BIOL62000 Health & Safety Online Course:

All students are automatically enrolled onto an introductory unit (BIOL62000) that provides information on health and safety, academic malpractice and academic literacy. Completion instructions for each of these sections are clearly defined within the course.

Completion of the academic malpractice and health and safety sections is mandatory for all students. All assessments must be completed as soon as possible after the programme begins, with the academic malpractice assessment completed before the first piece of coursework is submitted.

You may also wish to view the [FBMH eLearning online induction](#). This is also accessible through your Community Space on Blackboard.
