

## A week in the life of our Liberal Arts student, Fabiana

**Hi, I'm Fabiana, and I'm a third-year Liberal Arts student.** Since my degree programme encourages me to explore different departments, this semester my academic focus is on local leadership and new global systems within the field of environmental sustainability. In addition to uni work, this is my third year as a student representative, my second year as a student ambassador, and I have recently joined the Volleyball society. I live in Rusholme with two of my best friends and we spend most of the time in our living room watching TV and eating dinner together. Manchester is a great place to live - it is a busy city for when you want social activities, but it is also not difficult to find quiet and tranquil neighborhoods to rest and escape the density. I can't believe how much time has flown. I love it here, and I'm sure you would too!
