Ethical Grand
Challenges

Students from the **School of Biological Sciences** will take part in the **Sustainability Challenge** either in the **morning or the afternoon**. Look out for an email at the beginning of **Welcome Week** with full details.

SUSTAINABILITY CHALLENGE

Science has revealed the existence of climate change. Bioscientists investigate the effects of climate change on organisms and ecosystems and aim to develop interventions to mitigate its consequences. The Sustainability Challenge explores the broader issues of Sustainability and then challenges you to consider how to develop successful interventions.

STELLIFY

ONE CHANCE ONE FUTURE

The **Sustainability Challenge** is the first of three **Ethical Grand Challenges** which engage all students at **The University of Manchester** with key global issues over the course of their degree, and which count towards the **Stellify Award**. The Ethical Grand Challenges give students opportunities to do more and be more. What will your Stellify journey be?
