 **句型 Speech Patterns**

S	Adv 在	Place
张先生 Zhāng xiānsheng	在 zài	哪儿? nǎr?
张先生 Zhāng xiānsheng	在 zài	家。 jiā。
张先生 Zhāng xiānsheng	不 bù	在。 zài。

在 precedes a place word to indicate the location of the subject. Please note that 是 is not needed in this structure. Negative and question forms follow the usual patterns.

A	在	B (的)	LW
商店 Shāngdiàn	在 zài	车站 chēzhàn	的东边。 de dōngbian。
大使馆 Dàshǐguǎn	在 zài	公园 gōngyuán	的旁边。 de pángbian。
我家 Wǒ jiā	在 zài	商店 shāngdiàn	的对面。 de duimian。

One can indicate the location of A in relation to B by following the speech pattern A + 在 + B (的) + LW. 的 is often omitted in spoken Chinese.

A (的)	LW	是	B
我 Wǒ	旁边 pángbian	是 shì	我大哥。 wǒ dàgē。
我家 Wǒ jiā	后面 hòumian	是 shì	商店。 shāngdiàn。
银行 Yínháng	东边 dōngbian	是 shì	一个图书馆。 yí gè túshūguǎn。

One can indicate the location of B in relation to A by following the speech pattern A + LW + 是 + B, which implies that the location is usually solely occupied by B itself.

A (的)	LW	有	B
商店 Shāngdiàn	对面 duimian	有 yǒu	一个银行。 yí gè yínháng。
大学 Dàxué	旁边 pángbian	有 yǒu	一个公园儿。 yí gè gōngyuánr。

## 语法注释 Grammar Notes

① 在火车站的旁边儿 — 儿 is added to some words in spoken Chinese, especially by people living in and around Beijing, to form a retroflex final marked by "r". However, it is not pronounced as an independent syllable. To add 儿 to a word can sometimes change its meaning or function, therefore do not add 儿 to words until you understand how to use it properly yourself.

② **Directions in Chinese** — Unlike in English, Chinese begins with the east and goes clockwise from there when speaking about the four directions. If it refers to directions in between these four directions, Chinese start with either east or west. Thus, southeast and southwest are 东南 or 西南, while northeast and northwest are 东北 and 西北 in Chinese, respectively!

③ **Location words** — Most location words can be formed with the suffixes 边, 面 and 头:

里边, 里面, 里头	外边, 外面, 外头
上边, 上面, 上头	下边, 下面, 下头
前边, 前面, 前头	后边, 后面, 后头

These location words are formed with the suffixes 边 and 面:

左边, 左面	右边, 右面	东边, 东面
南边, 南面	西边, 西面	北边, 北面

The following location words only have one form:

旁边, 对面, 中间

## 文化知识 Cultural Note

### 中国人和方位 Directions in Chinese Culture

Chinese culture attaches a positive value to the direction of south, which is also referred to as yang, signifying light, masculinity and strength. Long ago, Chinese farmers noticed that it was from the south that the most sunlight came. Most houses in China are built facing south, though nowadays in big cities houses and buildings are constrained by the street layouts and thus can be built facing any direction. It is interesting that the magnetic compass, a Chinese invention, is called 指南针 (zhǐnánzhēn, literally meaning south pointing needle) in Chinese.
