# Lighting Control

To switch the lights on in the room the scene set light switch "ON" button needs to be pressed.

To switch the lights off in the room the scene set light switch "OFF" button needs to be pressed.

If you would like to set the lights to one of the preset lighting levels then press any of the buttons from 1-6, with 1 being the brightest and 6 being the dimmest.

The up and down arrow buttons can be used to increase or decrease the lighting levels from one of the presets.

The lights will switch off if there is no movement detected in the room for a period of 30 minutes
