

Make a bracelet representing DNA

- We can use **extracted DNA** as instructions to tell bacteria how to make **enzymes** for us
- Bacteria can only use the **DNA** if it is made of correct pairs and looped into a circle
- Make your own **circular DNA** by pairing the **coloured beads** on two pipe cleaners!

Make a sequence (8 beads)

Make pairs

*green-red
blue-yellow*

Twist and loop into a circle
