

REMORA Newsletter for site teams

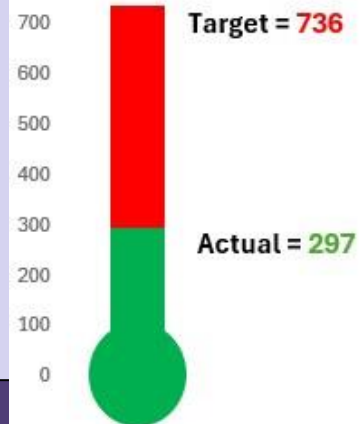

Many thanks to all of the rheumatology community in Greater Manchester and North West London for supporting the REMORA programme so far. We have only 6 more weeks of recruitment and would really value your focussed efforts in getting as many patients as possible with active RA recruited to the study.

We strongly believe that symptom tracking integrated into the NHS will help improve the care of people living with RA. We have a unique opportunity to prove this in the REMORA trial. So please do help wherever you can to support your research nursing teams to recruit until mid-December.

With best wishes,
Will & Sabine
REMORA Co-Leads

*** Just 6 weeks of recruitment left ***

REMORA2 Recruitment

Eligibility

You only need **ONE** of the following (but can have more):

- DAS28 ≥ 3.2 within last 6 months
- Change in DMARD or steroids within last 6 months
- Follow up visit within 12 months

Don't forget - we will collect the DAS28 score at every visit

Please remember to assess the DAS28 score at every visit, including at baseline. We will collect this information even if it isn't used to confirm eligibility

Reminders

- Please contact your research nurse if you see an eligible patient
- Our next online refresher training session for healthcare professionals takes place on 7th November, 11.30 – 12.00 (non-mandatory but open to all – please let us know if you'd like us to resend the invite)

101 patients recruited in October – highest recruitment month yet

RECRUITMENT LEAGUE TABLE – REMORA'S TOP 10*
