

A week in the life of our Film Studies and German student, Alicia

<J"AmblUa Y]g5"MUUbX=a U&bXmYU'gh XYbhgh Xn]b[: J'a UbX; Yfa Ub" This year, I'm studying VR Filmmaking, multiple German film modules and Japanese animation. Manchester has a more theory-based approach to Film Studies which allows me to study the themes and history behind the movies I study as well as the practical side. I love living in Manchester because its a super lively and fun city with so much to do like shopping in Affleck's and clubbing at Hidden and Deaf Institute. Usually, I spend most weekends working, clubbing and hanging out with my housemates. I'm also the Publicity officer for the Filmmaking society which involves managing the social media, marketing the society events and helping to run those events.

Formal study hours

Informal study hours

Student society

Part-time work
