

Academic Staff Training

New Academics and Fellows programme

This flexible programme provides academic staff with the skills they need to carry out their research and teaching and learning duties. Training is available in three key development areas: inspirational teaching, research excellence and personal and professional development. Click [here](#) to find out more.

Academic Staff development programme

This programme supports academic staff through the different stages of their career. Topics include communication and interpersonal skills; academic and research skills; academic advising; and PGR Supervisor Training. Click [here](#) to find out more.

Pedagogy and Staff development programme

All those involved in teaching activities across the Faculty are encouraged to take part in the programme which is based around four key areas for the *Academy for Education and Professional Development*: teaching quality and design; student experience; learning environment; and independent learning. Click [here](#) to find out more.

Leadership in Education Awards Programme

The LEAP programme supports staff in evidencing their teaching excellence, and is an opportunity to receive a national qualification for teaching through the Higher Education Academy (HEA). Award pathways include: Associate, Fellowship, Senior and Principal HEA Fellowships. Click [here](#) to find out more.

Academic and Research Staff Mentoring Programme

The Faculty has a dedicated Academic and Research Staff mentoring programme where mentees are matched with senior colleagues who can help support them to flourish and reach their potential. Click [here](#) to find out more.

Other University Support

The [staff Learning and Development](#) team provides personal and practical skills and knowledge for staff to be more effective in their role including leadership and management, online learning and coaching. The [University of Manchester Library](#) offers a comprehensive suit of workshops, information sessions and online resources designed to support the development of researchers at all career stages.
