

## A week in the life of our Music student, Aimee

**Hi! I'm Aimee and I'm currently in my second year of the MusB Course as a main study singer.** The most rewarding aspect of my course is the access to professional musicians and the expertise of our lecturers, who due to the nature of a music based career, have all done so many different things and can therefore share so many different experiences and advice with us. This year, my main focuses are developing my practical skills - performance and composition, as those will make up the majority of my third year. I will be doing this by practicing a lot and reading around and doing extra work on all of my performance and composition modules. I am very excited for this year as I will have lots of opportunities to discover who I am as a musician.

- Formal study hours
- Informal study hours
- Student society
