

## A week in the life of our Law with Politics student, Maddie

**Hiya! My name is Maddie, and I am a second year Law with Politics student at the University of Manchester!** Choosing this degree followed my love for A-level politics and my aspiration for a qualifying law degree, I think my degree will set me apart from other aspiring lawyers because I have learnt ideas far beyond the legal field. I have developed a deep fascination for both criminal law and tort law. Initially, I had little prior exposure to tort law and held a somewhat negative opinion of it. Ironically, I have come to realize that it is the area of law I wish to pursue post-graduation. What distinguishes Manchester from other cities, and what I particularly adore about it, is the striking contrast between the picturesque walks you can enjoy around the city and the vibrant nightlife that awaits after.
