

## **MATERIAL RESOURCE MANAGEMENT GROUP**

### **Purpose**

**Material Resource Management (MRM)** Group provides advice on material and resource management including construction & refurbishment projects, Laboratory Efficiency Assessment Framework (LEAF) and waste & recycling matters across the University. It is responsible for providing ideas and monitoring progress on those related commitments in the new Environmental Sustainability Strategy 2023-2028.

### **Terms of Reference:**

- To oversee the development of long, medium and short-term proposals to optimise efficient use of material and resource across the University.
- To capture current material and resource related good practice and co-ordinate communications.
- To receive and evaluate appropriate data informing or resulting from actions and outputs originating from this group.
- To consult with and seek feedback from relevant parties.
- To provide technical expertise and analysis, as appropriate.

### **Frequency of meetings:**

Bi-monthly

### **Reporting:**

Progress is reported through the Carbon Action Group and Environmental Sustainability Committee.
