

Did you support people of African or Caribbean descent who died during the COVID-19 pandemic?

Are you ready to talk about it?

People of African and Caribbean descent are less likely to receive good care in the last year of life.....

....We need to change that now!

Help us make care better!

Do you work in health or social care or other organisations who provide support to individuals or communities?

Would you mind talking to us 1 to 1 via video call or telephone?

We want to hear your experiences about the support provided to people of African and Caribbean descent at the end of life and in bereavement.
