

# A week in the life of our Japanese (MLBM) student, Natalie

**Hi, I'm Natalie, a final year student in Japanese and Business.** In this joint-honours course, I get to decide whether to focus more on the Japanese or the business side. On top of that, a wide range of optional business modules are provided for you to develop your own business path. The best part of my programme is that you are guaranteed a year study abroad in the country where your language is used during your 3rd year. Apart from academics, there are various students' societies and events going on all the time. At the University of Manchester, you can always find something fun to do!

- Formal study hours
- Informal study hours
- Student society
- Part-time work
- Social activities
