

A week in the life of our BSc Economics student, Khushi

Hi, I am Khushi, and I am a second-year international student studying BSc. Economics at the university. I am very interested in economic consulting and analysis, and I feel like this economics course gives me perfect skills to be successful in my futures endeavours. I feel being a student at Manchester gives me the opportunity to develop as a person. I am taught by lecturers belonging to one of the most excellent economic departments in the world which gives me a sense of support.
