Foreword from Professor Luke Georghiou

Deputy President and Deputy Vice-Chancellor
PI of the Wellcome Translational Partnership Award (TPA)

We have a duty to society to ensure that our excellent research is applied for benefit to health, well-being and the economy. Successful translational research is achieved by connecting people with complementary skills and assets at all stages of the process from early discovery to clinical implementation.

Supported by the Translational Partnership Award (TPA) from Wellcome, Translation Manchester was established to help overcome the obstacles to conducting translational research by bringing together a network of support, facilities and expertise to make the pathway to translation quicker and easier. This event celebrates the Translation Manchester Research Network established back in 2019. It will bring together our translational research community to discuss the highlights and challenges of conducting translational research at Manchester. We hope that you enjoy this event and look forward to hearing how we can support your research needs now and in the future.

How do you support researchers in Manchester?

The University of Manchester was one of the first institutions to receive a Wellcome Translational Partnership Award (TPA) back in 2018. The 6 year award amounts to £3.6m of funding to build better links between science, technology and innovation by removing barriers between disciplines and making it easier to take the first translational step. The TPA is delivered through Translation Manchester which launched in February 2019. Our Translational Research Managers (TRMs), Dr Alessandro Faroni and Dr Fiona Foster manage the TPA award and Translation Manchester.

We help researchers by:

- Forging new and productive connections between UoM researchers and NHS clinical staff

- Raising awareness and increasing engagement in translational research across UoM and associated Greater Manchester NHS Trusts
- Supporting investigators, enabling them to overcome hurdles and bottlenecks along their translational research journey and progress projects across all stages of the Translational Research Pathway.

The TRMs manage two translational funding schemes 'Confidence for Translation (C4T)' and 'Access to Expertise (A2E)' providing pump priming funding to address a specific translational bottlenecks or hurdles.

Our Translational Research Bioinformatician, Dr Lijing Lin, manages the Informatics Training Scheme and the Bioinformatics Expertise service, which provides researchers with an opportunity to gain skills in the areas of health informatics, bioinformatics and

biostatistics that can be applied to their translational research projects.

The Translation Manchester team is supported by our Translational Research Support Officer, Iqra Habib.

At what stage in their research project should a researcher approach you for support?

Researchers who are experiencing a bottleneck or hurdle that is preventing them from progressing their translational research project should approach Translation Manchester for support. This could be anything from needing a connection to clinical staff in the NHS or help finding the right person to collaborate with.

Our TRMs also support translational funding applications and access to patient samples and data. Researchers who want to engage in translational research and need advice on how to do so should also contact our TRMs.

Translational Stages Supported:

Meet the Translation Manchester Team

Professor Luke Georghiou

Deputy President
and Deputy Vice-Chancellor;
TPA Principal Investigator

Professor Nigel Hooper

Associate Vice-President for
Research; TPA Co-Investigator

Dr Lloyd Gregory

Academic Partnerships Director at
Health Innovation Manchester;
TPA Operational Lead

Dr Natalie Theodoulou

Research Development and
Innovation Manager;
TPA Operational Lead

Dr Alessandro Faroni

Translational Research Manager
TPA Programme Manager

Dr Fiona Foster

Translational Research Manager
TPA Programme Manager

Dr Lijing Lin

Translational Research
Bioinformatician

Iqra Habib

Translational Research
Support Officer

The Translation Manchester Research Network

▶ Translational research relies on collaborations and multidisciplinary working, but in organisations as large as the University of Manchester, finding the support you need at the right time can sometimes be tricky. We are extremely fortunate that there are a number of groups and organisations that span the University and the Greater Manchester NHS Trusts, which exist to facilitate translational research.

In an attempt to bring this infrastructure together into one, easily accessible space, Translation Manchester has created the 'Translation Manchester Research Network (TMRN)' as your one-stop shop for all your research support needs. Spanning funding to biobanks, statistics to trial design- there is something for every type and stage of research project.

Our booklet, which can be downloaded by scanning the code to the right or by following [this link](#), provide details on how each network partner can support

researchers and outlines when and how to contact them to utilise their services.

We hope this initiative will help direct you to the right people at the right time so we can work together to enable Manchester's translational research projects to progress towards innovations and treatments that impact healthcare locally, nationally and internationally.

The pathway indicator, at the bottom of each page, shows which stages of the translational pathway the partner is able to support. If you're interested in joining the network, or think there's a gap that needs filling, get in touch- we are always looking to add new partners to the network.

✉ translation@manchester.ac.uk

"We already have major research infrastructure in the BRC and CRF and a multitude of support systems for producing high quality research. We now need a co-ordinated approach to successfully deliver research for patient benefit."

Professor Graham Lord
Vice-President and Dean of the
Faculty of Biology, Medicine
and Health at The
University of
Manchester

Translational Research Manchester 2022

Programme at a glance

▶ Translational Research at Manchester 2022 is an in-person event offering a fantastic networking opportunity for the translational research community in Manchester.

The programme includes lightning talks and trade stands from the Translation Manchester Research network partners, an informative funding workshop, talks from successful translational researchers and poster competitions for early career researchers.

There will also be a keynote speech with a drinks reception to close the event. This will be held at the Pendulum hotel minutes away from main University campus.

For details on each of the sessions, including speaker names and talk titles, please refer to the following pages.

| When | What | Where |
|---------------|---|--|
| 9.30 - 9.45 | Registration and coffee | Foyer |
| 9.45 -10.20 | OPENING SESSION Welcome and Introduction to Research & Innovation at the University of Manchester | Cotton Lecture theatre <i>Streamed to Pendulum and Pioneer Suites</i> |
| 10.20 - 11.10 | SESSION 1 Insights from Past Awardees and Lightning talks from Partners | Cotton Lecture theatre <i>Streamed to Pendulum and Pioneer Suites</i> |
| 11.10 - 11.30 | COFFEE BREAK Trade stands | Pendulum and Pioneer Suites |
| 11.30 - 12.20 | SESSION 2 Insights from Past Awardees and Lightning talks from Partners | Cotton Lecture theatre <i>Streamed to Pendulum and Pioneer Suites</i> |
| 12.20 - 13.50 | LUNCH & NETWORKING SESSION Trade stands & poster competition | Pendulum and Pioneer Suites |
| 13.50 - 15.25 | TRANSLATIONAL FUNDING WORKSHOP: Opportunities, tips and challenges of securing and managing translational funding | Cotton Lecture theatre <i>Streamed to Pendulum and Pioneer Suites</i> |
| 15.25 - 15.55 | COFFEE BREAK Trade stands | Pendulum and Pioneer Suites |
| 15.55 - 16.45 | KEYNOTE PRESENTATION & CLOSING REMARKS Prof Rob Bristow (keynote) and Prof Nigel Hooper (chair) | Cotton Lecture theatre <i>Streamed to Pendulum and Pioneer Suites</i> |
| 16.45 - 17.30 | PRIZE GIVING AND NETWORKING SESSION Includes drinks reception with canapes | Pioneer Suite |

Opening Session

Chair: **Prof. Luke Georghiou**

Where: **Cotton Lecture Theatre**

(streamed to Pioneer and Pendulum suites)

This opening session will recognise the importance of establishing and promoting a translational research culture at the University of Manchester by highlighting the potential of achieving patient outcomes and benefit society as a whole. In addition, the opportunities for translational researchers provided by the Translational Partnership award will be presented.

| WELCOME AND INTRODUCTION TO RESEARCH & INNOVATION AT THE UNIVERSITY OF MANCHESTER | |
|---|--|
| TIME | TITLE |
| 9.45-9.55 | OPENING SPEECH - IMPORTANCE OF TRANSLATIONAL RESEARCH AND INNOVATION Prof Luke Georghiou , Deputy President and Deputy Vice- Chancellor at the University of Manchester |
| 9.55-10.05 | TRANSLATIONAL RESEARCH AT MANCHESTER AND PARTNER ORGANISATIONS Prof Graham Lord , Vice-President and Dean of the Faculty of Biology Medicine and Health |
| 10.05-10.15 | TRANSLATION MANCHESTER AND THE TRANSLATIONAL PARTNERSHIP AWARD Prof Nigel Hooper , Associate Vice-President for Research at the University of Manchester |
| 10.15-10.20 | QUESTION & ANSWERS |

Session One

Chair: **Dr Claudia Lindner**

Where: **Cotton Lecture Theatre**

(streamed to Pioneer and Pendulum suites)

In this session we will highlight some of the success stories from TPA funded projects to showcase the breadth of translational research within the university and beyond.

In brief lighting style talks, some of our Translation Manchester Research Network partners will showcase how they can support your research.

Session Two

Chair: **Prof Curtis Dobson**

Where: **Cotton Lecture Theatre**

(streamed to Pioneer and Pendulum suites)

In this session we will highlight some of the success stories from TPA funded projects to showcase the breadth of translational research within the university and beyond.

In brief lighting style talks, some of our Translation Manchester Research Network partners will showcase how they can support your research.

INSIGHTS FROM PAST AWARDEES AND LIGHTNING TALKS FROM PARTNERS

| TIME | SPEAKERS |
|--------------------------------------|--|
| INSIGHTS FROM PAST AWARDEES | |
| 10.20 - 10.30 | Dr Sam Jones (A2E 2020 and 2021) |
| 10.30 - 10.40 | Prof Kathryn Else (P4T 2021) |
| LIGHTNING TALKS FROM PARTNERS | |
| 10.40 - 11.10 | Manchester Biogel - Dammy Olayanju Clinical Trial Sponsorships - Dr Mohammed Zubair Bioxydyn - Prof John Waterton Pankhurst - Prof Niels Peek Manchester Renal Biobank - Durga Kanigicherla Complex Wounds - Faith Phiri NCARC - Darren Green |

INSIGHTS FROM PAST AWARDEES AND LIGHTNING TALKS FROM PARTNERS

| TIME | SPEAKERS |
|--------------------------------------|--|
| INSIGHTS FROM PAST AWARDEES | |
| 11.30-11.40 | Dr Stuart Ellison (P4T 2021) |
| 11.40-11.50 | Dr Silke Brix (A2E 2019 and A2E 2021) |
| LIGHTNING TALKS FROM PARTNERS | |
| 11.50-12.20 | TDDU - Dr Katharina Edkins Biostatistics Collaboration Unit - Prof Andy Vail DITA - Annie Yarwood Research Design Services - Sarah Rhodes Bionow - David Holmes CRUK Commercial partnerships - Martyn Bottomley Innovation Factory - Duncan Henderson |

Lunch and Networking Session

Where: **Pendulum & Pioneer Suites**

When: **12.20 - 13.50**

This session will provide an opportunity to network with other researchers and clinicians with an interest in translation across different disciplines.

Stands from our partners will raise awareness of all the support available across UoM, Manchester NHS Trusts, Industry for translational research. See pages **13 and 14** for list of stands.

The posters exhibition will feature research from our early career researchers and will include a competition for best posters. See pages **15 and 16** for list of posters.

Translational Funding Workshop

Chair: **Sam Butterworth**

Where: **Cotton Lecture Theatre**

(streamed to Pioneer and Pendulum suites)

This session will highlight internal and external translational funding opportunities and provide useful tips on how to write successful funding applications in the translational space. Following on from this the session will focus on specific experiences in translating research and what are the common pitfalls and challenges and how these can be prevented, managed or overcome.

TRANSLATIONAL FUNDING OPPORTUNITIES AND TIPS AND CHALLENGES OF SECURING AND MANAGING TRANSLATIONAL FUNDING.

| TIME | TITLES AND SPEAKERS |
|--|---|
| PART A) HOW DO YOU GET TRANSLATIONAL FUNDING? | |
| 13.50 - 14.00 | Internal Funding - Translation & Knowledge Exchange Teams |
| 14.00 - 14.10 | LifeArc - Laura Stennett |
| 14.10 - 14.20 | EPSRC - Katherine Freeman |
| 14.20 - 14.30 | MRC - Sophie Liddell |
| 14.30 - 14.40 | NIHR - Juliana Callaghan |
| 14.40 - 14.55 | Questions & Answers + panel discussion |
| PART B) WHAT PITFALLS DO YOU NEED TO PREVENT, MANAGE, OVERCOME? | |
| 14.55 - 15.05 | Sue Bright - Lost in Translation – What can go Wrong |
| 15.05 - 15.15 | Alberto Saiani - Self-assembly peptide hydrogels from lab to commercialisation |
| 15.15. - 15.25 | Questions & Answers + launch of pitfalls and bottleneck survey |

Keynote Presentation and closing remarks

Keynote Speaker: Professor Rob Bristow

The importance of Team Science and the power of the network in translating your research.

Professor Robert Bristow joined the University of Manchester as Director of the Manchester Cancer Research Centre (MCRC) in August 2017 with a remit to developing a new cancer strategy for Manchester with a cancer team science approach. The MCRC is a unique partnership between Cancer Research UK, The University of Manchester and the Christie NHS Foundation Trust.

His primary research interests are in tumour hypoxia, DNA damage signalling and repair in tumours, and the genomics of prostate cancer progression and cancer treatment response. He is particularly interested in novel clinical trials that intensify cancer therapy to prostate cancer patients whose tumours harbour aggressive genetic changes and hypoxic sub-regions.

Professor Bristow is currently a senior group leader in Translational Oncogenomics at the CRUK Manchester Institute and was the lead PI for the Canadian component of the ICGC whole genome prostate cancer sequencing project (CPC-GENE).

He has served on a number of senior Scientific Advisory Boards and committees for: Prostate Cancer Foundation (USA), the MOVEMBER Foundation, the American Association for Cancer Research (AACR), the German Cancer Centre, Tuebingen Comprehensive Cancer Centre, NKI Amsterdam, the Danish Cancer Society and sits on the Scientific Executive Board for Cancer Research UK (CRUK).

He has over 300 published papers and book chapters and is twice a Canadian Foundation for Innovation (CFI) awardee. He was made a Canadian Cancer Society Research Scientist in 2004, an ESTRO Honorary Fellow in 2011 and a Fellow of the Academy of Sciences (UK) in 2019. In 2021, he was awarded the Weiss Medal by the Association for Radiation Research (UK) for distinguished contributions to radiation science.

Chair: **Prof. Nigel Hooper**

When: **15:55 – 16:45**

Where: **Cotton Theatre**

(streamed to Pioneer and Pendulum suites)

Prize Giving and Networking Session

Time: **16:45 – 17:30**

Where: **Pioneer Room**

NETWORKING OPPORTUNITY

This session will formally close the event and will provide another opportunity to network with other researchers and clinicians with an interest in translation across different disciplines.

The winners of the following prizes will be announced:

- Best poster and runner up (PhDs and Post-Docs/ Fellows categories)
- Best poster: People's choice
- Best Stand
- Most stands visited

The evening will close with a drinks reception and Canapes

Poster Presentations

- 1. Self-assembling peptide hydrogels as bioinks for 3D Bioprinting applications.**
Albert Ginjaume, Judith Hoyland, Alberto Saiani
- 2. Circulating free DNA (cfDNA) multi-modal profiling and tissue-of-origin predictions in Cancers of Unknown Primary (CUP).**
Alicia-Marie Conway, Simon Pearce, Alexandra Clipson, Francesca Chemi, Katarzyna Murat, Saba Ferdous, Sophie Richardson, Elaine Kilgour, Matt Krebs, Alastair Kerr, Caroline Dive, Natalie Cook, Dominic Rothwell,
- 3. Using machine learning to phenotype chronic pain patients based on psychological characteristics: a proof of concept.**
Ariane Delgado-Sanchez, Dr Nelson Trujillo-Barreto, Dr Christopher Brown, Dr Christiana Charalambous, Dr Manoj Sivan, Dr Anthony Jones
- 4. Developing a web-based digital platform to encourage activity, healthy eating and hydration to promote healthy ageing in older adults.**
Chloe French, Sorrel Burden, Emma Stanmore
- 5. Practical recommendations to improve incident management practices in mental health Trusts in England.**
David Wood, Catherine Robinson, Rajan Nathan, Rebecca McPhillips
- 6. Usability, acceptability and feasibility of the adapted Keep On Keep Up (KOKU) programme for Chinese older adults (Chinese KOKU Project).**
Yimin Tang, Emma Stanmore, Sorrel Burden
- 7. Manchester Intermittent Diet in Gestational Diabetes Acceptability Study (MIDDAS-GDM): A Randomised Feasibility Trial of an Intermittent Low Energy Diet (ILED) in women with Gestational Diabetes and Obesity (PROTOCOL).**
Elizabeth Dapre, B Issa, M Harvie, T Su, B McMillan, F Hanna, A Pilkington
- 8. Using zebrafish and in vitro drug screening to identify novel anti-inflammatory compounds for the treatment of spontaneous intracerebral haemorrhage.**
Emily McMahon, Siobhan Crilly, Victor Tapia, Adrian Parry-Jones, Chris Hoyle, Catherine Lawrence, Sally Freeman, Stuart Allan, David Brough, Paul Kasher
- 9. HIF1-alpha heterogeneity in niche priming and metastasis**
Hannah Harrison, Ciara O'Brien
- 10. Circulating Innate Immune Cells in Myasthenia Gravis.**
Katherine Dodd, Jon Sussman, Madhvi Menon
- 11. Risk Stratification to Predict Renal Survival in Anti-Glomerular Basement Membrane Disease.**
Lauren Floyd, Sebastian Bate, Abdul Hadi Kafagi, Nina Brown, Jennifer Scott, Marek Myslivecek, Graeme Reid, Faten Aqeel, Doubravka Frausova, Marek Kollar, Phuong Le Kieu, Bilal Khurshid, Ajay Dhaygude, Vladimir Tesar, Stephen McAdoo, Mark A Little, Duvuru Geetha, and Silke R Brix
- 12. Smartphone-based neural entrainment technology for chronic pain management in home settings.**
Le Xing, Stephen Halpin, Alexander Casson, Anthony Jones
- 13. Find Logo And Give Medication Advice Vision Impairment (FLAG-Me VI): Supporting community pharmacists to improve medication safety for people with vision impairment**
Lisa Riste, Sally Giles, Penny Lewis, Richard Williams, Suzanne Embury, Kim Jaye, Abu Akram, Nishi Gangani & Darren Ashcroft
- 14. Boosting Car T Cells with Mannose.**
Macarena Lucia Fernandez Carro, Adam Hurlstone
- 15. Radiographic features associated with the prodromal Charcot foot**
Maximilian deSancha, Jonathan Harris, Tim Cootes, Claudia Lindner
- 16. The role of chemokines in driving normal tissue toxicity in radiotherapy-induced bowel inflammation.**
Nabina Pun, Urszula M Cytlak, Brian Telfer, Duncan Forster, Jamie Honeychurch, Kaye J Williams, Mark Travis, Timothy Illidge, Douglas Dyer
- 17. Designing a Peptide Hydrogel for Early Detection of Cancer.**
Niall Mahon, Olga Tsigkou, Elena Bichenkova, Alberto Saiani

Poster Presentations

18. Targeting arrhythmias via modulating the cyclic guanosine monophosphate pathway; a translational role for the clinically available sGC activators?

Olivia Johnstone, Luigi Venetucci, Andrew Trafford

19. Automating Radiographic Measurements in Cases of Childhood Hip Disease.

Peter Thompson, M. Khattak, D.C. Perry, T.F. Cootes, C. Lindner

20. Investigation of CCL2-conjugates as monocyte targeted agents for the treatment of Chronic Myelomonocytic Leukemia.

Rachel Cant, Lucy Huitong Li, May-Li MacKinnon, Blanca Risa Ebri, Kiran Batta, Daniel Wiseman, Sam Butterworth

21. Dynamic System to Study Mitochondrial-Endoplasmic Reticulum Contact Sites During Physiological Development and Disease.

Richard Monaghan, B.D. Keavney

22. Identification of molecular signatures in sputum that are associated with cystic fibrosis lung disease activity.

Lord RW, Maher RE, Barret E, Barry PJ, Emmott E, McNamara PS, Smith JA, Jones A

23. The 'bed to bedside' approach – identifying predictive biomarkers for molecular targeted radiotherapy.

S Lunj, Y Song, K Reeves, H Mistry, K Patel, H Nightingale, T Smith, P Hoskin, C West & A Choudhury

24. Modification of the Renal Risk Score in ANCA Associated Glomerulonephritis improves prediction.

Sebastian Bate, Silke R Brix

25. A UK Academic DNA-Encoded Library Screening Resource.

Sergi Celis, Anna Tierney, Cameron Taylor, Haitham Hassan, Elena Detta, Martin Noble, Andreas Brunschweiler, Andrew Leach, Mike Waring, Sam Butterworth

26. HER2 Overexpression Causes Oxidative Stress And DNA Damage By Altering The Energy Metabolism During Breast Tumour Initiation.

Sevim Beyza Gurler, Fuhui Chen, Craig Lawless, George Taylor, Robert Pedley, Lili Dimitrova, Kyriaki Pavlou, Oliver Wagstaff, Keith Brennan, Andrew Gilmore, Ahmet Ucar

27. Design and characterisation of novel peptide-based hydrogel for control therapeutics delivery.

Siyuan Dong, Aline Miller, Alberto Saiani

28. A real-time ex vivo functional assay suite identifies pronounced differences in the relapse ovarian cancer patient DNA damage response phenotype which are highly relevant to therapeutic dilemma decisions.

Thomas DJ Walker, Marcus J Price, Caitlin A Waddell, Katie Finch, Laura C Woodhouse, Jane Rogan, Richard J Edmondson

29. Metabolic phenotyping of acquired ampicillin resistance using microbial volatiles from Escherichia coli cultures

Breanna Dixon, Waqar M. Ahmed, Tim Felton & Stephen J. Fowler
