Lord Norman Foster
Architect and Designer

Professor Dame Sally Davies
Former UK Government's Chief Medical Officer for England

Sophie Raworth
Presenter, BBC News

Teo Chee Hean
Acting Prime Minister of Singapore

Parineeti Chopra
Actor

Toby Jones
Actor

Professor Danielle George
Radio Frequency Engineer and Presenter of the 2014 Royal Institution Christmas Lectures

Tom Bloxham MBE

Founder of Urban Splash and former Chancellor of the University

Frances O'Grady

First female General Secretary of the TUC

You automatically become a member of our alumni community on graduation, but to get the full benefit you should register at your.manchester.ac.uk during your final year. You can also follow us on Twitter at [@alumniUoM](https://twitter.com/alumniUoM), like us on Facebook at www.facebook.com/alumniuom and join our LinkedIn group – just search 'The University of Manchester Alumni Association'.

Section 4: Assessment, Examination and Feedback

4.1 Types of Assessment

Across the course units you will undertake you will encounter various types of assessment such as written course work, oral presentations, group projects, reports, or examinations. You should be given the full details of how the course unit will be assessed at the start of the semester by the Course Unit Director.

4.2 Feedback

Feedback on academic work

During the course of your programme, you will receive feedback on your progress. Feedback can take many forms: it may be diagnostic to inform the lecturer or seminar leader of your level of knowledge when beginning a course unit, or it may be formative, given during a course unit to enable you to improve your performance in further assessments, for example the way you structure or reference an essay. This is the type of feedback that you will probably come across the most often. Summative feedback would occur at the end of a course unit to inform you of your performance over the whole unit (see **Section 4.4/4.5 below**). You may come across all or some of these examples.

Feedback does not just come from your tutor or lecturer in a formal way, for example when you receive written comments on your work. Feedback can also be informal, during a class and can come from your peers as well as from a member of staff or can take place during self-assessment exercises online. It could also occur when a member of staff responds to your questions by email.

Feedback from you about your course unit

At the end of each course unit you are asked to complete an online questionnaire which asks you to rate the teaching, resources etc. It is vital you complete this to ensure we can continue to improve our course units. Once we receive the results of these Course Unit Surveys, each academic member of staff is asked to respond and take action on the feedback.

Changes to course units have been made following student comments so it is important to make your views known by completing the surveys.

If there are ongoing issues with course units whilst they are being taught then speak first to your Course Unit Director and Academic Adviser for advice or ask your Student Representative to raise the issues at your Programme Committee.

4.3 University Ordinances and Regulations for Masters Degrees

The University Ordinances and Regulations for Masters Degrees can be found in this handbook in Appendix 2. These rules govern the award of your degree and it is your responsibility to ensure that you are fully aware of the regulations. If you are unclear regarding any aspect of the regulations then seek advice from the Programme & Curriculum Team, Programme Director or the Student Support and Wellbeing Team.

4.4 Coursework

Submission dates for assessed coursework

Each Course Unit Director will set specific times and date/s for the submission of assessed coursework. You should be informed of assessment requirements and deadlines at the start of the semester.

How to submit your assessed Coursework - Turnitin

Submissions are made using Turnitin through Blackboard and should be made by the published submission date and time. Turnitin is an integrated assessment tool within Blackboard which facilitates the electronic submission of assignments. Submissions must be uploaded by the published deadline. Guidance on how to complete the uploading of your submission will be made available by the Assessment and Progression Team.

Students should not leave online submission until the very last minute before a deadline in case the system is running slowly or there are technical issues. Students should aim to submit work by an hour before the deadline, and no later than 30 minutes before, to ensure adequate time for upload. An assessment will be recorded as late by the system even if it is only by a minute, and a late penalty will be applied.

It is also important to note that it is the final piece of work submitted prior to the deadline which will be accepted, and you cannot later claim that the wrong piece of work or wrong version of a piece of work was submitted or that you submitted a draft by mistake. No substitution of a file can be made after the deadline has passed.

Although every attempt is made to work within these guidelines, changes may need to be implemented across the year. The School has a commitment to inform students about these changes well in advance of the submission date.

How to submit your assessed Coursework – Hard copy

For submissions that cannot be made using Turnitin (e.g. posters) then these should be submitted to the location identified as a hand-in point by the specified deadline. Guidance for submitting hard copy work, should it be necessary, will be made available by the Assessment and Progression Team.

If a classmate is submitting work on your behalf, please note that **it is your responsibility to ensure that the correct work is submitted.**

Presentation of Assessed Work

Each piece of assessed coursework should be word-processed and submitted with a word count on the front page. Text should be at least font size 12, with line spacing of at least 1.5 and double sided in most cases. As we operate an anonymous marking system, you should not put your name on the assessed work, and instead ensure that your student registration number is presented as a header/footer throughout the piece of assessed work.

University Proofreading Statement

If a student chooses to approach another person to proofread their written work or seeks to use the services of a proofreading service or agency, they must take account of the following principles:

- it is the responsibility of students to ensure that all work submitted is their own, and that it represents their own abilities and understanding. Any proofreading of work that is undertaken by a third party must not compromise the student's own authorship of the work;
- proofreading undertaken by a third party must not take the form of editing of text, such as the adding or rewriting of phrases or passages within a piece of student's work;
- proofreading undertaken by a third party must not change the content or meaning of the work in any way.

Word Count Policy

Each Course Unit Convenor will set a specific word count for the piece of assessed work to which you are expected to strictly adhere. Markers can take into account minor transgressions of up to 10%, but any piece of work which is significantly over the specified length will not be marked and may have to be resubmitted as a Resit / Referral.

Students **must** include a word count on the front page of every piece of work. The word count includes: chapter footnotes and endnotes, quotations and tables. It should not include: the bibliography or appendices. Failure to indicate the word count, or the provision of a false word count, may lead to disciplinary action.

Please see the School's full policy on Word Count in **Appendix 4.**

Penalties for Late Submission

Please note that in accordance with University policy, any student who submits a piece of assessed coursework after the submission deadline will receive a penalty, unless they are subsequently able to prove Mitigating Circumstances (See Section 4.7).

The penalty for late submission at postgraduate level is the deduction of 10% of the maximum amount of marks, for which the following principles will apply:

- A deduction of 10% of the maximum available mark every 24 hours until the assignment is submitted or no marks remain (e.g. if the work is marked out of 100, this means a deduction of 10 marks per 24 hours late. If the work is marked out of 20, the deduction would be 2 marks for every 24 hours late.)
- A 'day' is 24 hours, i.e. the clock starts ticking as soon as the submission deadline has passed; (Note that a penalty of 10% would apply, regardless of whether a piece of work is 1 minute or 23 hours late).
- Weekends, bank holidays and University closure days are included as part of the 24hours/calendar days in this policy.
- Submission dates and times are in UK local time and is the responsibility of the student to check the relevant time zone.
- The use of online submission via Turnitin allows us to see when a submission is made after the deadline;
- Where paper copies of assessment work are submitted, students will receive a receipt which indicates the date and time of submission;

Please note that the standard penalty relates to first attempts only. Students who submit referral assignments (further attempts of up to half the taught credits, as opposite to original assignments/first attempts) after the deadline will be automatically subject to a mark of zero. There are no further resit opportunities for referred assignments that are submitted late, unless there is approved mitigation.

There is no sliding scale for late submission of open book examinations where students will be awarded a mark of zero in the absence of mitigating circumstances.

Any late penalties are applied via the student system and are not included in provisional marks posted on Blackboard.

Full regulations with regard to your assessment can be found in **Appendix 2**. It is your responsibility to ensure that you are fully aware of these regulations. If you are unclear regarding any aspect of the regulations then seek advice from the Assessment & Progression Team, Programme Director or the Student Support & Wellbeing Team.

Marking

The assessed work for each course unit is subject to first marking by an Internal Examiner and moderation by an Internal Moderator. Course unit assessments are then submitted to the External Examiners for moderation. **All marks are provisional until the**

June Exam Board following the application of any late penalties. Scripts may be re-graded or scaled upon recommendation by the External Examiners at the Board of Examiners' Meeting.

Please note that there is no provision for assessed work to be re-marked on the request of an individual student.

The criteria used in marking can be found in **Appendix 1**.

Feedback is returned to each student, on the understanding that all marks are provisional until after the Board of Examiners' meeting in June. Any students who have failed an assessed piece of work should consult the Course Unit Director concerned for further feedback. Assessments, exam scripts and feedback are retained by Assessment and Progression Team as all examined work must be available to the Board of Examiners. Marked exam scripts, however, are available for use in discussions between Course Unit Directors, Academic Advisers and students. Assessed work is usually marked online using Grademark and once results have been made available, students will be able to access their scripts along with the marker's comments and feedback online via Blackboard.

Students may expect the return of marked coursework within 15 working days of the date on which it was submitted. In exceptional cases where it is not possible to return work within this timescale, Course Unit Directors will notify students concerned of the expected return date. The University Feedback Policy can be found at:

<http://documents.manchester.ac.uk/DocuInfo.aspx?DocID=6518> .

4.5 Examinations

Format

If your course unit is assessed by a set examination this could be either an online exam with submission via Blackboard or on campus in Manchester under invigilated conditions.

Timing

Should your course unit be assessed by a set examination this will be undertaken at the end of the semester in which the course unit is taught. Examinations are held in January for first semester course units, and in May/June for second semester course units. Resit exams take place during the last two weeks of August. Examination timetables are produced centrally by the University Examinations Team in the Student Services Centre. Details of examinations/assessments will be published on course unit blackboard pages.

Exams Timetable

You will be informed of the dates of examinations via your University e-mail address (see **Section 2.4**) and for on campus exams you will be able to access an individual exams timetable via My Manchester (<http://my.manchester.ac.uk>) and by clicking on 'My Exams' once the timetable has been published by the University. The timetables will be

published in advance of the actual exams on a date to be confirmed by the University Examinations Team.

The examinations timetable is produced using dedicated software for which the overarching factor is the production of a timetable with no, or as few as possible student clashes. Whilst attempts are made to ensure that you have a spread of examination dates throughout the examination period, in many cases this is not possible given the institutional constraints on the numbers of examination venues that are available, the number of examinations which are scheduled to take place and the options available to students on any particular programme of study. You should expect therefore to have examinations on two or more consecutive days, and potentially, have more than one examination within a single day.

Fees for Exam Resits

It should be noted that a fee may be charged by the University for any resit examinations which you are required to take. The fee is payable directly to the Student Services Centre and can be made via the online store: <https://estore.manchester.ac.uk/>.

Resits abroad

The University does not permit students to take on campus resit examinations abroad and any students undertaking an on campus resit examination during the August resit period are expected to return to Manchester to sit the examination under invigilated conditions.

4.6 Dissertations

You will be given a handbook with guidance for dissertation preparation and submission at the beginning of your second semester.

Final dissertation results are normally issued to students in November following the Board of Examiners' meeting. Provisional results may be issued before the Board has taken place. Students should not make arrangements for Graduation until final confirmation of results has been received. If a dissertation resubmission is required, students are given 6 months to resubmit.

4.7 Mitigating Circumstances

It is essential that if your work is being affected by personal or medical circumstances you seek advice from your Academic Adviser / the School's Student Support & Wellbeing Team (seed.mitcircs@manchester.ac.uk or seed.wellbeing@manchester.ac.uk). They will be able to talk you through the process to apply for an 'Extension' or 'Mitigating Circumstances'. The University defines Mitigating Circumstances as 'unforeseeable or unpreventable circumstances that could have, or did have, a significant adverse effect on the academic performance of a student'. If you think that you may not be able to hand in an assignment by the deadline, or your performance or academic progress is likely to be affected by your circumstances, you may submit an Extension Request or a Mitigating Circumstances Form with relevant supporting evidence, for consideration. The Student Support & Wellbeing Team will be able to advise on the deadlines for the

submission of forms and documentation, and the type of documentary evidence required.

Forms

The online forms to apply for and Extension or Mitigating Circumstances are available on the student intranet at:

<https://www.seed.manchester.ac.uk/student-intranet/postgraduate/postgraduate-taught/mitigating-circumstances/>

Deadlines for Submission of Applications

Extension forms must be submitted at least 2 working days before the assessment submission deadline.

Mitigating Circumstances forms must be submitted within a week of the end of the exams period in each semester, or by the end of Resit exams period in August/September.

Please note that it is the sole responsibility of the student to submit a request for consideration of mitigating circumstances by the published deadlines. Applications should be submitted before a course unit submission deadline has passed and applications will not be considered once grades have been published.

Evidence

Evidence is compulsory for all mitigating circumstances requests. The nature of the supporting documentation required for a Mitigating Circumstances Request will vary according to the nature of the circumstances, but it must be sufficiently independent and robust to confirm the veracity of the case you are making. If supporting evidence is not in English, a translation should be supplied. Evidence should be submitted as soon as possible after applying, to: seed.mitcircs@manchester.ac.uk. Evidence does not have to be supplied at the time of submitting the online form. Details of the kinds of evidence which can be supplied to support an application can be found on the student intranet. Evidence is not required for an Extension Request of up to 5 working days.

Late Submission

Students who are submitting assessment work late on the grounds of mitigating circumstances should submit the work **as soon as possible** after the submission deadline. Students should **NOT** wait for their case to be considered, or until after the decision concerning approval of mitigating circumstances has been communicated, before submitting work. Consideration will be given to the amount of time a student has taken to submit after the deadline and a judgement will be made on whether this is justified by the severity of the circumstances detailed in the supporting documentation.

Timescale for Decisions

Extension Requests will normally be actioned within 2 working days of submission.

Mitigating Circumstances cases will normally be considered on a fortnightly basis and decisions will be communicated in writing to students within 2 working days of consideration.

Outcome of an Extension Application

Students with relevant grounds and whose applications have been approved will be granted extensions of an extra 5 working days to the original deadline.

Students who are registered with DASS and have 'automatic 1-week extensions' as part of their support plan, can apply for an additional extension of 5 days if the automatic extension is not sufficient.

The outcome email will confirm the new date of submission and the assessment should be submitted by 2pm on the extended deadline into the relevant inbox on Blackboard.

Possible Outcomes

In accordance with the Mitigating Circumstances Policy, mitigation will not result in the changing of any marks, except for cases where a penalty for late submission is waived. Instead, mitigation may result in a further attempt at assessment being made available, a reassessment attempt being made available as a first sit rather than resit, a mark being disregarded, or a student may be given a mark for a whole course unit based on their performance in the part of the assessment which was not adversely affected. The course unit may also be 'flagged' for further consideration by the Exam Board or in case the overall degree result is borderline between two classifications.

Please see below some examples:

- 'C3 Waive late submission penalty' – this is granted to students who have submitted work after the original deadline. It essentially means that you will not be penalised for a late submission.
- 'A6 Flag for Exam Board' – this is granted to students who have submitted their work on time before the original deadline but where academic performance may have been impacted by the circumstances. The A6 Flag acts as a precaution; the Exam Board is made aware of your extenuating circumstances and, in the event of grades being out of line with your profile, further action may be taken to ensure that you are not disadvantaged.
- 'Rejected' – this means that you did not have permissible grounds for mitigation and are therefore expected to submit your work on the original deadline as communicated by the Course Unit Director.
- 'Accepted pending evidence' – this means that your grounds for mitigation have been accepted, but you are required to send some supporting evidence of your circumstances before the decision can be confirmed and recorded. Supporting evidence needs to be emailed to: seed.mitcircs@manchester.ac.uk.

Grounds for Mitigation

Please see below for examples of possible mitigating circumstances as well as circumstances which will not be considered as grounds for mitigation.

Examples of possible mitigating circumstances:

- Significant illness or injury; or worsening of an ongoing illness or disability, including mental health conditions; (please see the following DASS webpage for examples of disabilities: <http://www.dass.manchester.ac.uk/who-do-we-support/current-students/>)

- The death or critical/significant illness of a close family member/dependant
- Significant family or personal crises or major financial problems leading to acute stress
- Absence from the University for public service, e.g. jury service

*Circumstances which will **NOT** normally be regarded as grounds for mitigation:*

- Holidays, moving house, and events which were planned or could reasonably have been expected
- Assessments which are scheduled closely together
- Misreading the timetable or misunderstanding the requirements for assessment
- Inadequate planning and time management
- Failure, loss or theft of a computer or printer that prevents submission of work on time: students should back up work regularly and not leave completion and printing so late that they cannot find another computer or printer
- The act of religious observance
- Consequences of paid employment (except in some special cases for part-time students)
- Exam stress or panic attacks not diagnosed as illness or supported by medical evidence
- Disruption in an examination room during the course of an assessment which has not been recorded by the invigilators (including instances such as fire alarms or other noise disruptions).

Events which may arise during **pregnancy** that may constitute mitigating circumstances will be judged on a case-by-case basis. It is recommended by the Equality Challenge Unit (ECU), that at a minimum, students are required to take two weeks' compulsory maternity-related absence. This is in line with employment law and is to ensure the health and safety of the mother following childbirth.

Please note that submitting the wrong piece of work or the wrong version of a piece of work is not grounds for mitigating circumstances. Markers will only be able to mark the first piece of work which you submit, so please take care when uploading assessments.

Mitigating Circumstances and Disability Support

The mitigating circumstances policy works in conjunction with disability support. Some students who have disability support via the University Disability Advisory and Support Service (DASS) will have a support plan which includes 'one-week automatic extensions' and if this is the case, students do not need to apply for an Extension or Mitigating Circumstances unless more than one week is required. Further guidance for DASS-registered students on 'automatic extensions' can be found on the University website: <http://documents.manchester.ac.uk/display.aspx?DocID=37272>. Students with disability support may also submit a Mitigating Circumstances application if, for example, there are further complicating factors not relating to their disability.

Mitigating Circumstances and the Dissertation

As with coursework assessment, the Extensions and Mitigating Circumstances processes also apply to dissertations. Any student who considers that their dissertation may be

delayed or their academic performance impacted due to 'unforeseen' and 'unpreventable' circumstances should apply for an Extension or Mitigating Circumstances.

All work to be considered under Mitigating Circumstances should be submitted as soon as is practicable but note that any Postgraduate Taught dissertations submitted after the start of October may be too late to be marked and the award confirmed in time for the December Graduation.

Any Postgraduate Taught dissertations submitted after the deadline without an approved extension or mitigating circumstances case can only receive a maximum mark of 40% as they will be treated as a resit and the mark capped at the lowest compensatable level. A maximum mark of '40R' will be recorded and no further attempt will be permitted.

Please contact your Dissertation Supervisor or Programme Director for further guidance on this issue if required.

Interruptions

If you are experiencing circumstances which are likely to affect your studies or prevent you from studying over a longer time period, then you may wish to consider the option of an interruption. See **section 3.9** Interruptions for further details.

Mitigating Circumstances and Academic Appeals

Please note that retrospective applications for mitigating circumstances will not be considered after the deadlines specified above in each semester, or after marks have been published for coursework. Students wishing to apply for mitigating circumstances after the end of the exams period will have to go through the academic appeal route (<http://www.studentsupport.manchester.ac.uk/study-support/appeals/>) once results have been published, and be able to provide a compelling and credible explanation as to why the application was not made at the appropriate time. See also Section 4.10 on Academic Appeals.

Not informing the University of mitigating circumstances due to personal feelings, e.g. shame, embarrassment or pride, or having concerns over the confidential treatment of requests for mitigation, are not considered to be credible and compelling explanations as to why the circumstances could not be made known at the time.

Note that all information submitted in an Extension or Mitigating Circumstances request will be treated as confidential.

4.8 Failure and Reassessment

Under certain circumstances students may be permitted to resubmit work for course units they have failed. **Permission to resubmit assessed work can only be granted by**

the Board of Examiners at its meeting in June. Under no circumstances can work be resubmitted before this meeting.

Postgraduate programmes can be compensated up to 40 credits for PG Diploma/Masters and 20 credits for a PG Certificate. So it is possible for a student to fail 40 credits and still meet the standard required for the Masters providing that the marks in the failed courses are between 40-49%. Please refer to the Examination Regulations (Section F) for full details regarding compensation.

Postgraduate programmes can be referred in/resit up to half of the taught credits. Students may also resubmit the dissertation on one occasion, subject to the mark restrictions (which is outlined in the Examination Regulations Section G). Please refer to the Examination Regulations (Section G) for full details regarding reassessment.

Please note that the number of credits referred and those compensated cannot exceed half the taught credits in total. The total number of credits allowable for referral for a PG Diploma/Masters is 60, of which 40 can be compensated. For a PG Certificate, the total number of credits allowable for referral is 30 credits, of which 20 can be compensated.

Students who fail more than 60 credits at Masters level will not be permitted to resit / refer for a Masters degree and may be considered for a Postgraduate Diploma or Postgraduate Certificate qualification.

Students who wish to clarify any of the above should seek advice from the Assessment and Progression Team.

4.9 Academic Malpractice including Plagiarism

The University deems plagiarism to be a serious academic offence and if proven it constitutes a breach of Regulation XVII Conduct and Discipline of Students. For Postgraduate students, all identified cases of plagiarism are immediately referred to a disciplinary committee (at School, Faculty or University level) who will decide on a penalty. Students will be notified by means of a letter that their work has been referred and will subsequently be contacted to attend a disciplinary hearing.

The **penalties** for academic malpractice can be severe: previous cases of plagiarism identified in the School have resulted in students being awarded a Postgraduate Diploma or Certificate rather than a Masters degree, loss of credits towards the degree and also in exclusion from the programme. Multiple instances of plagiarism are likely to result in exclusion from the programme. **It is crucial, therefore, that you understand correct referencing conventions in order to avoid plagiarism. Please refer to Appendix 3 of this handbook for information on the Harvard referencing system.**

Below are some University guidelines which should help you to avoid plagiarism and other forms of academic malpractice.

Introduction

- A. As a student, you are expected to co-operate in the learning process throughout your programme of study by completing assignments of various kinds that are the product of your own study or research. For most students this does not present a problem, but occasionally, whether unwittingly or otherwise, a student may commit what is known as plagiarism or some other form of academic malpractice when carrying out an assignment. This may come about because students have been used to different conventions in their prior educational experience or through general ignorance of what is expected of them.
- B. This guidance is designed to help you understand what we regard as academic malpractice and hence to help you to avoid committing it. You should read it carefully, because academic malpractice is regarded as a serious offence and students found to have committed it will be penalized. *At the very least* there could be a reduction in marks for the piece of work in question, but it could be worse; you could be awarded zero (with or without loss of credits), fail the whole unit, be demoted to a lower class of degree, or be excluded from the programme.
- C. Academic malpractice includes **plagiarism, collusion, fabrication or falsification** of results and anything else intended by those committing it to achieve credit that they do not properly deserve. In addition to the advice that follows, your School will give you advice on how to avoid academic malpractice in the context of your department. It will also design assessments so as to help you avoid the temptation to commit academic malpractice. Finally, you should take note that work you submit will be screened electronically to check against other material on the web and in other submitted work.

Plagiarism

- D. **Plagiarism** is presenting the ideas, work or words of other people without proper, clear and unambiguous acknowledgement.

It also includes '**self-plagiarism**' which occurs where, for example, you submit work that you have already presented for assessment (e.g. for a different course unit, as part of your undergraduate studies or for a degree at another institution), and for which you have already gained credit, on a previous occasion. Please be aware that once your work is stored in the Turnitin database, then the Turnitin software will highlight any matches in subsequently submitted material which has the same text (see section on 'TurnitinUK' below).

You should also note that copying material from **sample essays** provided by the course tutor as examples of good practice will also be considered as 'plagiarism'.

Obviously, the most blatant example of plagiarism would be to copy another student's work. Hence it is essential to make clear in your assignments the distinction between:

- the ideas and work of other people that you may have quite legitimately exploited and developed, and
- the ideas or material that you have personally contributed.

- E. The following are a few important do's and don'ts:

- **Do** get lots of background information on subjects you are writing about to help you form your own view of the subject. The information could be from electronic journals, technical reports, unpublished dissertations, etc. Make a note of the source of every piece of information at the time you record it, even if it is just one sentence.
 - **Don't construct a piece of work by** cutting and pasting or copying material written by other people, or by you for any other purpose, into something you are submitting as your own work. Sometimes you may need to quote someone else's exact form of words in order to analyse or criticize them, in which case **the quotation must be enclosed in quotation marks to show that it is a direct quote, and it must have the source properly acknowledged at that point.** Any omissions from a quotation must be indicated by an ellipsis (...) and any additions for clarity must be enclosed in square brackets, e.g. "[These] results suggest... that the hypothesis is correct." It may also be appropriate to reproduce a diagram from someone else's work, but again the source must be explicitly and fully acknowledged there. However, constructing large chunks of documents from a string of quotes, even if they are acknowledged, is another form of plagiarism.
 - **Do** attribute all ideas to their original authors. Written 'ideas' are the product that authors produce. You would not appreciate it if other people passed off your ideas as their own, and that is what plagiarism rules are intended to prevent. A good rule of thumb is that each idea or statement that you write should be attributed to a source *unless* it is your personal idea *or* it is common knowledge. (If you are unsure if something is common knowledge, ask other students: if they don't know what you are talking about, then it is not common knowledge!)
- F. As you can see, it is most important that you understand what is expected of you when you prepare and produce assignments and that you always observe proper academic conventions for referencing and acknowledgement, whether working by yourself or as part of a team. In practice, there are a number of acceptable styles of referencing depending, for example, on the particular department in which you are studying, so if you are not certain what is appropriate, *ask your Programme Director or the Course Unit Convenor for advice!* This should ensure that you do not lay yourself open to a charge of plagiarism inadvertently, or through ignorance of what is expected. It is also important to remember that you do not absolve yourself from a charge of plagiarism simply by including a reference to a source in a bibliography that you have included with your assignment; you should always be scrupulous about indicating precisely *where* and *to what extent* you have made use of such a source.
- G. So far, plagiarism has been described as using the words or work of someone else (without proper attribution), but **it could also include a close paraphrase of their words**, or a minimally adapted version of a computer program, a diagram, a graph, an illustration, etc. taken from a variety of sources without proper acknowledgement. These could be lectures, printed material, the Internet or other electronic/AV sources.

- H. **Remember:** no matter what pressure you may be under to complete an assignment, you should *never* succumb to the temptation to take a 'short cut' and use someone else's material inappropriately. No amount of mitigating circumstances will get you off the hook, and if you persuade other students to let you copy their work, they risk being disciplined as well (see below).

Collusion

- I. **Collusion** is any agreement to hide someone else's individual input to collaborative work with the intention of securing a mark higher than either you or another student might deserve. Where proved, it will be subject to penalties similar to those for plagiarism. Similarly, **it is also collusion to allow someone to copy your work when you know that they intend to submit it as though it were their own and that will lay both you and the other student open to a charge of academic malpractice.**
- J. On the other hand, collaboration is a perfectly legitimate academic activity in which students are required to work in groups as part of their programme of research or in the preparation of projects and similar assignments. If you are asked to carry out such group work and to collaborate in specified activities, it will always be made clear how your individual input to the joint work is to be assessed and graded. Sometimes, for example, all members of a team may receive the same mark for a joint piece of work, whereas on other occasions' team members will receive individual marks that reflect their individual input. If it is not clear on what basis your work is to be assessed, to avoid any risk of unwitting collusion you should always ask for clarification *before* submitting any assignment.

Fabrication or falsification of results

- K. For many students, a major part of their studies involves laboratory or other forms of practical work, and they often find themselves undertaking such activity without close academic supervision. If you are in this situation, you are expected to behave in a responsible manner, as in other aspects of your academic life, and to show proper integrity in the reporting of results or other data. Hence you should ensure that you always document clearly and fully any research programme or survey that you undertake, whether working by yourself or as part of a group. Results or data that you or your group submit must be capable of verification, so that those assessing the work can follow the processes by which you obtained them. Under no circumstances should you seek to present results or data that were not properly obtained and documented as part of your practical learning experience. Otherwise, you lay yourself open to the charge of **fabrication** or **falsification** of results.

Finally...

- L. If you commit any form of academic malpractice, teaching staff will not be able to assess your individual abilities objectively or accurately. Any short-term gain you might have hoped to achieve will be cancelled out by the loss of proper feedback you might have received, and in the long run such behaviour is likely to damage your overall intellectual development, to say nothing of your self-esteem. You are the one who loses.

The use of Artificial Intelligence (AI)

We urge students to be cautious when using a chatbot or AI tool within their learning. Chatbots and AI tools can be useful , but there are a number of risks associated with using them. Please make sure you are in contact with your course unit leads to ensure if or how AI might be used in the unit. This might vary from course to course or even assessment to assessment.

Please ensure that you are aware of what is permissible use of AI for each assignment. You can utilise AI to generate ideas, key themes, and plan your assessment but not to write your assessment. Do not use AI to generate text, or partial text for use in your assessment unless the assignment brief explicitly states that this is permitted, otherwise use will be deemed academic malpractice. This is academic malpractice because the words and ideas generated are not your own and not an accurate reflection of your learning. Further to this, the words and ideas generated by the chatbot or AI tool may make use of other, human authors' ideas without referencing them, which is plagiarism.

Where a chatbot or other form of AI has been used, make sure you acknowledge that use. Information on how to cite can be found here: <https://manchester-uk.libanswers.com/teaching-and-learning/faq/264824>

Some units, for example those on AI and technology, permit the use of AI. However, they require you to sign a code of conduct which must be adhered to. Make sure you understand and follow these codes. If you are unclear on what is permissible, speak to the unit lead.

TurnitinUK

The University uses electronic systems for the purposes of detecting plagiarism and other forms of academic malpractice and for marking. Such systems include TurnitinUK, the plagiarism detection service. As part of the assessment process, you will be asked to submit an electronic version of your work to TurnitinUK for plagiarism checking. Please note that when work is submitted to the relevant electronic systems, it may be copied and then stored in a database to allow appropriate checks to be made.

Students must retain an electronic copy of all assessment work and be able to submit this to the School if requested.

Viva Voce for Suspected Cases of Academic Malpractice

Where a member of academic staff suspects that a piece of work has not been written by the student, and it is strongly suspected that academic malpractice has been committed, a viva may be held with the student to determine the authorship of the work. The purpose of the viva is to give the student the opportunity to discuss the assessment and demonstrate that the work is their own. If the viva is inconclusive in determining authorship, the work may be referred to an academic malpractice panel.

4.10 Student Academic Appeals

University General Regulation XIX (Academic Appeals) defines a number of decisions affecting a student's academic progression against which students might wish to appeal. These include expulsion from the University, exclusion from a programme of study, or the result of assessment or award of a particular degree classification.

There are **specific grounds** on the basis of which an appeal may be made according to Regulation XIX, and these are as follows:

- (a) Circumstances exist (or existed) affecting your performance of which, for a good reason, the relevant decision-making body may not have been made aware when its decision was taken, and which might have had a material effect on its decision.
- (b) A material administrative error or procedural irregularity has taken place in the assessment process (or in putting into effect the regulations for your programme of study) of such a nature as to cause significant doubt whether the decision you are appealing might have been different if the error or irregularity had not occurred.
- (c) You have evidence of prejudice or bias by one or more of your examiners.
- (d) Your supervision or training in respect of research for a dissertation or thesis (or equivalent work) was unsatisfactory to the point that your performance was seriously affected. If you wish to appeal on ground (d) but your supervisory concerns arose significantly before the decision you are appealing, and you didn't submit a formal complaint, you must provide a good reason (along with supporting evidence) for only raising your concerns at appeal.

An appeal cannot challenge academic judgement. Academics use their knowledge and expertise to mark students' work and you cannot appeal because, in your opinion, this judgement is wrong. Safeguards are in place to make sure that marking is consistent and fair. Decisions on how to apply mitigation to results (rather than whether or not to accept a request for mitigation) also involve academic judgement that is not open to appeal, unless you can show that a procedural irregularity has occurred.

If you feel you have a case for appeal, please discuss this initially with your Academic Adviser or the School of Environment, Education and Development's Student Support & Wellbeing Team.

Please note that you can only appeal after receiving written notification of an examination board decision and cannot appeal against provisional results. Academic appeals must be initiated by the student and not via a member of staff. You can only

submit an appeal for yourself. If you would like someone else to submit an appeal on your behalf, you must provide written permission for them to submit the appeal for you.

If you wish to submit an appeal against your results, you should complete the [Stage One Academic Appeal Form](#) **within 20 working days of publication of the results**, providing relevant evidence to back up any claims you are making.

Once your appeal documents have been received, your appeal will be acknowledged and passed to a case handler for investigation and you will receive a written response in due course. If you are not satisfied with the response from the School, then you can appeal to the Faculty by completing the [Stage Two Academic Appeal Form](#). Appeals to the Faculty should be submitted **within 10 working days** of notification of the outcome of the Stage One appeal.

See also **Section 3.7** on student complaints procedures.

4.11 External Examiners

External Examiners are individuals from another institution or organisation who monitor the assessment processes of the University to ensure fairness and academic standards. They ensure that assessment and examination procedures have been fairly and properly implemented and that decisions have been made after appropriate deliberation. They also ensure that standards of awards and levels of student performance are at least comparable with those in equivalent higher education institutions. Some programmes which are professionally accredited may have a practitioner examiner with considerable experience in the field as well as an academic examiner.

External Examiners' reports relating to this programme will be shared with student representatives at the Programmes Committee, where details of any actions carried out by the programme team/School in response to the External Examiners' comments will be discussed. Students should contact their student representatives if they require any further information about External Examiners' reports or the process for considering them.

Please note that it is inappropriate for students to make direct contact with External Examiners under any circumstances, in particular with regards to a student's individual performance in assessments. Other appropriate mechanisms are available for students, including the University's appeals or complaints procedures and the UMSU Advice Centre. In cases where a student does contact an External Examiner directly, External Examiners have been requested not to respond to direct queries. Instead, External Examiners should report the matter to their School contact who will then contact the student to remind them of the other methods available.

Section 5: Research Integrity and Ethics

The School of Environment, Education & Development is committed to upholding the highest level of research integrity.

Research Integrity refers to an ethos of ethical conduct as academics, practitioners and researchers. Each of us individually, or in teams, demonstrates research integrity by taking full responsibility for acting in an ethical manner in the conduct of our research. This includes matters of finance, methodology and respect for truth and persons.

We adhere to the University's [Code of Good Research Conduct](#).

We aim to provide clarity regarding the allocation of responsibilities and lines of accountability, and endeavour to make our decision-making processes transparent. Our processes will be monitored and reviewed regularly according to best practice.

5.1 What research does it cover?

All research involving human participants or human data or material must have ethical approval. Research using information about human participants that is publicly and lawfully available, or made available by private individuals or organisations e.g. information published in the census, population statistics published by the government, personal letters and diaries etc., held in public libraries, does not require review by an ethics committee. However we are still obliged to act ethically as researchers and acknowledge our obligations in this regard. This includes observation of any confidentiality clauses, copyright, permissions and to avoid plagiarism.

The starting point for all research is to discuss your plans with your supervisor.

Please note:

1. You **cannot** begin data collection (or participant recruitment) until you have been given formal approval.
2. You **can** approach organisations, to seek permissions to recruit participants or access services in order to prepare to conduct your research (if and when it is approved), before ethical approval is granted.
3. You may require a **DBS check** to be completed depending upon the subjects involved and the location of your research.

5.2 What happens if I have not applied for or obtained ethical approval?

Failure to follow the School of Environment, Education & Development's procedure for ethical approval may leave you in breach of the University's Code of Good Research Conduct. It may leave you and the University open to legal action without the protection of an insurance policy and is likely to result in disciplinary action.

Section 6: Appendices

Appendix 1 – MIE Marking Criteria

These notes apply to all ‘taught masters’ (by course-work and dissertation) and postgraduate diploma, postgraduate certificate courses in the Manchester Institute of Education

All written work submitted for examination purposes are marked in accordance with the grades and other criteria set out overleaf.

These guidelines and criteria are issued to assist Internal and External Examiners in the task of awarding grades and to ensure consistency and fairness in the process. These are also issued to students, as examination candidates, in the interests of transparency – so the basis of the grades and the marking is clear to all.

Assessment criteria Each course unit of study and each dissertation (by Mode A or Mode B) is examined and assessed separately.

A pass at Masters level is 50% and at Postgraduate Certificate and Diploma level is 40% at first attempt (see below for referred/compensated assignments). Students can be compensated and/or referred in up to half of the taught credits; students may also resubmit the dissertation.

Table A) illustrates the number of credits that can be compensated and referred based on the number of credits taken. Granted AP(E)L will reduce this number accordingly.

Award	Compensatable		Non-compensatable
	Compensated Credits	Referred Credits	Referred Credits
PGCert	15	15	30
PGDip	30	30	60
MA/MEd/MSc	30	30	60

Table B) represents the failing mark and its potential outcome, compensation is subject to your Programme and/or Course Unit.

Award	Compensation* Zone	Referral
PGCert	30-39%	0-29%
PGDip	30-39%	0-29%

MA/MEd/MS c	40-49%	0-39%
----------------	--------	-------

Reassessment arrangements

Students who fail to satisfy 50%/40% and can't be compensated (see table above) will receive an official referral letter. They will normally have up to one month from the date of the letter and before the end of August of the same academic year. Postgraduate students are allowed one attempt, per course unit, at reassessment.

This reassessment can be by writing another essay or submitting an alternative assignment, which must be agreed by the Exam Board or course unit tutor.

Any referral that is passed will be capped either at 40R/30R** or if the first attempt failed within the compensation zone capped at the first attempt mark e.g. 45R/35R. This will be the mark reported on a student's transcript of results. If a student fails there reassessment then the first mark stands and they will not gain the credits for this unit. Consideration of an exit award will be put to the Examination Board in such cases.

**subject to School or Professional, Statutory and Regulatory Bodies.

Table C) represents the failing mark and its referred grade if passed at second attempt.

Award	Failed within Compensation* Zone but referred.	Capped dependant on original grade	Failed	Capped at minimum compensation zone
PGCert	30-39%	30-39R	0-29%	30R
PGDip	30-39%	30-39R	0-29%	30R
MA/MEd/MSc	40-49%	40-49R	0-39%	40R

Presentation

Presentation will be taken into account by the Examiners. Assignments must be typed and available for submission via Blackboard. Dissertations must be type-written or word-processed and presented in line with the Guidance on Presentation of Dissertation document.

Plagiarism

All students are advised that plagiarism (the unattributed use of other people's work) leads to automatic failure. All words, concepts, arguments and data borrowed from other sources must be clearly acknowledged and fully referenced, with a complete and accurate bibliography at the end of the text. Further guidance on this is available in the Postgraduate Student Handbook.

Criteria and recommended mark scheme for examined course-work and dissertations:

Mark (Class) descriptor	Mark Range (whole numbers)	Equivalent Grade	%
Distinction	70 to 100	A+	90
Merit	60 to 69	A	80
Pass	50 to 59	A-	72
Compensatable fail	40-49	B+	68
Non-compensatable fail	Less than 39	B	65
		B-	62
		C+	58
		C	55
		C-	52
		D+	48
		D	45
		D-	42
		E+	30
		E	25
		E-	22

Grading Range

Excellent (70% or more)

- Analytical in style and approach, with critical understanding and interpretation
- Highly judicious in use of evidence and sources, with good references
- Comprehensive in scope and coverage; and entirely relevant to the topic addressed
- Exceptionally clear and attainable objectives, and success in meeting them
- Integrates details into a totally coherent whole, with clear and well-argued conclusions
- Entirely appropriate and accurate use of language.

Good (60-69%)

- Explanatory in style and approach, with some critical interpretation
- Good range of sources and data, and judicious in use of evidence
- Fairly comprehensive in scope, and largely relevant to the topic and issues
- Clear, attainable and relevant objectives
- Integrates detail into a coherent whole and guides reader to a reasoned conclusion
- Appropriate and accurate language, with very few errors

Competent (50-59%)

- Competent grasp of evidence and issues, little superfluous or irrelevant content

- More descriptive or prescriptive than analytical
- Reasonable range and use of source material
- Attempts to create a coherent whole with clear conclusions
- Only rare instances of inappropriate or inaccurate language

Deficient (40-49%)

- Limited grasp of facts and issues with some irrelevant content
- Inadequate reading and references, and little originality
- Insufficient in quantity or quality at Master's degree level
- Attainable but somewhat limited objectives
- Links parts together but does not create a coherent whole with clear conclusions
- Weakened in places by inappropriate or inaccurate language

Inadequate (less than 40%)

- Poor in quality, with weak grasp of facts and issues and much irrelevance
- Inadequate reading and thinking, with insufficient sources and references
- Inappropriate and/or unattainable objectives, and/or failure to achieve them
- Fails to link parts to each other and to reach a justifiable conclusion
- Weakened throughout by inappropriate or inaccurate language

Appendix 2 - Examination Regulations

<http://documents.manchester.ac.uk/display.aspx?DocID=29208>

Postgraduate Degree Regulations

VERSION: 3.9, April 2023 - for all Postgraduate Taught students registered from 2022-23 onwards

CONTENTS:

Postgraduate Taught Regulations

- A. Credit and Award Framework
 - B. Title of Taught Awards
 - C. Accreditation of Prior and Experiential Learning (AP(E)L) / Rescinding Awards
 - D. Assessment and Credit Accumulation
 - E. Compensation and Reassessment maximums
 - F. Compensation
 - G. Reassessment
 - H. Treatment of deferral marks
 - I. Exit Awards
 - J. Classification of Postgraduate Taught programmes
 - K. Posthumous and Aegrotat Degrees
 - L. Examination Board Arrangements
- Appendix A – Postgraduate Degree Classification Scheme

Note: Faculty approved variances to the Degree Regulations will be described within the Programme Handbooks. Where they exist they will take precedence, for example, in order to comply with Professional, Statutory and Regulatory Bodies (PSRBs) or the Education and Skills Funding Agency (ESFA).

Appendix 3 – Harvard Style Guide for References

Where published work is being cited or quoted from in **any** kind of student submission, Geography requires you to use a standard and full method of citation. The required conventions are as follows:

In your text, references **must** take the following forms:

For single authored work	either Braithwaite (1990) or (Braithwaite, 1990)
With two authors:	either Braithwaite and Zhang (1997) or (Braithwaite and Zhang, 1997)
With more than two authors:	either Braithwaite <i>et al.</i> (2006) or (Braithwaite <i>et al.</i> , 2006)
Where one author quotes another:	Braithwaite in Evans (1990)

Page numbers **must** be shown with the date [e.g. (Braithwaite, 1990, 25-36)] if you are giving a direct quotation from a text, or you wish to direct your reader to a particular part of the cited text for reference.

Less than full and proper referencing in all submitted student work will be penalised when the work is assessed, and especially in dissertation work

Please note that wherever possible *italics* and not underline should be used. All the IT printers in the School of Environment and Development can print *italics*. Use underline only when *italics* are not available, or in hand-written work.

At the end of the text, in the bibliography/reference section, the full reference takes a slightly different form depending on the type of publication. Please remember that all works cited anywhere in your text **must** have an appropriate entry in your bibliography.

Referencing for a book

Hughes, P.D., Castree, N. and Evans, J.Z. (2005). *Referencing for Geographers*. Braithwaite Press, New Mills, 36-42.

(i.e. published by Braithwaite Press which is based in New Mills)

① Page numbers are only needed for books if it is a particular section which is relevant, or to give the page numbers of a specific chapter, if multi-authored, or for a quotation or diagram you are copying.

Referencing for a journal article

Evans, J.Z. (2002). 'Pubs and the Modern Geographer', *Modern Geography Viewpoint*, 63(6), 456-504.

(i.e. Volume 63, Number 6, pages 456 to 504)

Appendix 4 – SEED Word Count Policy

For every piece of work which you are required to submit for assessment, the Course Convenor will indicate the word limit. This is a **maximum** word count and should not be exceeded. Markers can take into account minor transgressions of up to 10% within the existing marking criteria which means that you can lose marks for not being concise.

The word count includes:

- chapter footnotes and endnotes
- quotations
- tables, etc.

It does not include:

- bibliography
- appendices (which should be for supporting, illustrative material only and may not be used to elaborate or extend the argument)

You **must** include a word count on the front page of every piece of work. Failure to indicate the word count, or the provision of a false word count, may lead to disciplinary action.

What are the penalties for exceeding the word count?

- If you exceed the word count by between 10-50%, your final assignment mark will be capped at 50% (PGT) or 40% (UG).
- Work exceeding the word count by more than 50% will be viewed as not having met the requirements of the assessment. The work will not be marked and a mark of zero will be recorded.

Please note also that you **must** retain an electronic copy of each piece of work which you submit for assessment.
