

## April 2020 AHPD Newsletter

### Have your say about how Covid19 is affecting the transport and logistics sector via the AHPD Network

Dear Age, Health and Professional Drivers' (AHPD) Network member

First of all, and most importantly, we hope you are keeping well in these troubling times.

The Age, Health and Professional Drivers' (AHPD) Network is aware of the challenges being faced in the transport and logistics' sector and the impact on companies and the individuals working in them. We are preparing some commentary on this, which we plan to release early next week. The aim is to recognise and highlight the incredible effort and changes occurring in your sector and the challenges this presents.

We welcome any comment you have on this that can help us to present the views of the sector appropriately. We know you are busy, and there is no obligation to do so, but if you are able to provide any comment relating to the following questions that would be appreciated.

*How is the situation affecting you, your company, and professional drivers? Both in general and in terms of health and wellbeing.*

*What is your company doing to try and help your drivers?*

*Is there any best practice you have put in place that you think may be helpful to share with other drivers and their companies?*

All comments we receive will be treated confidentially, we will not name any individuals or companies in any piece we write.

Thank you for your time in reading this, we hope to hear from you but also fully understand this may not be a priority for you at this time.

Best Wishes

Sheena and Lynn
