

## **Summary of changes to the Procedure for the Annual Monitoring of Postgraduate Research Degrees – October 2019**

The previous annual monitoring guidelines were an update from 2011. The guidance has been vastly edited and simplified to reflect a streamlined process.

A requirement has been added under section 7.3:

*Periodic review is organised by the Faculty who choose a department/discipline or School to review annually and produce a report for consideration by the MDC Strategy Group the School, Faculty and Vice-President.*
