Research Support Managers (RSM) – The RSMs work in the Division and have responsibility for oversight and reporting on the funding applications submitted in each Division. The RSMs are the link between the Director of Research, Divisional academics and the Head of Division. The RSMs are responsible for escalating funding applications to the Head of Division for authorisation if required. The RSMs each support a Unit of Assessment Lead in preparation for the University submission to REF 2020. The RSMs line manage the RSO in their Division.

Research Support Officers (RSO) – RSOs support academics in the costing, compilation, review and submission of all research funding proposals. They also provide costings for industry collaborations, in these cases BE will review the costings if deemed necessary. The majority of the work that RSOs do is in the pre-award stage of the research lifecycle, other than any HR related activity and the coordination of recruitment for live research projects.

Research Support Administrator (RSA) – The RSA provides administrative support to all activity linked with the School's Research Services Team.
