

## A week in the life of our BA Criminology student, Sanjida

**Hi! My name is Sanjida and I am a Criminology student here at the University of Manchester.** I chose to study at Manchester because of the diverse range of skills this particular course has to offer, ranging from the strong academic writing skills you gain from essay writing, and the coding skills you obtain from learning how to analyse data with R studio. You are also offered the full flexibility to choose which units you want to study in your final year, allowing you to explore the areas in criminology that interest you most. The criminology department focuses widely on gaining transferable skills to allow you to excel outside of university, and are always getting in new guest speakers from different fields to help students get an insight into their desired careers.

Formal study hours

Informal study hours
