

AppsAnywhere is your go-to tool for accessing teaching and learning software applications from cluster PCs on campus.

Stream more than 100 apps now in any PC cluster.

To access
AppsAnywhere,
follow these
simple steps

1

LOG IN

AppsAnywhere should load when you log in to the cluster PC. But if it doesn't, click on the AppsAnywhere desktop icon:

2

SEARCH FOR YOUR APP

The easiest way is to use the search bar. You can save applications as 'favourites' for quick access later.

3

CLICK 'LAUNCH'

Click the blue 'Launch' button, and the application should load automatically. If the application is greyed out/unavailable head to the support page.

4

USE THE APP AS NORMAL

Your application should load and be ready to use in a few moments. Be aware it may load in the background and be slightly slower to load initially.

5

CLICK 'GET HELP' TO GET SUPPORT

If you need some help or can't launch or find the application you are looking for, click the 'Get Help' icon and head to the support page.
