

A week in the life of our Drama and Film student, Lucy

Hi, I'm Lucy! I'm currently in my second year studying Drama and Film.

Manchester is such a great city to study this subject as it has such a heart of creativity. There is a constant stream of mainstream, as well as more independent, theatre and film throughout the city. I especially love going to Home as well as Manchester Art Gallery to help inspire and widen my experience of art. The University of Manchester gives a great holistic education with modules in acting, directing, film studies, documentary making and many, many more. The breadth of experience it gives is incredibly valuable if you are wanting to go into the industry. I have also had so many amazing opportunities and met so many people through the filmmaking, drama and netball societies that the university offers- something I would highly recommend getting involved with!

Formal study hours

Informal study hours

Student society
