Data Fellowship Project 2022

IPPR North – State of the North 2022

Organisation and Team

Institute of Public Policy Research North

Selection Method

We can be flexible with either in person or remote interviews.

Application Criteria

Essential:

- Ability to work independently and professionally with minimal supervision
- Competent at using Microsoft Word, Excel and Outlook
- Ability to locate relevant published datasets
- Ability to understand and interpret
- statistical data
- Familiarity with the devolution and levelling up agendas
- Ability to produce charts and tables

Desirable:

- **N/A**

Project Outline

Each year, IPPR North publishes an annual State of the North Report which is a 'health check' of the northern economy in that year. Previous themes have included devolution, economic resilience and levelling up. This year's theme is still in development but it is likely to focus on themes linked to the levelling up agenda, with a view to continuing to track the government's progress across this policy initiative. The Q-Step intern is welcome to feed into the development of this year's theme. The report will examine key datasets to paint a picture of what has happened over the last year in the North and set out policy recommendations for how the North can thrive.

Data Fellowship Project 2022

Practical Considerations

We are currently predominantly home-based but will be moving to a hybrid model over the coming months. We have membership of a shared workspace which the intern will be entitled to use to work independently and as part of in the office working days.

Support and Training

- Induction process
- Chance to shadow other members of staff
- Chance to attend meetings and learn about work of IPPR North
