

Data Fellowship Project 2022

Home Office - Central Analytical Services

Organisation and Team

Home Office – Central Analytical Services

Selection Method

Preference is for virtual interviews using MS Teams

Application Criteria

Essential:

- Ability to work independently and within a team
- Strong MS Excel skills
- Able to communicate complex findings to a non-technical audience

Desirable:

- Knowledge of R or similar programming language
- Experience of analysing survey data and hypothesis tests

Project Outline

The project will support the Central Analysis and Insight Team in the delivery of cross-cutting high-priority analysis at the Home Office. As the team work on short-term projects the successful candidate will be required to pick up a high demand project based on business needs.

Current data-focused project work includes mapping Russian and Ukrainian populations in the UK, analysis of the department's gender pay gap, and detailed analysis of the department's people survey results. Other projects have included regression analysis of police recorded crime data and statistical analysis of the criminal justice system process.

Data Fellowship Project 2022

Practical Considerations

The project can either be carried out in Westminster, Croydon, Sheffield or as a virtual placement.

Support and Training

A successful candidate would receive training and support as needed to complete the project.
