

Join the Deep Dementia Phenotyping (DEMON) Network

We are the global network for the application of data science and AI to dementia research

The DEMON Network brings together academics, clinicians and industry partners. By connecting these people, we can facilitate innovative analytic approaches for interdisciplinary collaborative research. We believe data science and AI can transform dementia research and healthcare.

Our vision is to revolutionise dementia research and healthcare by bringing innovators together and harnessing the power of data science and AI

DEMON Network

Data science and AI for dementia

Who belongs in the DEMON Network?

- Do you want to be involved in cutting-edge, high impact dementia research?
- Do you have expertise in data science, AI, dementia or relevant industry?
- Do you want to be a part of an international group of over 900 ambitious professionals?

Join the DEMON Network today!

It is free to join. Become a member here:

www.demondementia.com/join

Benefits for members

- Opportunity to join 8 Working Groups for collaborative research papers and funding applications
- Access to a Clinical Advisory Panel of experienced clinicians offering clinical input to research
- Access to a Patient Public Involvement Group offering lay input to research
- Supportive framework with opportunities for members at all career stages

- Members-only Slack Channels for discussion, networking and collaboration
- Early Career Development support with two dedicated ECR Leads
- Research initiatives including training, networking, seminars and workshops
- Monthly email bulletin with relevant news, events and opportunities
- Monthly lecture series on topics of interest chosen by Network members
