Viewing a timetable in grid format

July 2026

There are two ways in which a course unit/programme can be viewed via grid format:

1. **New for 2026**: Via publish. Please see the following instructions: https://documents.manchester.ac.uk/protected/display.aspx?DocID=79208
   This method utilises publish which is already used to view personal timetables. Staff can now use the "search" function in publish to lookup a programme or course unit timetable.

2. Via Programmes of study. This method has been used for a number of years and may still be preferred than the new publish

   1. Use the following link: https://timetabling.manchester.ac.uk/Timetables/prod2627/Programmes/

   2. Select whether you wish to view locations, programmes, or individual units

   3. Select your desired department

   4. Select your desired location, programme or course unit.

   5. Select the specific weeks you wish to view. Semester 1 or semester 2 can also be selected.

   6. Click on 'view timetable'.

Please note, if you are attempting to access"programmes of study" resource remotely off campus you will need to ensure you are connected to Global Protect.
