Data sources and scope of report

Visualisations included in this summary are taken from the Study Space Bookings report on the Library Planning app (Power BI), which is in turn based on data from the Library study space bookings system. This data is enriched with faculty and school affiliations for students using Student Records data. The numbers represent *bookings* rather than *attendances* (there are a considerable number of no-shows at every session). For further information please contact Katie McGrother or go to the Power BI app Library Planning
