

Social Justice Photography Competition Runner Up 2018

Boundless

Mian Akbar Shah, Electrical and Electronic Engineering

Imagine. Imagine a world with absolute harmony. A neighbourhood where the caring Fatma does not feel threatened by wearing her hijab. A community where the reticent Wanchat can show off his controversial sexuality. A city where the genius Tarig is not discriminated by having pencils put in his hair. A country where the North Korean Jie does not impersonate to be Chinese. I dream of an era when commoners obliterate boundaries that separate us. Perhaps we can all connect like a childhood jigsaw puzzle. Let us all be stellified and shine brightly for future generations to come.
