

# Data Fellowship Project 2022

Centre for Local Economic Strategies (CLES) -  
Connecting public spending & levelling up

## Organisation and Team

Centre for Local Economic Strategies

## Selection Method

Online interview

## Application Criteria

### Essential:

- Ability to work independently and professionally with minimal supervision
- Advanced Microsoft Excel and knowledge of database software (e.g. SQL, R)
- Understanding of relevant published datasets
- Ability to understand and interpret statistical data
- Ability to visualise data to tell a story

## Project Outline

CLES is looking to develop research related to community wealth building in local economies across the UK.

We are seeking an internship which would lead on the development of a research project connecting public spending data with the levelling up of local places.

We expect this research to be published and disseminated nationally and you would be expected to take a lead role in preparing key research outputs and presenting these to relevant stakeholders alongside other CLES staff.

# Data Fellowship Project 2022

## Practical Considerations

We are currently working in a hybrid model so would expect a mixture of office and home-based working.

## Support and Training

- **Induction to CLES**
- **Chance to work alongside and be exposed to wider CLES projects**
- **Opportunity to be involved in the preparation for the CLES Summit 22**
- **Chance to join CLES team and social events**
