

A week in the life of our BSc Economics student, Jeremy

Hello, I am Jeremy, and I am currently a second-year BSc (Hons)

Economics student. I am from Malaysia. For a long time, I figured that a great understanding of how the world works is imperative to be successful in life. That's why I decided to study Economics, and I chose the University of Manchester due to its significance in the Economics discipline for centuries. I felt that the study of Economics here is thorough and complete, emphasising economic theory and its mathematical groundings, data analysis, and research methodologies. My ambition lies in the financial services industry, and I am confident my studies here will arm me with a vast arsenal of skills and knowledge for my future role.
