“[The learning that I will take from this session is] recognizing that we are not just 'taking a student' we are welcoming them as part of our team and reflecting on a point that was made about positive placements made students think about wanting to work in those areas once registered. The initiative for a student to develop not just clinically but also in the bigger picture of a service and service development is very important.”

Physiotherapist

“One great point mentioned that its everyone’s job to deliver on education. A really good point to remind our workforce of”

Undergraduate Education Manager
