

Does your child have **JUVENILE IDIOPATHIC ARTHRITIS?**

Have they started treatment with
A BIOLOGICAL THERAPY
within the last six months?

If so, they might be eligible to be included
in one of two **research studies** coordinated
by the University of Manchester.

Both studies look at the **long-term safety
and effectiveness** of these treatments that
are used in routine care.

The Biologics for Children with Rheumatic Diseases study (BCRD) recruits children and young people who are starting a biologic therapy other than etanercept (Enbrel).

REC ref: 09/H1008/137

BSPAR
ETANERCEPT
COHORT
STUDY

The BSPAR Etanercept Study recruits children and young people who are starting etanercept (Enbrel) or who are starting methotrexate.

REC ref: MREC/02/7/106

If you are interested please speak to the nurse or consultant at your next clinic appointment.

If you have any questions please contact one of the study coordinators
katy.mowbray@manchester.ac.uk or emily.sutton@manchester.ac.uk
