The way to access teaching and learning applications on cluster PCs is changing from September 2024.

For access, follow these simple steps:

Log into AppsAnywhere
1

AppsAnywhere should load when you login to the cluster PC. But if it doesn't, click on the AppsAnywhere desktop icon.

Search for your application
2

The easiest way is use the search bar. You can save applications as 'favourites' for quick access later.

Click 'Launch'
3

Click the blue 'Launch' button, and the application should load automatically. If the application is greyed out/unavailable head to the support page.

Use the application as normal
4

Your application should load and be ready to use in a few moments. Be aware it may load in the background.

Click 'Get Help' to get support
5

If you need some help or can't launch or find the application you are looking for, click the 'Get Help' icon and head to the support page.

Need help?
