

The Nottingham Systematic Review Course

Tuesday 25th – Friday 28th June 2024

‘One of the best courses I have ever attended. A vast amount of relevant and comprehensive information conveyed in an efficient and digestible way. Outstanding quality of presenters, organisation excellent and professional.’

‘I have learnt a great deal. I have a much better understanding of what is involved in a systematic review now.’

‘The lectures and materials—particularly the slides, were so good. Complex concepts were explained clearly. Excellent!’

‘I don’t think the course would have been as beneficial had it been delivered online. The face to face approach allowed one on one support during practical sessions as well as the ability to ask real time questions; both of these aspects would have been hindered by online delivery.’

What will you learn?

To Identify and Clarify your Review Questions,

To Understand and Develop Search Strategies and Manage the Results of Systematic Searches.

To Extract Data and Assess the Risk of Bias of Included Studies.

To Understand and carry out the Syntheses of Data Extracted,

To Apply the Methodology and Conduct Reviews Independently.

Course Overview

The Nottingham Systematic Review Course is aimed at enabling participants to become proficient in developing and undertaking a Cochrane-style systematic review of interventions. As this is an introductory course, no previous knowledge of systematic reviewing is required.

The course utilises a combination of lectures, small group discussions, workshops, library-based interactive tutorials, with hands on practical work at computer stations using RevMan and Endnote software. Review Manager (RevMan) is the software used for preparing and maintaining Cochrane Reviews.

What makes us different?

*This is a **hands-on course with a high focus on practical** and computer-based learning delivered through demonstrations, guided practical exercises and facilitated tutorials. All course materials are provided in electronic format.*

***Experienced tutors and facilitators, expert in their respective fields, are on hand to give you practical and individual advice on undertaking publishable systematic reviews.** There is the opportunity to network.*

*No prior knowledge is required, though, to maximise your learning, we ask you to have considered the topic (PICO) of your own review prior to the course, as there is **the opportunity to discuss and develop components of your own protocol.***

Please note that this course does not cover diagnostic or qualitative methods systematic reviews. Please contact us if you need more information on whether this is the right course for you.
