

# Blueprint: Meet the researchers

## **Claire Fraser, University of Manchester**

I am a Research Associate based at University of Manchester and I work on the Blueprint project. I have been carrying out research and programme management into a range of issues related to health and social care for over 20 years. I have a particular interest in research with children, young people and families and mental health research. When I'm not working I love to be outside in the countryside walking or running with my border collie.

## **Rhiannon Lane, Cardiff University**

I am a Research Associate based at Cardiff University and I have a long-standing interest in mental health systems and services. I completed a PhD at Cardiff University a few years ago, which explored the role of diagnosis in shaping people's experiences of mental health support as well as their identities. Since then, I have also become increasingly interested in mental health services for children and young people. In my spare time, I like to spend time with my family, go surfing and play the guitar really badly!
