

BADBIR

The British Association of Dermatologists Biologics and Immunomodulators Register

The British Association of Dermatologists Biologics and Immunomodulators Register (BADBIR) is a drug safety register seeking to assess the long-term safety of treatments for psoriasis in a real-world population.

If you have recently started or switched treatments for your psoriasis you may be eligible to join. If you are interested, please speak to your Dermatologist.

If you have consented to BADBIR you can complete your questionnaires online – to sign up scan the QR code!

Our website includes our latest patient newsletters which includes summaries of the recent publications. It is your participation in BADBIR which allows the register to provide a wealth of information to our healthcare professionals.
